

QUALITY SELECT INVESTMENT

OVERVIEW

The GMO Quality Select Investment Fund seeks to generate total return by investing primarily in equities the Focused Equity team believes to be of high quality. The team believes that companies with established track records of historical profitability and strong fundamentals – high quality companies – are able to outgrow the average company over time, and are therefore worth a premium price. The Fund's disciplined approach uses both quantitative and fundamental techniques to assess the relative quality and valuation of global companies and aims to exploit a long-term investment horizon while withstanding short-term volatility. The Fund will be managed to maintain a portfolio-level carbon footprint that is below the level of that of the MSCI World Index. In addition, GMO excludes from the investment universe: (i) companies that appear on the Norges Bank's Exclusion List; and (ii) companies it determines to be in the following industries: fossil fuels, tobacco, alcohol, gambling, adult entertainment, and controversial munitions.
