What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R6	\$1 ¹	0.01% ¹

¹ The costs do not reflect fees and expenses of underlying funds. Those fees and expenses are material and, if reflected, the costs in the table would be higher. Please refer to the prospectus for more information about the fees and expenses of an investment in the Fund, including fees and expenses of underlying funds in which the Fund invests.

How did the Fund perform last year and what affected its performance?

Class R6 shares of GMO International Developed Equity Allocation Fund returned +17.10% (net) for the fiscal year ended February 28, 2025, as compared with +8.77% for the Fund’s benchmark, the MSCI EAFE Index.

The Fund’s decision to allocate a little over 20% using a deep value approach, targeting the cheapest 20% of stocks, was additive as the MSCI EAFE Value Index outperformed the broad MSCI EAFE Index by a little over 6%. The small overweight to Japan, which lagged the MSCI EAFE Index, detracted marginally from relative performance. Stock selection within the core developed ex-U.S. exposure was very strong, and this was a key driver of outperformance of the benchmark.

Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 3.96% to the performance for the fiscal year ended February 28, 2025. Performance for other periods including this date was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Additional information is available upon request.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information up to the most recent month-end, visit www.gmo.com. Performance shown is net of all fees after reimbursement from GMO. Returns would have been lower had certain expenses not been reimbursed during the periods shown and do not include the effect of taxes on distributions and redemptions. The performance information shown above only includes purchase premiums and/or redemption fees in effect as of February 28, 2025.

*Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 3.96% to the performance for the fiscal year ended February 28, 2025. Performance for other periods including this date was also positively impacted, sometimes materially. The gross expense ratio of 0.67% for Class R6 is equal to the Total Annual Operating Expenses set forth in the Fund's most recent prospectus dated June 30, 2024. The net expense ratio of 0.62% reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025 and may not be terminated prior to this date without the action or consent of the Trust's Board of Trustees. Elimination of this reimbursement will result in higher fees and lower performance.
