**This report describes changes to the Fund that occurred during the reporting period.**

What were the Fund costs for the last year?  
*(based on a hypothetical \$10,000 investment)*

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$68	0.65%

How did the Fund perform last year and what affected its performance?

Class I shares of GMO High Yield Fund returned +9.75% (net) for the fiscal year ended February 28, 2025, as compared with +10.19% for the Markit iBoxx USD Liquid High Yield Index.

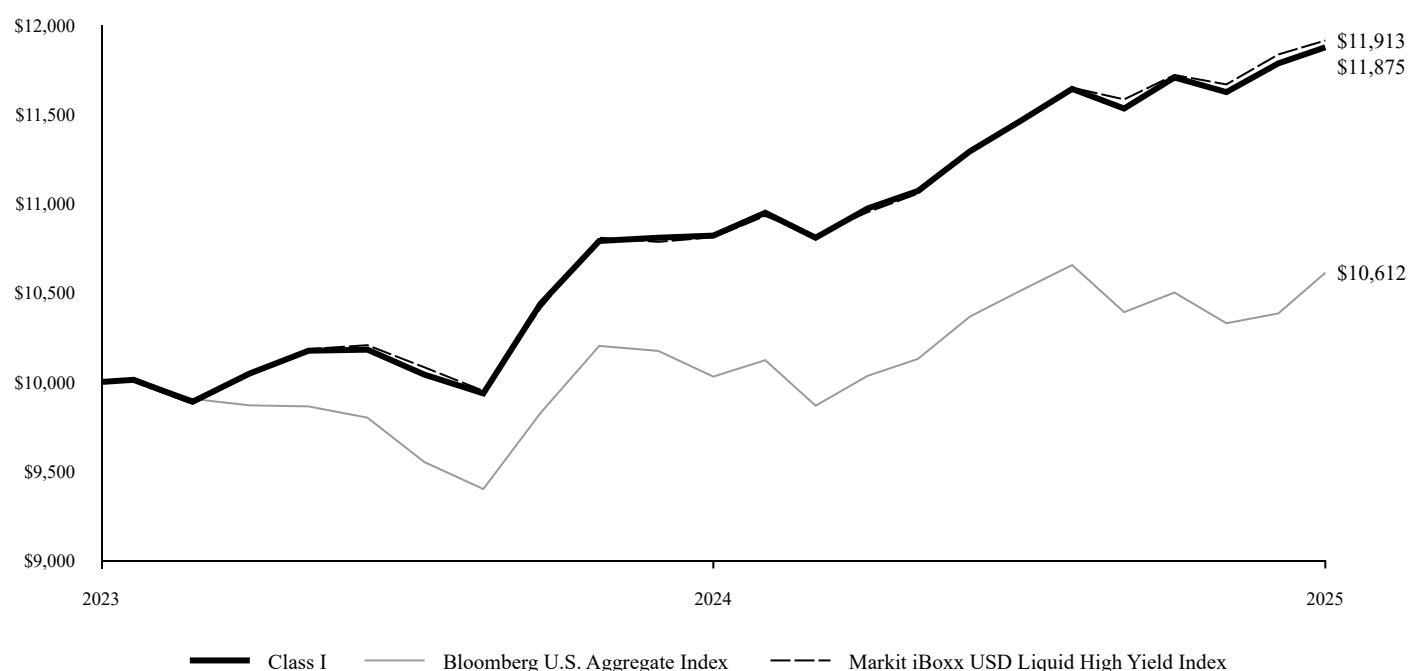

The Fund was invested in a mix of index portfolio products and cash high yield bonds. During the fiscal year, the Fund moved exposures between different products based on changes in the model’s alpha signals and other factors.

The Fund’s allocation to high-quality BB bonds drove relative underperformance. Relative gains from allocations to carry and portfolio products, including standardized Total Return Swaps and Credit Default Swap indices, were not enough to offset those losses.

### Average Annual Total Returns

	1 Year	4/13/2023 (commencement of operations)
Class I	9.75%	9.57%
Bloomberg U.S. Aggregate Index	5.81%	3.21%
Markit iBoxx USD Liquid High Yield Index	10.19%	9.75%

**Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** To obtain performance information up to the most recent month-end, visit [www.gmo.com](http://www.gmo.com). Performance shown is net of all fees after reimbursement from GMO. Returns would have been lower had certain expenses not been reimbursed during the periods shown and do not include the effect of taxes on distributions and redemptions. The performance information shown above only includes purchase premiums and/or redemption fees in effect as of February 28, 2025.

The gross expense ratio of 1.07% for Class I is equal to the Total Annual Operating Expenses set forth in the Fund's most recent prospectus dated June 30, 2024. The net expense ratio of 0.66% reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025 and may not be terminated prior to this date without the action or consent of the Trust's Board of Trustees. Elimination of this reimbursement will result in higher fees and lower performance.

**Material Fund Changes**

This is a summary of certain changes of the Fund since March 1, 2024.

Effective March 21, 2025, GMO has contractually agreed to waive its fees with respect to and/or reimburse the Fund to the extent that the Fund's total annual fund operating expenses (after applying all other contractual and voluntary expense limitation arrangements in effect at the time) exceed 0.35% for Class VI, R6 and I shares (each, an "Expense Cap"). The Expense Cap will remain in effect through at least March 20, 2026 and may not be terminated prior to this date without the action or consent of the Trust's Board of Trustees.

Also, effective March 21, 2025, GMO has also contractually agreed to waive its fees with respect to and/or reimburse Class I shares to the extent amounts paid by the Fund out of the net assets attributable to Class I shares for sub-transfer agency, recordkeeping and other administrative services provided by financial intermediaries for the benefit of Class I shareholders exceed 0.10% of the average daily net assets attributable to Class I shares. This reimbursement will continue through at least March 20, 2026 and may not be terminated prior to this date without the action or consent of the Trust's Board of Trustees.
