Major Performance Drivers

While Emerging Markets posted modestly positive returns in the second quarter, returns outside of China were much stronger. China and Turkey were the worst performing countries in the MSCI Emerging Markets index. China was hit by continued deterioration of its economic outlook after the initial boost post-reopening from Covid. While Turkey's performance was similarly bad, the impact on the MSCI Emerging Markets index was much smaller, since after years of economic crisis it represents less than 1% of the index.

China was the top contributor in the second quarter from a mix of underweight positioning in Consumer Discretionary, Communication Services, and Health Care. Overweight positioning toward Taiwan Information Technology and Brazil Energy were also among the top contributors.

Underweight positioning in India was a top detractor, reversing contributions in the first quarter. Strong performance of the Indian stock market was underpinned by optimism about its growth prospects, both on an absolute basis and relative to China. Enthusiasm for longer-term growth prospects was driven in part by news in April that India is now the country with the largest population, larger than China and with much stronger prospects for population growth.

Stock selection in South Africa Materials continued to be a challenge in the second quarter, including overweights toward Anglo American Platinum, Impala Platinum, and Kumba Iron Ore.

Portfolio weights, as a percent of equity, for the positions mentioned were: Anglo American Platinum (1.6%), Impala Platinum (1.0%), Kumba Iron Ore (1.2%)

Inception Date: 9-Dec-93

Risks: Risks associated with an investment in the Strategy may include Market Risk - Equities, Non-U.S. Investment Risk, Currency Risk, Management and Operational Risk, and Illiquidity Risk. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com.

Performance Returns: Performance data quoted represents past performance and is not predictive of future performance. Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. Gross returns are presented gross of management fees and any incentive fees if applicable. These returns include transaction costs, commissions, withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. If management and incentive fees were deducted performance would be lower. For example, if, before fees, the strategy were to achieve a 10% annual rate of return above its hurdle rate each year for ten years, and an annual advisory fee of 1% and incentive fee of 20% of net returns above the hurdle rate were charged during that period, the resulting average annual net return (after the deduction of management and incentive fees) would be approximately 7.20%. A Global Investment Performance Standards (GIPS®) Composite Report is included in the Important Information section at the back of this presentation. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO Emerging Markets Strategy seeks total return in excess of that of its benchmark, the MSCI Emerging Markets Index. GMO uses proprietary quantitative techniques and fundamental analysis to evaluate and select countries, sectors, and equity investments based on factors including, but not limited to, valuation, quality, patterns of price movement and volatility, macroeconomic factors, and ESG (environmental, social and governance) criteria. GMO expects the Strategy will have a value bias relative to its benchmark.

IMPORTANT INFORMATION

Benchmark(s): The MSCI Emerging Markets + Index is an internally maintained benchmark computed by GMO, comprised of (i) the S&P/IFCI Composite through 12/31/2018 and (ii) the MSCI Emerging Markets Index (MSCI Standard Index Series, net of withholding tax) thereafter. S&P does not guarantee the accuracy, adequacy, completeness or availability of any data or information and is not responsible for any errors or omissions from the use of such data or information. Reproduction of the data or information in any form is prohibited except with the prior written permission of S&P or its third party licensors. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. The MSCI Emerging Markets Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of global emerging markets large and mid capitalization stocks. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients.
