

GMO Global Developed Equity Allocation Fund

December 31, 2018

FUND OVERVIEW

The GMO Global Developed Equity Allocation Fund seeks total return greater than that of the MSCI World Index.

The Fund uses multi-year forecasts of returns among asset classes to build a portfolio that primarily provides exposure to non-U.S. and U.S. equity markets.

METHODOLOGY

The Fund's methodology, driven by the investment principle that valuations revert over time to their fair value, determines allocations based on multi-year forecasts of relative value among the major equity asset classes, together with an assessment of the relative risks of such asset classes. The process analyzes country, sector and individual security levels based on factors and characteristics such as aggregated price/book, dividend yield, cash earnings, price/cyclically-adjusted earnings, inflation, interest rates, etc. The forecasts are then used to select the underlying asset classes in which to invest and to decide how much to invest in each.

The underlying portfolios in which the Fund invests are actively managed, and equities are bought and sold according to GMO's evaluation of companies' published financial information and corporate behavior, and securities' prices. GMO uses a combination of investment methods to evaluate individual equities or groups of equities based on the ratio of their price relative to historical financial information and forecasted financial information, such as book value, cash flow, and earnings, and a comparison of these ratios to industry or market averages or to their own history.

PORTFOLIO CONSTRUCTION

The GMO Global Developed Equity Allocation Fund invests in other GMO-managed funds or directly in securities and derivatives. Depending upon the current valuation assessment of the global marketplace, the Fund may own different proportions of underlying portfolios at different times. The Fund attempts to rebalance when the investment outlook has changed, when cash flows occur, or when there has been a significant change in market valuation levels.

PHILOSOPHY & APPROACH

Harnessing the long horizon

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month end, visit www.gmo.com.

Fees (Class III): Gross Expense Ratio 0.60% equal to the Fund's Total Annual Operating Expense set forth in the Fund's most recent prospectus dated June 30, 2018.

Net Expense Ratio 0.59% reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2019. Elimination of this reimbursement will result in higher fees and lower performance.
