

GMO RESOURCES LONG/SHORT STRATEGY

OVERVIEW

The GMO Resources Long/Short Strategy's investment objective is high total return. We aim to accomplish this objective by owning attractively valued natural resource equities and shorting their expensive peers. The eligible universe includes commodity producers and companies that service commodity producers in the energy, metals, agriculture, and water sectors. Our opportunity set is global in nature and spans the market capitalization spectrum. The portfolio is diversified across sectors, countries, and regions on both the long and short sides and is intended to be approximately dollar neutral.

Sunrun Inc	United States	Clean Energy	4.14
Ivanhoe Mines Ltd	Canada	Copper	4.09
Total			55.81

Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying portfolios in which the asset allocation strategy invests and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide.

The FTSE 3-Month Treasury Bill Index is an independently maintained and widely published index comprised of short-term U.S. Treasury bills.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

About GMO: Founded in 1977, GMO is a private partnership whose sole business is investment management. The firm manages global portfolios with offices and clients around the world. Investment offerings include equity, fixed income, multi-asset class, and alternative strategies. GMO is known for blended fundamental and quantitative investment research expertise and a long-term orientation toward value opportunities.
