

U.S. SMALL CAP VALUE

OVERVIEW

The Strategy seeks to generate total return in excess of its benchmark, the S&P Small Cap 600 Value Index, by investing primarily in equities of U.S. companies that are included in the S&P 600 Index or whose market capitalization at the time of investment is less than that of the 1000 largest publicly held companies.

The Strategy's investment approach is grounded in the Systematic Equity team's belief that, in the short term, equity markets exhibit exploitable inefficiencies as a result of irrational investor actions, the imperfect flow of information, and the participation of non-economic actors, while in the long-term returns are ultimately driven by economic reality. The Strategy aims to take advantage of this inefficiency by utilizing a multi-factor valuation model in conjunction with other methods, such as cross-asset signals and corporate alerts, to identify mispriced equity securities.
