

FUND OVERVIEW

The GMO Resources Fund seeks to deliver total return by investing in the equities of companies in the natural resources sector.

FUND FACTS

Fund Identifier (Class III):

Ticker: GOFIX
Cusip: 362014 10 2

Inception: 12/28/11

Benchmark: MSCI ACWI Commodity Producers Index

Assets: \$534 Million

Portfolio Management:

Lucas White
Tom Hancock

Risks: Risks associated with investing in the Fund may include: (1) Focused Investment Risk: The Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers. (2) Commodities Risk: Commodity prices can be extremely volatile, and exposure to commodities can cause the value of the Fund's shares to decline or fluctuate more than if the Fund had a broader range of investments. (3) Market Risk - Equities: The market price of an equity may decline due to factors affecting the issuer or its industry or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these risks and others, please consult the Fund's prospectus.

About GMO:

Founded in 1977, GMO is an independently-owned, global institutional investment manager dedicated to providing our clients with superior investment advice and performance.

INVESTMENT THESIS – THE CASE FOR RESOURCE EQUITIES

We believe the long-term supply and demand dynamics in the natural resources markets favor an upward trend in natural resource prices. More specifically, we believe that demand growth, driven by population growth and the development of the emerging markets, will put increasing pressure on the limited supply of cheap, easy to access natural resources.

We believe resource-linked equities are a liquid means of capturing this opportunity, allowing investors to harvest the equity risk premium, while avoiding the negative roll yields that intermittently detract from commodity futures' returns. In addition, resource-linked equities have historically provided inflation protection, diversification, strong absolute and relative returns, and exposure to global growth, making resource-linked equities a compelling investment opportunity.

INVESTMENT APPROACH

Investment Universe

Within each natural resource segment, the team identifies companies that we believe will benefit from a broad rise in resource prices. These companies are chosen from the global equity markets, including emerging markets, and across the entire size spectrum, providing the team broad stock selection opportunities.

Strategic Allocation

We use a set of long-term targets to steer the portfolio's allocation to segments of the natural resources sector. In setting targets, we attempt to balance the importance of each market segment with considerations of each segment's investability. Market segments for which targets are set include integrated oil & gas, oil & gas exploration & production, alternative energy, industrial metals, and farming & forestry.

Stock Selection

Stock selection is driven primarily by valuation-based modeling and balances the desire to provide diversified exposure to various segments of the resources market with the attractiveness of the different segments within the universe. We do not control risk relative to any benchmark, though we continuously monitor risk exposures.

DIFFERENTIATION OF OUR APPROACH

We believe our approach to be differentiated across a number of dimensions:

Targeted Universe Definition: We focus on identifying companies that we believe will benefit from a broad rise in resource prices, as opposed to companies that just do business in the resources sector.

Value Focus: Our value orientation and proprietary valuation models are unique in this space.

Resource Diversification: We have the ability to diversify across segments of the resource markets, ensuring that the Fund is more than just an energy play.

Global Scope and Lack of Size Bias: We invest globally across the capitalization spectrum, allowing us to identify attractive investment opportunities wherever they may be.

Long-Term Perspective: As an independently-owned private partnership, GMO has the willingness and ability to take short-term risk in the pursuit of long-term returns; we believe this is particularly important when investing in the natural resources sector.

FUND PROFILE

Exposures by Resources Segment

Segment	Exposure
Energy	34.3%
Fossil Fuels	25.2%
Energy Drilling, Equipment, & Services	1.3%
Clean Energy	7.8%
Industrial Metals	45.2%
Diversified Metals & Mining	30.1%
Copper	9.1%
Lithium	6.0%
Agriculture	15.0%
Agricultural Productivity	5.6%
Farming	4.9%
Precision Agriculture	1.2%
Timber	0.7%
Fish Farming	2.7%
Water	3.0%
Cash	2.5%

5-Year Risk Profile¹

	Fund	Benchmark
Alpha	5.38	0.00
Beta	1.05	1.00
R ²	0.87	1.00
Sharpe Ratio	0.08	-0.19
Std. Deviation	20.60	18.27

Characteristics

	Fund	Benchmark
Price/Earnings - Hist 1 Yr Wtd Median	11.2 x	12.7 x
Price/Book - Hist 1 Yr Wtd Avg	1.4 x	1.4 x
Return on Equity - Hist 1 Yr Med	14.5 %	12.0 %
Market Cap - Weighted Median \$Bil	\$6.1	\$42.9

2014	-17.34	-14.69
2013	3.58	3.31
2012	10.30	1.96
2011	1.35	1.35

Annualized Return (%)²

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month end, visit www.gmo.com.

Fees (Class III): Gross Expense Ratio 0.74% equal to the Fund's Total Annual Operating Expense set forth in the Fund's most recent prospectus dated June 30, 2019.

Net Expense Ratio 0.74% reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2020. Elimination of this reimbursement will result in higher fees and lower performance.

¹ Does not include the impact of purchase premiums and redemption fees.

² Includes the impact of purchase premiums and redemption fees.

The MSCI ACWI Commodity Producers (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of listed large and mid capitalization commodity producers within the global developed and emerging markets. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.
