## OVERVIEW

The GMO Resources Strategy seeks to generate total return by investing in equities in the natural resources sector. The Strategy's benchmark is the MSCI All Country World Commodities Index.

GMO's Focused Equity team believes that the increasing demand for natural resources, driven primarily by population growth in and industrialization of emerging markets, coupled with the limited supply of these resources, favors an upward trend in resource prices over time. The Strategy seeks to invest in the securities of companies that we believe will benefit from this expected long-term rise in natural resource prices.

**Top Holdings:** GICS Sector Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying portfolios in which the asset allocation strategy invests and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide.
