The GMO Systematic Global Macro Strategy's investment objective is long-term total return. Over a complete market cycle, the Strategy seeks annualized returns of 10% (gross of fees) above the FTSE 3-Month Treasury Bill Index with annualized volatility (standard deviation) of approximately 10-15%. The Strategy takes both long and short positions in a range of global equity, bond, currency, and commodity markets using exchange-traded and over-the-counter (OTC) futures and forward foreign exchange contracts, swaps on commodity indices, equity indices and equities, and index options and other investments.
