

SYSTEMATIC GLOBAL MACRO

OVERVIEW

The GMO Systematic Global Macro Trust's investment objective is long-term total return. GMO Australia aims to produce a portfolio that seeks to outperform the Bloomberg Ausbond Bank Bill Index by taking both long and short positions in a range of global equity, bond, currency, and commodity markets using exchange-traded futures and forward foreign exchange contracts, as well as by making other investments.

The Systematic Global Macro team's investment process systematically applies value and sentiment strategies across global markets. We believe that markets are inefficient but, in the long term, that economic reality will prevail and markets will revert toward fair value; however, the timing of this is uncertain. We aim to profit from mean reversion by buying markets that we believe are depressed in price and shorting markets that we believe are trading at inflated values. To deal with the uncertainty of timing, we model investor sentiment. Using sentiment helps us avoid buying inexpensive assets too early and closing winning positions too quickly.

Risks: Risks associated with investing in the Trust may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Market Risk - Fixed Income Investments: the market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market's uncertainty about the value of a fixed income investment (or class of fixed income investments); and (3) Credit Risk: the risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner. For a more complete discussion of these and other risks, please consult the Trusts Product Disclosure Statement.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** Net returns are presented after the deduction of management fees and incentive fees if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. IMPORTANT INFORMATION

The Trust accepts investments from wholesale investors only. Retail investors are not able to directly invest in the Trust but may gain exposure to the Trusts by investing with certain investor directed portfolio services, master trusts, wrap accounts or custodians ("services"). GMO Australia Limited, GMO LLC, and their affiliates, do not guarantee the performance of the Trust or the repayment of an investor's capital. This information is of a general nature only and is not advice. It does not take into account the objectives, financial situation or needs of any specific investor. The offer to invest in the Trust for wholesale investors is contained in the current information memorandum. A Product Disclosure Statement ("PDS") is also available solely for use by retail investors gaining exposure to the Trust through a service. A Target Market Determination (TMD) has also been prepared for the Trust. The information memorandum PDS and TMD can be obtained by visiting our website www.gmo.com. Investors should read the information memorandum or PDS, consider their own circumstances, and obtain their own advice before making an investment decision.

Benchmark(s): The Bloomberg AusBond Bank Bill + Index is an internally maintained benchmark computed by GMO, comprised of (i) the Bloomberg AusBond Bank Bill through 29/11/2002, (ii) the Bloomberg AusBond Composite 0+ Yr Index through 29/04/2005, and (iii) the Bloomberg AusBond Bank Bill Index thereafter.

GLOSSARY

Risk Statistics: Risk profile data is net of fees. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio. Drawdown is based on the portfolio's worst performance over the period based on monthly observations.
