

GMO Tax-Managed International Equities Fund

June 30, 2019

FUND OVERVIEW

The GMO Tax-Managed International Equities Fund seeks to deliver high after-tax total return by investing primarily in international equities that GMO believes have positive return potential relative to other securities tied economically to international equity markets.

FUND FACTS

Fund Identifier (Class III):

Ticker: GTMIX
Cusip: 362008 66 6

Inception: 7/29/98

Benchmark: MSCI EAFE Index

Assets: \$47 Million

Portfolio Management:

Simon Harris
Josh White

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: The market price of an equity may decline due to factors affecting the issuer or its industry or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (2) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. (3) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results. For a more complete discussion of these risks and others, please consult the Fund's prospectus.

About GMO:

Founded in 1977, GMO is an independently-owned, global institutional investment manager dedicated to providing our clients with superior investment advice and performance.

INVESTMENT PHILOSOPHY

In the short run, global equity markets exhibit exploitable inefficiencies as a result of irrational investor behavior, the imperfect flow of information, and the participation of non-economic actors. In the long run, however, returns are ultimately driven by economic reality. The difference creates an opportunity for the Global Equity team to focus on valuation in conjunction with less traditional methods to identify mispriced equity securities. Key tenets of the team's systematic quantitative framework include:

INVESTMENT APPROACH

GMO's Tax-Managed International Equities Fund aims to outperform over a full market cycle by identifying mispriced assets (both cheap and expensive) through bottom-up security selection. We seek to add value by looking beyond traditional value metrics to understand a security's intrinsic value, taking into consideration a company's quality and growth prospects, and using alternative indicators of mispricing to gain a differentiated view into company fundamentals, including cross-asset and corporate governance signals. We then build a portfolio seeking to maximize expected alpha subject to investment risk, liquidity, and cost considerations, including transaction costs and taxes. We may aim to generate additional after-tax alpha through tax-loss harvesting, as appropriate. We continually monitor our exposure to styles and risk factors, as well as changing risk conditions in global markets.

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month end, visit www.gmo.com.

Fees (Class III): Gross Expense Ratio 1.33% equal to the Fund's Total Annual Operating Expense set forth in the Fund's most recent prospectus dated June 30, 2019.

Net Expense Ratio 0.79% reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2020. Elimination of this reimbursement will result in higher fees and lower performance.

Benchmark performance is shown for the MSCI EAFE Index before deduction of taxes. The MSCI EAFE (Europe, Australasia, and Far East) Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of international large and mid capitalization stocks. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

After-tax returns available upon request.
