MAJOR PERFORMANCE DRIVERS

- Top-down asset allocation significantly detracted from relative performance, as Value and Small Caps lagged badly in the U.S. and Resource equity also had a difficult quarter.
- Security selection was positive for the quarter. Quality lagged in the U.S., but this was more than offset by good performance in core Developed ex-U.S. and the Resource equity exposure was significantly ahead of the MSCI ACWI Commodity Producers index.

Emerging market equities, with an emphasis on undervalued stocks within attractively valued countries/sectors, represented 13.2% of the total portfolio weight on average during the quarter. Our modest overweight position in Emerging market equities added marginally to relative performance as the MSCI Emerging Market index returned 12.0%, just ahead of the MSCI ACWI return of 11.5%. Security selection was also positive, as the portfolio outperformed with a return of 13.5%. No Emerging Markets names featured in the top five biggest individual contributors to, or detractors from, relative performance at the total portfolio level.

RISKS

Risks associated with investing in the Strategy may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Non-U.S. Investment Risk: the market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Composite Inception Date: 31-Dec-93

Performance Returns: Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. Performance data quoted represents past performance and is not predictive of future performance. Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. Gross returns are presented gross of management fees and any incentive fees if applicable. These returns include transaction costs, commissions, withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. If management and incentive fees were deducted performance would be lower. For example, if, before fees, the strategy were to achieve a 10% annual rate of return above its hurdle rate each year for ten years, and an annual advisory fee of 1% and incentive fee of 20% of net returns above the hurdle rate were charged during that period, the resulting average annual net return (after the deduction of management and incentive fees) would be approximately 7.20%. GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®). A Global Investment Performance Standards (GIPS®). Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.

QUARTERLY INVESTMENT REVIEW

MAJOR PERFORMANCE DRIVERS CONT.

U.S. equities accounted for 40.8% of the total portfolio on average through the quarter, comprising 2.7% in U.S. Small Cap Value equity, 5.0% in U.S. Small Cap Quality equity, 10.0% in broad U.S. equity, 12.9% in U.S. Opportunistic Value equity, and the remainder in the Quality and Resources strategies. This leaves the portfolio 23.1% underweight U.S. equities in total, and this had a small positive impact on relative performance for the quarter as the MSCI USA index returned 11.3%, just trailing MSCI ACWI. Security selection in the U.S. proved challenging as, in aggregate, our U.S. portfolio returned 6.9%. Underweight positions in Apple (Information Technology), Berkshire Hathaway (Financials), and Eli Lily (Health Care) featured in the top five biggest individual contributors to relative performance for the quarter. On the flipside, underweight positions in NVIDIA (Information Technology), Microsoft (Information Technology), Broadcom (Information Technology), and Netflix (Communication Services) featured in the top five biggest individual detractors from relative performance at the total portfolio level.

Developed ex-U.S. equities accounted for an average weight of 44.6% of the portfolio for the quarter, including 24.0% in Developed ex-US, 11.1% in International Opportunistic Value, 6.3% in Japan Fundamental Value, along with some exposure from the Quality and Resources strategies. This overweight position in Developed ex-U.S. had a positive impact on relative performance as the MSCI World ex-U.S. index returned 12.0%, beating MSCI ACWI. Security selection within Developed Markets was broadly flat, as the portfolio returned 12.0% in aggregate. An overweight position in NEC (Japan Information Technology) and Deutsche Bank (Germany Financials) featured in the top five biggest individual contributors, while an overweight position in Sanofi (France Health Care) featured in the top five biggest individual detractors from relative performance for the quarter.

Portfolio weights, as a percent of equity, for the positions mentioned were: Eli Lilly (0.1%), Berkshire Hathaway (0.0%), Broadcom (0.3%), Netflix (0.0%), Apple (1.0%), NEC (0.7%), NVIDIA (0.5%), Deutsche Bank (0.8%), Microsoft (1.3%), and Sanofi (0.8%).

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The Strategy seeks to generate total return greater than that of the MSCI All Country World Index.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over the long term. Using GMO's 7-Year Asset Class Forecasts, the Strategy seeks to allocate to areas of the global equity markets we believe are most attractively valued. Our approach combines the best of GMO's top-down Asset Allocation views and bottom-up equity research to identify mispricings at both the asset class and individual security levels. The Strategy allocates to equity strategies that are actively managed by other GMO investment teams with expertise and experience in security selection within their respective markets.

IMPORTANT INFORMATION

Benchmark(s): The MSCI ACWI ++ Index is an internally maintained benchmark computed by GMO, comprised of (i) GMO blended benchmark of Global All Country Equity Allocation Composite through 06/30/2014 and (ii) MSCI ACWI (All Country World) Index (MSCI Standard Index Series, net of withholding tax) thereafter. The GMO blended benchmark of Global All Country Equity Allocation Composite is comprised of a weighted average of account benchmarks; many of the account benchmarks consist of MSCI ACWI (All Country World Index) (MSCI Standard Index Series, net of withholding tax) or some like proxy for each market exposure they have. For each underlying account benchmark, the weighting of each market index will vary slightly. The index is internally blended by GMO and maintained on a monthly basis. The MSCI ACWI (All Country World) Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of global developed and emerging markets. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.
