	Composite Gross of Fees	Composite Net of Fees	Benchmark	Composite	Benchmark				
2023 (from 28/2)	-12.09	-12.75	3.20	N/A	N/A	<=5	N/A	139.13	58,198.96

## RETURN ANALYSIS BASED ON MOVING PERIODS\* (\*annualized returns above one year)

## DISCLOSURES

The firm is defined as Grantham, Mayo, Van Otterloo & Co. LLC ("GMO"), an independent investment adviser registered under the Investment Advisers Act of 1940. Beginning January 1, 2012, the firm was expanded to include GMO UK Limited and GMO Australia Limited. Prior to January 1, 2012, GMO UK Limited and GMO Australia Limited were separate firms for GIPS compliance purposes.

Grantham, Mayo, Van Otterloo & Co. LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Grantham, Mayo, Van Otterloo & Co. LLC has been independently verified for the periods 31/12/1992 - 31/12/2023. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

GMO's policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. A complete list of composite and limited distribution pooled fund descriptions and list of broad distribution pooled funds is also available upon request.

## DISCLOSURES

As of 6/30/2024, the standard management fee schedule for the mutual fund in the composite is 80bps on all assets. The mutual fund's annual total expense ratio for share class I is 105bps, including fees for shareholder services and operating expenses. Other share classes may feature higher or lower fees. The standard SMA fee schedule for an account in the composite is 105bps on the first \$50M USD, 100bps on the next \$50M, 95bps on the next \$100M, and 85bps thereafter. Some accounts in the composite may have fees that differ from the standard fee schedule and may or may not have performance fees. Please refer to fund documents for additional information.

The Resource Transition Composite includes portfolios seeking to deliver total return by investing in equities of companies in the resource transition sector. The strategy's benchmark is the MSCI All Country World Commodity Producer ex Energy Index. Given global population growth, the industrialization of emerging countries, and the clean energy transition, GMO believes that global demand for many natural resources will increase and, coupled with the limited supply of these resources, favors an upward trend in resource prices over time. The strategy seeks to invest in the securities of companies that we believe will benefit from this expected long-term rise in natural resource prices and typically seeks to avoid investing in integrated oil or oil and gas exploration and production industries. These industries are not considered to be part of the "resource transition sector". The composite was created in February 2023.

The strategy is not limited in its use of derivatives; however the impact is typically immaterial. Both the use of derivatives and borrowing may cause a portfolio's gross investment exposure to be in excess of its net assets (i.e., leverage), which may subject a portfolio to a heightened risk of loss. During the period presented the strategy typically used none.

The internal dispersion of annual gross returns is measured by the equal-weighted standard deviation of account gross returns represented within the composite for the full year. For periods with five or fewer accounts included in the composite for the entire year, 'N/A' is noted as the dispersion is not considered meaningful. The three-year annualized standard deviation measures the variability of the gross composite and benchmark returns over the preceding 36-month period. For periods without 36 months of composite performance history, 'N/A' is provided for both the composite and its benchmark.

Performance results are presented both gross and net of investment advisory fees. The composite results are time-weighted rates of return net of commissions, transaction costs and withholding taxes on foreign income and capital gains. Returns for mutual funds included in the Composite include securities lending income, if applicable. Valuations and returns are calculated and expressed in U.S. dollars. All composite returns reflect the reinvestment of dividends and other earnings. Gross returns do not reflect the deduction of investment advisory fees or any other expenses that may be incurred in the management of this account. However, to the extent the composite includes private funds, the gross returns presented are net of any private fund operating expenses. Effective January 1, 2014 net composite returns are calculated using a model advisory fee by applying the current highest fee to the composite's gross-of-fee returns on a monthly basis. Prior to January 1, 2014 net returns were calculated by applying the account's actual fee schedule in effect for the respective period on a monthly basis for each account in the composite. Actual fees paid by any individual investor may be higher or lower than model advisory fees.

Past performance is not an indicator of future results.

The MSCI ACWI (All Country World) Commodity Producers ex-Energy Index is an independently maintained benchmark comprised of listed large and mid capitalization commodity producers within the global developed and emerging markets, excluding companies in the energy sector as defined by GICS. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.
