

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

GMO Equity Market Neutral Investment Fund Class A CAD (ISIN: IE00BF199145) a sub-fund of GMO Investments ICAV

Objectives and Investment Policy

The fund's investment objective is to seek high total return.

The fund invests primarily by taking long and short positions in equities (shares) in markets throughout the world, and the fund seeks to be near neutral in respect of its exposure to global equity markets. A long position will increase in value if the price of the underlying asset goes up; a short position will increase in value if the price of the underlying asset goes down; and vice versa.

The fund may invest in equities and related securities, money market instruments, currencies and related derivatives. The fund may also invest in other investment funds to pursue the investment objective of this fund.

The fund seeks annualised (average annual) excess returns of 4-6% (gross of fees) above its benchmark and annualised volatility (a variation from the average price) of approximately 6-10%, each over a complete market cycle. The above are targets or expectations and not forecasts and there can be no guarantee or assurance that the fund will achieve a return which meets or exceeds any change in the benchmark or that the fund will be subject to the levels of volatility referred to. The fund does not seek to track its benchmark and so has discretion as to the investments it may make.

The fund selects assets based on an analysis of companies' published financial information and corporate behaviour, securities' prices, equity and other securities markets, the overall global economy, and governmental policies. The factors considered and models used by the investment adviser may change over time.

The fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used for investment purposes and for the reduction of risk and cost and the generation of additional capital or income.

For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the fund's prospectus available at www.gmo.com.

You may sell your shares usually on each business day (generally, a day on which banks in Dublin and London and New York and the New York Stock Exchange are open) by sending your request to GMO UK Limited before 2.00 pm (Irish time) on the preceding business day.

Income is reinvested into the fund.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within the short term.

Risk and Reward Profile

Lower risk Higher risk

The risk category is based on simulated and historical data and may not be a reliable indicator of the future risk profile of the fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment – the risk of losing your money may be small, but the chance of making gains is also limited.

The fund is in category 4 because it invests in a wider range of assets worldwide and so historically there has been a greater fluctuation in the price of the shares of the fund than other funds (such as money market funds).

Risks materially relevant to the fund which may not be adequately captured by the indicator:

The fund may not achieve its investment objective and the value of shares in the fund may fall. The market price of a security may decline due to factors affecting the issuer, its industry or the economy and markets generally.

The market value of a share may decline for reasons directly related to the issuing company, such as management performance, borrowing levels and reduced demand for its goods or services.

Fluctuations in exchange rates can adversely affect the market value of the investments of the fund.

The use of derivatives involves the risk that their value may not move as expected relative to the value of the relevant underlying assets, rates or indices. Derivatives also present other risks, including market risk, liquidity risk, currency risk and counterparty risk. The risk of loss resulting from the use of derivatives is potentially unlimited. Derivatives markets are highly volatile.

See also the description of the risks applicable to the fund in the section titled "Risk Factors" in the fund's prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		A switching charge of up to 2% may be payable for switching shares. The ongoing charges figure is an estimate based on the expected total of charges. This figure may vary from year to year and excludes portfolio transaction costs incurred when we buy or sell assets for the fund except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking. For more information about charges, please see “Fees and Expenses” in the fund’s prospectus.
Entry Charge	0%	
Exit Charge	0%	
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.		
Charges taken from the fund over a year		
Ongoing charges	1.12%	
Charges taken from the fund under certain specific conditions		
Performance fee	None.	

Past Performance	
There is insufficient data to produce a useful indication of past performance for the share class.	<p>Past performance is not a reliable guide to future performance.</p> <p>The fund has not yet issued shares.</p> <p>Past performance will be calculated in CAD.</p>
