

GMO INTERNATIONAL VALUE ETF

INVESTMENT OBJECTIVE

To generate total return by investing primarily in international equities

WHY GMO VALUE

- Top-down perspective applied to find mispriced equity groups
- GMO models build more realistic company valuations than reported book value
- Quality and growth prospects inform a unique projection for each company

WHY NOW? NON-U.S. DEEP VALUE IS RELATIVELY CHEAP

As of 9/30/2024 | Source: GMO | Stock valuations are calculated on a blend of Price/Sales, Price/Gross Profit, Price/Book, and Price/Economic Book. U.S. and MSCI World ex-U.S. valuation groups are based on the top 1,000 U.S. stocks by market capitalization and the constituents of the MSCI World ex-U.S. Index, respectively, each excluding the smallest names per the Asset Allocation team's investable universe thresholds. All groups have the same country exposure as the universe. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. Please visit <https://www.gmo.com/americas/benchmark-disclaimers/> to review the complete benchmark disclaimer notice.

ABOUT GMO

Founded in 1977, GMO is a global investment manager committed to delivering superior long-term performance and advice to our clients. Offering multi-asset class, equity, fixed income, and alternative strategies, our specialized teams believe that a long-term, valuation-based approach will maximize risk-adjusted returns. We are known for our willingness to boldly challenge the status quo and our creative approach to solving investment challenges.

An investor should carefully consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus or summary prospectus carefully before investing.

Risks associated with investing in the Fund may include: (1) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (2) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. (3) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. For a more complete discussion of these risks and others, please consult the Fund's Prospectus. The GMO ETF's are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.
