KWH GMO POWER INFRASTRUCTURE ETF

OVERVIEW

- To generate total return

WHY INVEST IN POWER INFRASTRUCTURE

- **High Growth:** Global electricity demand is surging from datacenters, electrification, and emerging market growth. This is colliding with aging infrastructure and constrained supply. Electricity prices are being driven higher, clear evidence of structural, visible, and significant growth.
- **Diversification:** This structural growth will be largely independent of short-term economic cycles.
- **Inflation Protection:** Because of direct investments in materials, infrastructure, and energy, we believe the portfolio should perform well in certain inflationary environments.
- **An Inefficient Opportunity Set:** In growth environments, some assets tend to be overlooked while other assets are bid up in a speculative frenzy.

THE GMO SOLUTION

We believe our approach to be differentiated across several dimensions:

TARGETED UNIVERSE DEFINITION | We focus on identifying companies whose profitability is directly tied to the electrification and power generation value chain, an area we believe will experience strong secular growth over the coming decades.

ACTIVE MANAGEMENT | We scour the global universe for attractively priced companies without regard to arbitrary benchmarks.

EXPERIENCED TEAM | GMO has a broad team of talented, experienced investment professionals. We have been investing in energy markets for decades.

ABOUT GMO

Founded in 1977, GMO is a global investment manager committed to delivering superior long-term performance and advice to our clients. Offering multi-asset class, equity, fixed income, and alternative strategies, our specialized teams believe that a long-term, valuation-based approach will maximize risk-adjusted returns. We are known for our willingness to boldly challenge the status quo and our creative approach to solving investment challenges.

- Joined GMO in 2006
- 28 yrs industry experience
- BA from Duke University

Tom Hancock
- Joined GMO in 1995
- 30 yrs industry experience
- Ph.D. from Harvard University

An investor should carefully consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus or summary prospectus carefully before investing.

Risks associated with investing in the Fund may include: (1) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers; (2) Commodities Risk: commodity prices can be extremely volatile, and exposure to commodities can cause the value of the Fund's shares to decline or fluctuate more than if the Fund had a broader range of investments; and (3). Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these risks and others, please consult the Fund's Prospectus. The GMO ETF's are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.
