GMO BEYOND CHINA ETF

INVESTMENT OBJECTIVE

- To generate total return by targeting emerging countries, sectors, and companies which are poised to benefit from the expected trend of supply chain diversification out of China.
- Take advantage of a sharpening focus on supply chain diversification that is being driven by a combination of increasing labor costs in China, improved capacity for export growth in other emerging markets, and heightened geopolitical tensions.

WHY GMO BEYOND CHINA

- Over 30 years of experience in top-down country and sector allocation to emerging markets
- Strong understanding of local economic forces within emerging market countries
- Blend of quantitative and fundamental insights in countries, sectors and companies around the theme of Beyond China

An investor should carefully consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Risks associated with investing in the Fund may include: (1) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (2) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. (3) Currency Risk: Fluctuations in exchange rates can adversely affect the market value of the Fund's non-U.S. currency holdings and investments denominated in non-U.S. currencies. For a more complete discussion of these risks and others, please consult the Fund's Prospectus. The GMO ETFs are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.

OVERVIEW

The GMO Beyond China ETF seeks to deliver total return by investing primarily in equities of companies GMO believes are positioned to benefit, directly or indirectly, from the expected trend of companies diversifying their supply chains. We believe this secular trend is an attractive investment opportunity driven by a combination of increasing labor costs in China, increasing geopolitical tensions, and increasing focus on supply chain diversification.

The GMO Beyond China ETF will primarily invest in emerging market equities with the exception of Chinese securities. GMO uses a combination of proprietary quantitative and fundamental investment methods to identify emerging market equities that are well positioned to benefit from the expected trend of nearshoring. In addition, GMO will use investment methods that focus on growth, quality, valuation, and other drivers of fundamentals to further identify attractive securities.
