

CLIMATE CHANGE PROFILE

INVESTMENT OPPORTUNITY

- We believe climate change is among the most important investment issues facing investors today. Exceptional opportunities for long-term investors abound in a world mobilizing to address climate change.
- Profitability associated with efforts to mitigate and adapt to climate change is largely independent of the global economy. Climate change investors benefit from this unique source of return which complements a traditional portfolio.
- The climate change sector, as we've defined it, remains a poorly understood, inefficiently priced sector. There are ample opportunities for value added through active management, a global approach, and a value discipline.

GMO APPROACH

Universe Targeted for Impact:	We focus on identifying business models that can monetize the secular growth from global efforts to combat climate change.
Value Focus:	We believe that a value discipline is particularly important in this space. We combine GMO's proprietary valuation techniques with fundamental analysis to identify attractive opportunities.
Strategic Allocation:	Our strategic asset allocation promotes diversification among a variety of climate change sectors.
Global Scope & GMO Investment Platform:	GMO has the global expertise to take advantage of attractive investment opportunities wherever they may be. We have a broad team of experienced investment professionals, including Jeremy Grantham, who contribute insight, ideas, and perspectives.
Investing with Conviction:	As an independently owned private partnership, GMO's firmwide philosophy of investing with conviction over the long term is consistent with success in the climate change sector.
ESG:	Environmental, Social, and Governance (ESG) factors are integrated holistically into our investment process.

CLIMATE CHANGE

OVERVIEW

The Trust seeks to generate high total return by investing primarily in equities of companies GMO believes are positioned to benefit, directly or indirectly, from efforts to curb or mitigate the long-term effects of global climate change, to address the environmental challenges presented by global climate change, or to help the world adapt to climate change through improved efficiency of resource consumption. We invest globally across the capitalization spectrum, which allows us to identify attractive investment opportunities wherever they may be.

We are seeing exceptional opportunities for long-term investors abound in a world mobilizing to address climate change, and profitability associated with efforts to mitigate and adapt to climate change is largely independent of the global economy. Climate change investors can benefit from this, diversifying source of return, historically available at attractive valuations given the secular tailwinds of change.

Risks: Risks associated with investing in the Trust may include: (1) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers; (2) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; and (3) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. For a more complete discussion of these and other risks, please consult the Trusts Product Disclosure Statement.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** Net returns are presented after the deduction of management fees and incentive fees if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. The GMO Climate Change Trust ARSN 696 030 896 ("the Trust") is issued by GMO Australia Limited ABN 30 071 502 639, AFS Licence No. 236 656. The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee. Buy/Sell Spread: Entry/ Exit Transaction Cost Allowance. Distribution Frequency: Distributions are assessed on a quarterly basis. Management Fees: Inclusive of GST and net of any applicable Input Tax Credits and/or Reduced Input Tax Credits.

GLOSSARY

Country Exposures: This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide.

Risk Statistics: Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.

ZENITH INVESTMENT RATING

The Zenith Investment Partners (ABN 27 103 132 672, AFS Licence 226872) ("Zenith") rating (GMO1979AU assigned 11/2023) referred to in this piece is limited to "General Advice" (s766B Corporations Act 2001) for Wholesale clients only. This advice has been prepared without taking into account the objectives, financial situation or needs of any individual, including target markets of financial products, where applicable, and is subject to change at any time without prior notice. It is not a specific recommendation to purchase, sell or hold the relevant product(s). Investors should seek independent financial advice before making an investment decision and should consider the appropriateness of this advice in light of their own objectives, financial situation and needs. Investors should obtain a copy of, and consider the PDS or offer document before making any decision and refer to the full Zenith Product Assessment available on the Zenith website.
