What is this product?

Type GMO Funds plc (the "Company") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

GMO Quality Investment Fund (the "Fund") aims to achieve positive returns. The Fund invests primarily in shares and related securities of companies anywhere in the world which the investment manager believes to be of high quality. In assessing a company's quality, the investment manager may consider several factors, including in particular, high profitability, stable profitability and low leverage. The Fund may make tactical allocations of up to 20% of the Fund's net asset value to investments in cash and debt securities rated at least investment grade by a rating agency or rated lower or unrated but deemed by the investment manager to be of at least investment grade. Such debt securities may be government or corporate securities and may be fixed or floating rate. The Fund may also invest in other investment funds to pursue the investment objective of the Fund. The Fund is actively managed and does not manage the Fund to, or control the Fund's risk relative to, any securities index or securities benchmark. The Fund uses the S&P 500 Index, MSCI ACWI and the MSCI World Index for performance comparison purposes only (together, the "Comparator Indices"). Although the Fund's securities may be components of the Comparator Indices, the Fund's investment manager may or may not invest in securities not included in the Comparator Indices. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used for the reduction of risk and cost and the generation of additional capital or income. You may sell your shares usually on each business day (generally a day on which banks in Dublin and London and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. This document describes a sub-fund of the Company. The prospectus and periodic reports are prepared in respect of the entire Company. The assets and liabilities of each sub-fund of the Company are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Company may apply to exchange shares in the Company for shares in another sub-fund of the Company as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a 5 to 10 year period with a moderate level of volatility.

What are the risks and what could I get in return?

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency to the base currency of the fund, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

The figures shown include all the costs of the fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 53	EUR 419
Annual cost impact (*)	0.5%	0.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 16.07% before costs and 15.54% after costs.
