GMO SYSTEMATIC GLOBAL MACRO TRUST

Information Memorandum for WHOLESALe INVESTORS dated: **20 March 2025**

GMO Australia Limited (ABN 30 071 502 639, AFSL 236 656) is the issuer of this Information Memorandum and solely responsible for its contents. This is not a Product Disclosure Statement. The units offered under this Information Memorandum are available only to investors who are wholesale clients within the meaning of section 761G of the Corporations Act, and who satisfy the other criteria set out in this document. The minimum initial investment in the Trust is \$500,000. GMO Australia Limited is the responsible entity of GMO Systematic Global Macro Trust.

GMO Systematic Global Macro Trust is a managed investment scheme registered with the Australian Securities and Investments Commission (Australian Registered Scheme Number 090 799 385, Australian Business Number 38 976 397 475, the "Trust"). Class A and Class B units are offered under this Information Memorandum. Class A units in GMO Systematic Global Macro Trust are available only to GMO, its related parties, their respective officers and employees and funds, trusts or other accounts operated by GMO and its related parties (together, the "GMO Parties"). These units are not currently offered to other new investors but are covered by this Information Memorandum for the GMO Parties and existing holders of those units.

You should read this Information Memorandum carefully, as it contains important information. GMO Australia strongly recommends that you obtain independent professional advice before you enter into this investment. GMO Australia reminds you that this Information Memorandum does not constitute financial product, legal or tax advice.

Any queries regarding the information contained in this Information Memorandum should be directed to the GMO Client Service team at +61 2 8274 9900 during Sydney business hours.

From time to time, GMO Australia may publish additional information about the Trust in a Statement of Additional Information ("SAI"). The SAI is available at: <https://www.gmo.com/globalassets/documents---manually-loaded/documents/sai/gmo-australia-sai.pdf> The SAI is incorporated into this Information Memorandum by reference. You should read the SAI before making an investment decision.

Certain information in this Information Memorandum, together with any other information that may be furnished to prospective investors by the Trust, GMO, GMO Australia or any of their affiliates may contain forward-looking statements. Forward-looking statements are those that predict or describe future events or trends and that do not relate solely to historical matters. For example, forward-looking statements may predict future economic performance, describe plans and objectives of management for future operations or make projections of revenue, investment returns or other financial items. A prospective investor can generally identify forward-looking statements as statements containing the words "may," "should," "will," "believe," "expect," "anticipate," "intend," "contemplate," "estimate," "project," "assume" or other similar expressions. Such forward-looking statements are inherently uncertain because the matters they describe are subject to known (and unknown) risks, uncertainties and other unpredictable factors, many of which are beyond a Trust's control. Due to various risks and uncertainties, including those set forth in "3. Risks of managed investment schemes", actual events or results or the actual performance of a Trust may differ materially from those reflected or contemplated in such forward-looking statements. No representations or warranties are made as to the accuracy of such forward-looking statements.

1. About GMO

Overview

GMO Australia Limited ("GMO Australia") is the responsible entity of the Trust. As responsible entity, GMO Australia is responsible for overseeing the operations of the Trust.

GMO Australia is wholly owned by GMO Australasia LLC, which in turn is wholly owned by Grantham, Mayo, Van Otterloo & Co. LLC ("GMO").

GMO, founded in 1977, is a privately held global investment management firm committed to providing sophisticated clients with superior asset management solutions and services. GMO offers a broad range of investment products, including equity and fixed income strategies across global developed and emerging markets, as well as absolute return strategies. GMO's global offices include the firm's headquarters in Boston and offices in London, Amsterdam, Singapore and Sydney. GMO manages over A\$104 billion globally (as at 31 December 2024).

GMO Australia was established in 1995 and manages systematic global macro products, contributes to the group's research capability and provides access to GMO's global product range to local clients.

Objective

GMO is a global investment management firm committed to providing sophisticated clients with superior asset management solutions and services. GMO's goal is to help its clients to meet their investment objectives and achieve superior overall returns. This involves devoting considerable resources to understanding and often proposing solutions on the broad investment and financial policy issues that its clients regularly confront.

Investment Philosophy

The overall philosophy that underlies GMO's investment products is that securities and markets on occasion become mispriced. All of the investment processes used by GMO are aimed at adding value by first identifying these mispricing opportunities and then exploiting them in a systematic and disciplined way.

A contrarian value investment approach is the primary theme utilised within GMO to identify and exploit these opportunities. The rationale behind this approach is that economic reality and investor behaviour cause securities and markets to overshoot their fair value. Economic reality is driven by regression, i.e., prior strong trends in fundamentals will weaken and prior weak trends will strengthen. Additionally, investor sentiment overrides fundamentals resulting in some securities becoming "cheap" because they are currently out-of-favour, while others become "expensive" because they are popular and in demand. Our techniques are designed to identify when these mis-pricings occur and then tilt our portfolios towards the "cheap" securities and away from the "expensive" securities.

Investment Managers

GMO Australia acts as investment manager of GMO Systematic Global Macro Trust and has delegated some investment management functions in respect of these funds to GMO. GMO is located at 53 State Street, 33rd Floor, Boston, Massachusetts 02109, USA.

You should consider the likely investment return, the risk and your investment time frame when choosing whether or not to invest in the Trust.

2. The Trust

GMO Systematic Global Macro Trust

Description of the Trust

The Trust is designed for experienced investors who are looking for a fund that aims to provide capital growth to be used as a part of a diversified portfolio where the investor has a medium to long term investment timeframe and a high to very high risk/return profile.

GMO Australia has prepared a Target Market Determination ("TMD") in accordance with the product design and distribution obligations of the Corporations Act. The TMD sets out the class of consumers for whom the Trust, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. A copy of the TMD is available free of charge at www.gmo.com or by contacting GMO Australia (by email to sydcst@gmo.com).

Investment Objective

The Trust's investment objective is long-term total return. GMO Australia aims to produce a portfolio that seeks to outperform the Bloomberg Ausbond Bank Bill Index.

Investment Strategy

The Trust plans to pursue its investment objective by taking long and short positions in a range of global equity, bond, commodity and currency markets using exchange traded and over-the-counter ("OTC") derivatives, including futures, forward currency contracts, swaps and index options. The Trust may also make direct investments including in equities and bonds. Investments held by the Trust are global in nature and may be denominated in a number of currencies.

The Trust seeks to take advantage of GMO Australia's proprietary investment models for systematic global tactical asset allocation and equity, bond, currency and commodity market selection. The systematic investment process GMO Australia uses is based on the following strategies:

Value-Based Strategies: Value factors compare the price of an asset class or market to the value of a company's assets less its liabilities. Generally, value-based strategies use yield and mean reversion analysis.

Sentiment-Based Strategies: Generally, sentiment-based strategies assess price-based momentum factors and non-price based factors such as economic trends, fundamental trends and investor positioning.

The portfolio is constructed through a proprietary optimisation process that seeks to maximise expected returns while controlling for risk. The portfolio construction process attempts to manage risk through various processes including:

- Diversification across a broad investment universe;

- Taking positions that reflect GMO Australia's view of the opportunity to add value and where we believe we have skill; and
- Monitoring market conditions.

In implementing the Trust's investment strategy, GMO Australia seeks to take positions for the Trust that, in GMO Australia's view, are proportionate to return opportunities. As a result, during periods when GMO Australia believes return opportunities are high relative to the risks involved, the Trust typically will be exposed to more risks than it would be during periods when GMO Australia believes the return opportunities are low relative to the risks involved.

GMO Australia may at any time discontinue investment strategies, add new investment strategies or cause the Trust to take positions that deviate from GMO Australia's investment models as a result of additional research, changing market conditions, or other factors. The factors that GMO Australia considers and the investment methods that GMO Australia uses can change over time.

Authorised Investments and Asset Allocation

The Trust's constitution authorises GMO Australia to invest in a wide range of investments.

The Trust typically invests in cash, cash equivalents and fixed income securities with a maturity of two years or less and then uses derivatives to gain active exposure to markets.

The Trust will typically obtain active exposure to the equity, fixed interest, currency and commodity markets through the use of exchange traded futures, forward foreign exchange contracts, swaps, options and other derivatives. The Trust may also hold equities, exchange traded funds ("ETFs") and other funds.

The Trust generally expects to apply the following ranges to active exposures in the management of its portfolio:

- (i) exposure (as determined by GMO Australia) to a single asset class (e.g., shares, bonds, commodities) will be between -150% and +150% of the Trust's net asset value;
- (ii) exposure (as determined by GMO Australia) to a single asset other than Volatility Index ("VIX") futures (e.g., any single futures contract) will be between -50% and +50% of the Trust's net asset value; and
- (iii) exposure (as determined by GMO Australia) to VIX futures will be between -10% and +20% of the Trust's net asset value.

The Trust will generally be managed within these ranges, although the Trust may be outside of these ranges for short periods of time. These ranges do not

apply to the Trust's investments in cash, cash equivalents and fixed income securities.

These ranges have been formulated with the aim of limiting the absolute risk of the Trust while providing enough scope for the Trust to meet its targeted return and risk objectives.

Leverage

The Trust may use a high degree of leverage (with commensurate high risk) as part of its investment strategy.

Leverage tends to amplify risks and also entails special additional risks (see section 3: Risks of managed investment schemes – Leveraging Risk). Except for margin and other regulatory requirements, there are generally no limitations on the Trust's net long or short positions or the Trust's use of leverage. It is possible that the investments underlying the Trust's short positions will outperform the investments underlying the Trust's long positions.

The Trust expects that the typical maximum gross leverage it will employ, calculated as the gross aggregate amount of its long and short positions, will be five (5) times the net asset value of the Trust (e.g., for every \$1 of the Trust's net asset value the Trust may be leveraged to \$5). However, this is an indicative level only, and the level of leverage that the Trust may employ may vary significantly.

If the Trust is leveraged from \$1 to \$5, a loss of 20% would be sufficient to reduce the \$1 investment to zero.

Minimum suggested investment time frame

5 years

Risk level

The Trust has a high to very high risk/return profile.

Labour standards, environmental, social and ethical considerations

GMO believes that Environmental, Social and Governance ("ESG") factors can have a meaningful impact on the long-term success of companies and countries. GMO considers ESG criteria as part of its investment process to the extent such criteria are determined by GMO to have a financial impact on investments and may contribute to the risk-adjusted returns of the Trust.

GMO has no pre-determined view on what constitutes each of these ESG criteria – given the instruments held by the Trust, there are limited opportunities for GMO to take labour standards or environmental, social, or ethical considerations into account when making investment decisions.

There is no prescribed definition of each of these factors or particular exclusion list or industry screen.

There is no prescribed weight given to ESG criteria, overall or individually – the weights that are ascribed for a particular

investment decision are dependent upon GMO's assessment of their materiality and relevance to that investment decision.

GMO does not employ a particular methodology or timeframe to monitor and review these considerations – the frequency and method of reviews is determined on a case-by-case basis.

Further detail on how GMO integrates ESG considerations in its investment approaches is available in GMO's annual Sustainability and Responsible Investing Report (see <https://www.gmo.com/australia/esg-investing/>).

As a signatory to the UN-sponsored Principles for Responsible Investment ("PRI"), we complete the PRI reporting process on an annual basis and our PRI Transparency and Assessment Reports are available upon request.

Changes to Trust details

GMO Australia may change the investment objective, investment strategy, authorised investments and asset allocation and the other investment information in relation to the Trust at any time. We will notify you about any material changes in accordance with the requirements under the Corporations Act. This may be after the change has occurred.

3. Risks of managed investment schemes

All investments carry risk. Different investment strategies may carry different levels of risk, depending on the assets that make up the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk.

There is no guarantee that the Trust will achieve its investment objectives. The value of the investments of the Trust will vary over time as will the level of returns of the Trust. Future returns may differ from past returns. Returns are not guaranteed and investors may lose some of their money. In addition, laws affecting registered managed investment schemes may change in the future and this may impact the Trust's ability to achieve its investment objectives.

Your investment in the Trust can be subject to investment risk, including possible delays in repayment and loss of income or principal invested. Your investment in the Trust is not a deposit or liability of GMO or GMO Australia or any of their affiliates and none of these entities stands behind or in any way guarantees the capital value and/or performance of units issued or the assets of the Trust.

This section identifies some of the significant risks of the Trust. Other risks also apply (including those detailed in the SAI).

Market Risk – Equity Securities: The market price of an equity may decline due to factors affecting the issuer, its industry, or the economy and equity markets generally. If the Trust purchases an equity for less than its fundamental fair (or intrinsic) value as assessed by GMO, the Trust runs the risk that the market prices of these equities will not appreciate or will decline (for example, if GMO's assessment proves to be incorrect or the market fails to recognize the equity's intrinsic value). The Trust also may purchase equities that typically trade at higher multiples of current earnings than other securities, and the market prices of these equities often are more sensitive to changes in future earnings expectations than the market price of equities trading at lower multiples. Declines in stock market prices generally are likely to reduce the net asset value of the Trust's units.

Market Risk – Fixed Income: The market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads, or decreased liquidity stemming from the market's uncertainty about the value of a fixed income investment (or class of fixed income investments).

Credit Risk: This is the risk that the issuer or guarantor of a fixed income investment (including a sovereign or quasi-sovereign debt issuer) or obligors of obligations underlying an asset-backed security will be unable or unwilling to satisfy their obligations to pay principal and interest or otherwise to honour their obligations in a timely manner. The market price of a fixed income investment will normally decline as a result of the issuer's, guarantor's, or obligors' failure to meet their payment obligations. Below investment grade investments have speculative characteristics, and negative changes in economic conditions or other circumstances are more likely to

impair the ability of issuers of those investments to make principal and interest payments than is the case with issuers of investment grade investments. Credit risk arises from cash and cash equivalents held by the Trust with financial institutions. Credit risk also arises from the ability or willingness of underlying funds in which the Trust may invest to realise investments to meet redemptions made by the Trust. The Trust may also be indirectly exposed to the credit risk faced by such underlying funds.

Commodities Risk: Commodities prices can be extremely volatile and exposure to commodities can cause the price of the Trust's units to decline and fluctuate significantly in a rapid and unpredictable manner.

Currency Risk: Fluctuations in exchange rates may adversely affect the market value of the Trust's investments and includes the risk that currencies in which the Trust's investments are traded, in which the Trust receives income and/or in which the Trust has taken on an active investment position will decline in value relative to other currencies, in the case of long positions, or increases in value relative to other currencies in the case of short positions, in each case resulting in a loss to the Trust.

Derivatives and Short Sales Risk: The use of derivatives involves the risk that their value may not change as expected relative to changes in the value of the relevant underlying assets, pool of assets, rates, currencies or indices. Derivatives also present other risks, including market risk, illiquidity risk, currency risk and counterparty risk. The market price of an option is affected by many factors, including changes in the market prices or dividend rates of underlying securities (or in the case of indices, the securities in such indices); the time remaining before expiration; changes in interest rates or exchange rates and changes in the actual or perceived volatility of the relevant underlying index or securities. The Trust may create short investment exposure by selling securities short or by taking a derivative position in which the value of the derivative moves in the opposite direction from the price of an underlying asset, pool of assets, rate, currency, or index. In addition, the risks of loss associated with derivatives that provide short investment exposure and short sales of securities are theoretically unlimited.

Foreign Investment Risk: The market prices of many foreign investments (particularly in emerging markets) may fluctuate more than those of Australian investments. Many foreign investment markets may be less stable, smaller, less liquid and less regulated than Australian investment markets, and the cost of trading in those markets often is higher than in Australian markets. In addition, issuers of foreign securities (particularly those tied economically to emerging countries) often are not subject to as much regulation as Australian issuers, and the reporting, recordkeeping, accounting, custody, and auditing standards to which those issuers are

subject often are not as rigorous as Australian standards. In addition, the Trust may be subject to foreign taxes, potentially on a retroactive basis, on (i) capital gains it realises or dividends, interest or other amounts it realises or accrues in respect of foreign investments, (ii) transactions in those investments and (iii) repatriation of proceeds generated from the sale or other disposition of those investments. Any taxes or other charges paid or incurred by the Trust in respect of its foreign investments will reduce its return thereon. The tax laws of some foreign jurisdictions in which the Trust may invest are unclear and interpretations of such laws can change over time, including on a retroactive basis. The Trust may accrue for certain taxes in respect of its foreign investments that it may or may not ultimately pay. Such tax accruals will reduce the Trust's net asset value at the time accrued, even though in some cases, the Trust ultimately may not pay the related tax liabilities. Conversely, the Trust's net asset value will be increased by any tax accruals that are ultimately reversed.

Taxes on non-Australian interest and dividend income are generally withheld in accordance with the applicable country's tax treaty with Australia. Provisions in or official interpretations of the tax treaties with such foreign jurisdictions may change over time and such changes could impact the Trust's eligibility for treaty benefits, if any. The foreign withholding rates applicable to the Trust's investments in certain jurisdictions may be higher if (among other factors) a significant portion of the Trust is held by non-Australian unit holders.

In some cases, the Trust may seek a refund in respect of taxes paid to a non-Australian country, but the Trust runs the risk that its efforts will not be successful, resulting in additional expenses with no corresponding benefits. In addition, the Trust runs the risk that its pursuit of a tax refund may subject it to administrative and judicial proceedings in the country where it is seeking the refund. The responsible entity's decision to seek a refund on behalf of the Trust is in its sole discretion, and particularly in light of the cost involved, it may decide that the Trust should not seek a refund, even if the Trust is entitled to one. The process of seeking a refund may take years, and the outcome of the effort to obtain a refund for the Trust is inherently uncertain. Accordingly, a refund (less related estimated or actual tax liabilities, if applicable) is not typically reflected in the Trust's net asset value until the responsible entity believes that the refund is collectible and free from significant contingencies. In some cases, the amount of such refunds could be material to the Trust's net asset value. If a unit holder redeems units of the Trust before a refund (as finally determined) is reflected in the Trust's net asset value, the unit holder will not realize the benefit of that refund.

Also, the responsible entity of the Trust needs a licence to invest directly in securities traded in many foreign securities markets, and the Trust is subject to the risk that such licence held on its behalf is terminated or suspended. In some foreign securities markets, prevailing custody and trade settlement practices (e.g., the requirement to pay for securities prior to receipt) expose the Trust to credit and other risks with respect to participating brokers, custodians, clearing banks or other clearing agents, escrow agents and issuers. Further, adverse changes in investment regulations, capital requirements or

exchange controls could adversely affect the value of the Trust's investments.

These and other risks (e.g., nationalisation, expropriation, or other confiscation of assets of foreign issuers, difficulties enforcing legal judgments or contractual rights and geopolitical risks) tend to be higher for investments in the securities of companies tied economically to emerging markets, the economies of which often depend predominantly on only a few industries or commodities. The economies of emerging countries often are more volatile than the economies of developed markets.

Illiquidity Risk: Low trading volume, lack of a market maker, large position size, or legal or contractual restrictions (including daily price fluctuation limits or "circuit breakers") may limit, delay or prevent the Trust or an underlying fund from selling particular securities or closing derivative positions at desirable prices at a particular time or at all. In addition, the Trust may buy securities that are less liquid than those in its benchmark.

Focused Investment Risk: Investments in countries, regions, asset classes, sectors, industries, currencies or issuers that are subject to the same or similar risk factors or investments whose market prices are closely correlated are subject to higher overall risk than investments that are more diversified or whose market prices are not as closely correlated.

Leveraging Risk: The Trust's use of short sales, reverse repurchase agreements and other derivatives and securities lending may cause its portfolio to be leveraged. Leverage increases the Trust's portfolio losses when the value of its investments decline.

Counterparty Risk: The Trust runs the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honour its obligations. The credit risk for exchange-traded derivatives is generally less than for OTC derivatives, since the clearinghouse, which is the issuer or counterparty to each exchange-traded derivative, provides additional protections in the event of non-performance by the counterparty. Sometimes the Trust may post or receive collateral related to changes in the market value of a derivative. In addition, the Trust may invest in derivatives that (i) do not require the counterparty to post collateral, (ii) require collateral but that do not provide for the Trust's security interest to be perfected, (iii) require significant upfront deposits unrelated to the derivatives' intrinsic value, or (iv) that do not require the collateral to be regularly marked-to-market (e.g., certain OTC derivatives). Even when obligations are required by contract to be collateralised, there is usually a lag between the day the collateral is called for and the day the Trust receives the collateral. When a counterparty's obligations are not fully secured by collateral, the Trust is exposed to the risk of having limited recourse if the counterparty defaults.

If a counterparty fails to meet its contractual obligations, goes bankrupt, or otherwise experiences a business interruption, the Trust could miss investment opportunities or otherwise be forced to hold investments it would prefer to sell, resulting in losses for the Trust. Counterparty risk is pronounced during unusually adverse market conditions and is particularly acute in environments in which financial services firms are exposed to systemic risks. Certain markets in which the Trust may effect transactions are OTC or interdealer markets, and may also include unregulated private markets. The lack of a common clearing facility creates counterparty risk. The participants in such markets typically are not subject to the same level of credit evaluation and regulatory oversight as are members of exchange-based markets. This exposes the Trust to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Trust to suffer a loss. Such “counterparty risk” is accentuated for contracts with longer maturities where events have more time to intervene in the counterparty’s ability to fulfill its obligations, or where the Trust has concentrated its transactions with a single or small group of counterparties. The Trust may also be exposed to similar risks with respect to brokers in jurisdictions where there are delayed settlement periods.

There can be no assurance that a counterparty will be able or willing to satisfy its obligations to pay settlement payments or to otherwise meet its obligations, especially during unusually adverse market conditions. The Trust typically may only close out OTC transactions with the relevant counterparty, and may only transfer a position with the consent of the particular counterparty. When a counterparty’s obligations are not fully secured by collateral, then the Trust is essentially an unsecured creditor of the counterparty. If the counterparty defaults, the Trust will have contractual remedies, but there is no assurance that a counterparty will be able to meet its obligations pursuant to such contracts or that, in the event of default, the Trust will succeed in enforcing contractual remedies. Counterparty risk still exists even if a counterparty’s obligations are secured by collateral if the Trust’s interest in collateral is not perfected or additional collateral is not promptly posted as required. Counterparty risk also may be more pronounced if a counterparty’s obligations exceed the amount of collateral held by the Trust (if any), the Trust is unable to exercise its interest in collateral upon default by the counterparty, or the termination value of the instrument varies significantly from marked-to-market value of the instrument. To the extent the Trust allows any OTC derivative counterparty to retain possession of any collateral, the Trust may be treated as an unsecured creditor of such counterparty in the event of the counterparty’s insolvency.

Due to the nature of the Trust’s investments, the Trust may invest in derivatives and/or execute a significant portion of its transactions through a limited number of counterparties and events that affect the creditworthiness of any of those counterparties may have a pronounced effect on the Trust. Additionally, the Trust may be exposed to documentation risk, including the risk that the parties may disagree as to the

proper interpretation of the terms of a contract. In addition, the creditworthiness of a counterparty can be expected to be adversely affected by greater than average volatility in the markets, even if the counterparty’s net market exposure is small relative to its capital.

The Trust’s investment manager evaluates the creditworthiness of the counterparties to the Trust’s transactions or their guarantors at the time the Trust enters into a transaction. The Trust is not restricted from dealing with any particular counterparty or from concentrating any or all transactions with one counterparty. The ability of the Trust to transact business with any one of a number of counterparties, the lack of any meaningful and independent evaluation of such counterparties’ financial capabilities and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Trust.

Market Disruption and Geopolitical Risk: Geopolitical and other events (e.g. wars, pandemics, sanctions and terrorism) may disrupt securities markets and adversely affect the general economy or particular economies and markets. Those events, as well as other changes in foreign and domestic economic and political conditions, could exacerbate other risks or otherwise reduce the value of the Trust’s investments.

Management and Operational Risk: The Trust runs the risk that the investment manager’s investment techniques will fail to produce intended results. The Trust’s portfolio managers may use quantitative analyses and models as part of their investment process. The investment manager’s models support portfolio decisions but may not accurately predict future market movements or characteristics. In addition, they are based on assumptions that may limit their effectiveness and they rely on data that is subject to limitations (e.g., inaccuracies, staleness) that could adversely affect their value. The Trust also runs the risk that the investment manager’s fundamental assessment (including a security’s fundamental fair (or intrinsic) value) of an investment is wrong, or that deficiencies in the investment manager’s or another service provider’s internal systems or controls will cause losses for the Trust or impair Trust operations.

Fund of Funds Risk: Investments by the Trust in pooled investment vehicles may involve additional and/or a layering of fees, expenses, charges and other costs. In addition, there is no assurance that the investments or investment strategies employed by any underlying fund will be successful. The Trust is also indirectly exposed to all of the risks of its investment in the underlying funds in which it invests, including the risk that those underlying funds (including ETFs) will not perform as expected.

Large Unit Holder Risk: If a large number of units of the Trust are held by a single unit holder (e.g., an institutional investor or another GMO fund) or a group of unit holders with a common investment strategy, the Trust is subject to the risk that these investors will purchase, redeem, reallocate or rebalance their

investments in large amounts and/or on a frequent basis, resulting in substantial withdrawals from, or investments into, the Trust. A redemption by those unit holders of all or a large portion of the Trust's units may adversely affect the Trust's performance by forcing the Trust to sell securities potentially at disadvantageous prices to satisfy a redemption request. Redemptions of a large number of units also may increase transaction costs or, by necessitating a sale of portfolio investments, have adverse tax consequences for unit holders. Applications and redemptions of units by a large unit holder or a group of unit holders could limit the deductibility of certain losses (from an Australian tax perspective) that would otherwise reduce the Trust's taxable income. In such cases, unit holders may bear more taxes than would have otherwise been the case.

Futures Contracts Risk: Investment in futures contracts involves risk. A purchase or sale of futures contracts may result in losses in excess of the amount invested in the futures contract.

There is no guarantee that the Trust will be able to enter into an offsetting closing transaction for a purchased or sold futures contract, by selling or purchasing, respectively, an instrument identical to the instrument purchased or sold. In addition, under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract can vary from the previous day's settlement price, thereby effectively preventing liquidation of unfavourable positions. If the Trust is unable to liquidate a futures position due to the absence of a liquid secondary market or the imposition of price limits or other restrictions, it could incur substantial losses. Furthermore, the Trust would continue to be subject to market risk with respect to the position.

The low initial margin deposits normally required in futures trading permit an extremely high degree of leverage. Accordingly, a relatively small price movement in a futures contract can result in immediate and substantial losses. All participants in the futures markets are subject to margin deposit and maintenance requirements. Instead of meeting margin calls, investors may close futures contracts through offsetting transactions, which could distort normal correlations. The margin deposit requirements in the futures markets are less onerous than margin requirements in the securities market, allowing for more speculators who may cause temporary price distortions.

Risks Associated with Futures Brokers: The Trust will assume the credit risk associated with placing its cash, margin and securities with futures brokers, and the failure or bankruptcy of any of such brokers could have a material adverse impact on the Trust. To the extent that the Trust engages in futures and options contract trading and the futures commission merchants with whom the Trust maintains accounts fail to segregate the Trust's assets, the Trust will be subject to a risk of loss in the event of the bankruptcy of any of its futures commission merchants. If a futures broker of the Trust becomes bankrupt or insolvent, or otherwise defaults on its obligations to the Trust, the Trust may not receive all amounts

owing to it in respect of its trading, despite the clearing house fully discharging all of its obligations. In the event of the bankruptcy of a futures broker, the Trust could be limited to recovering only a pro rata share of all available funds segregated on behalf of the futures broker's combined customer accounts. Also, in contrast to the treatment of margin provided for cleared derivatives, the futures broker does not typically notify the futures clearing house of the amount of margin provided by the futures broker to the futures clearing house that is attributable to each customer. Therefore, the Trust is subject to the risk that its margin will be used by the futures clearing house to satisfy the obligations of another customer of the Trust's futures broker. In addition, in the event of the bankruptcy or insolvency of a clearing house, a Trust might experience a loss of funds deposited through its futures broker as margin with the clearing house, a loss of unrealised profits on its open positions, and the loss of funds owed to it as realised profits on closed positions. Such a bankruptcy or insolvency might also cause a substantial delay before the Trust could obtain the return of funds owed to it by a futures broker who was a member of such clearing house. Furthermore, if a futures broker does not comply with the applicable regulations or its agreement with the Trust, or in the event of fraud or misappropriation of customer assets by a futures broker, the Trust could have only an unsecured creditor claim in an insolvency of the futures broker with respect to the margin held by the futures broker. The Trust may carry substantially all of its positions at a single broker, thereby increasing this credit risk.

Service Provider Risk: The Trust relies on external service providers in connection with its operation and investment activities. This includes fund administration, custody and audit. There is a risk that these service providers may not meet their contractual obligations or seek to terminate their services to the Trust. In this situation, the Trust may be required to replace a service provider and this may lead to a disruption of their activities.

The appropriate level of risk for you will depend on factors including your age, investment time frames, where other parts of your wealth are invested and your risk tolerance. Your financial adviser or planner should be able to help determine the appropriate level of risk for you.

4. Fees and Other Costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns.

For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30 year period

(for example, reduce it from \$100 000 to \$80 000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

TYPE OF FEE OR COST	AMOUNT	HOW AND WHEN PAID
Ongoing annual fees and costs		
Management fees and costs The fees and costs for managing your investment. All fee rates are inclusive of GST and net of any applicable Input Tax Credits and/or Reduced Input Tax Credits).	1.012% p.a.*	Paid monthly in cash from Trust assets Paid monthly in cash from Trust assets
Performance fees Amounts deducted from your investment in relation to the performance of the product	0.077% p.a. (for class B units. No performance fee is payable for Class A units)	20.169% of the outperformance of the Trust over the benchmark, after the management fee. Paid 6 monthly in cash from Trust assets.
Transaction costs The costs incurred by the scheme when buying or selling assets	0.17% p.a.	The transaction costs are deducted from the assets of the Trust as and when incurred and are reflected in the unit price.

*The amount of this fee can be negotiated for wholesale clients. See "Differential fees" in the "Additional explanation of fees and costs" section. Management fees and costs are accrued daily on the prior-day net asset value of the Trust (adjusted for investor transactions). The Trust has not incurred any Indirect Costs. Unless otherwise stated, all fees are quoted on a GST inclusive basis and net of any applicable Input Tax Credits and/or Reduced Input Tax Credits. "GST" has the meaning given in the A New Tax System (Goods and Services Tax) Act 1999 (Cth).

This document shows fees and other costs that you may be charged. These fees may be deducted from your money, from the returns on your investment or from the Trust's assets as a whole.

Taxation information is set out in another part of this document.

You should read all information about fees and costs because it is important to understand their impact on your investment.

TYPE OF FEE OR COST	AMOUNT	HOW AND WHEN PAID
Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)		
<i>Establishment fee</i> The fee to open your investment	Nil	N/A
<i>Contribution fee</i> The fee on each amount contributed to your investment	Nil	N/A
<i>Buy-sell spread</i> An amount deducted from your investment representing costs incurred in transactions by the scheme	Nil	N/A
<i>Withdrawal fee</i> The fee on each amount you take out of your investment	Nil	N/A
<i>Exit fee</i> The fee to close your investment	Nil	N/A
<i>Switching fee</i> The fee for changing investment options	Nil	N/A

Management Fees and Costs

Management fees and costs comprise the additional fees or costs that a unit holder incurs by investing in a Trust rather than by investing directly in the assets.

Management fees and costs include the management fee payable to GMO Australia plus any non-routine expenses payable from the Trust. Management fees and costs include indirect costs but do not include the costs described in the "Transaction costs" section below. Management fees and costs are based on estimates current as of the date of this Information Memorandum. Management fees and costs are payable from the Trust's assets and are not paid directly from your investment.

The table below shows the management fees and costs for the Trust current as at the date of this Information Memorandum.

Cost/Fee	Rate (Class A units)	Rate (Class B units)
Management Fee	1.012% p.a.*	1.012% p.a.*
Indirect Costs	Nil	Nil
Performance Fee	Nil	0.77% p.a.#

An estimate based on performance for the 5 years to 30 June 2024. For that period, the Trust outperformed the benchmark (plus base fee) by 0.38%, resulting in a performance fee equal to 0.077% p.a. (or total management fees and costs of 1.089% p.a. which equates to \$5,445 for a \$500,000 investment). This figure is for the purposes of

illustration only and does not indicate future performance. The actual performance and performance fee will vary. If the Trust outperforms the benchmark plus base fee by more than 0.38% the performance fee will be higher. If the Trust outperforms the benchmark plus base fee by 10%, the performance fee would be \$10,084.50. If the Trust does not outperform the benchmark plus base fee for a period, no performance fee is payable for that period.

* Unless otherwise stated, all fees are quoted on a GST inclusive basis and net of any applicable Input Tax Credits and/or Reduced Input Tax Credits. "GST" has the meaning given in the A New Tax System (Goods and Services Tax) Act 1999 (Cth).

+ GMO Systematic Global Macro Trust – Class A Units: In addition to the management fee, GMO Australia may individually negotiate a performance fee with wholesale clients (within the meaning of the Corporations Act). This performance fee is payable by the client to GMO Australia and is not incorporated in the daily unit price.

^ GMO Systematic Global Macro Trust – Class B Units: In addition to the management fee, Class B units are subject to a performance fee of 20.169% of the Trust's outperformance over the benchmark and management fee. The Performance Fee is incorporated into the daily unit price.

Payment of expenses

GMO Australia will generally meet the routine expenses of the Trust. Subject to the constitution, GMO Australia has discretion to classify expenses as routine or otherwise, but generally interprets routine expenses as those expenses associated with the normal annual cycle of operation of the Trust. Routine expenses may include audit expenses, administration fees, custody expenses, statutory reporting, unit holder reporting, unit registry services, the printing and posting of reports and notices to unit holders, and the routine non-investment related tax services and non-investment related legal services provided for the Trust by or at the direction of GMO Australia.

Non-routine expenses are generally paid or reimbursed by the Trust. These may include, without limitation, any government duties and charges, all financial institution charges, certain taxes, brokerage, filing fees and related transactions charges arising from the receipt, collection, acquisition, investment, disposal or distribution of money or other property of the Trust (including receipt of application money), investment related tax services and investment related legal services provided for the Trust by or at the direction of GMO Australia and any litigation costs incurred in relation to the Trust. These expenses are an additional cost to unit holders.

Indirect costs

Indirect costs generally include management fees and costs (if any) from underlying funds and a reasonable estimate of certain costs of investing in over-the-counter derivatives to gain investment exposure to assets or implement the Trust's investment strategy. Indirect costs of the Trust are reflected in the unit price and borne by unit holders, but they are not paid to GMO Australia or GMO.

Performance fee – GMO Systematic Global Macro Trust – Class B units

For Class B units in the GMO Systematic Global Macro Trust, GMO Australia is entitled to receive a performance fee from the Trust equal to the aggregate over 6 months of performance fees calculated on a daily basis (each 6 month period ends 30 June or 31 December). The performance fee is accrued daily as a liability of the Trust, provided the aggregate performance fee is a positive amount according to the following formula:

$$P = 20.169\% \times (A - [B + C]) \times D$$

Where:

P is the performance fee for the relevant day;

A is the Trust's percentage investment return for the relevant day;

B is the percentage benchmark return for the relevant day;

C is the base fee excluding GST (1.00% divided by 365);

D is the daily gross asset value of Class B units in the Trust.

The performance fee is only payable for any 6 month period if the aggregate dollar value of daily performance fees for the relevant 6 months is positive.

If the aggregate dollar value of daily performance fees for the 6 month period is a negative amount, that negative amount will be carried forward for calculating the aggregate of daily performance fees for the succeeding 6 month period.

Where a redemption occurs at a time when the aggregate of daily performance fees for the relevant period is negative, the value of those performance fees is reduced by the percentage of the gross asset value of the Class B units equal to the redemption.

The performance fee is reflected in the unit price for Class B units in the Trust where there is a positive performance fee amount.

Based on the current calculation methodology for the performance fee, GMO Australia has estimated that the typical ongoing performance fee payable per annum may be \$380.00 assuming outperformance above benchmark (plus base fee) of 0.38% and an average account balance of \$500,000 during the year. Prior periods have been taken into account in calculating this estimate. However, this is not a forecast as the actual performance fee for the current and future financial years may differ. GMO Australia cannot guarantee that performance fees will remain at their previous level or that the performance of the Trust will outperform the benchmark.

It is not possible to estimate the actual performance fee payable in any given period, as we cannot forecast what the performance of the Trust will be, but it will be reflected in the management costs for the Trust for the relevant year.

Taxation costs

Taxation information is set out in section 6 of this document.

Additional explanation of fees and costs

Transaction costs

In managing the assets of the Trust, the Trust may incur transaction costs ("Transaction Costs") such as brokerage, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold, the costs of (or transactional and operational costs associated with) certain derivatives (such as derivatives used for hedging).

Transaction Costs arise through the day-to-day trading of the Trust's assets or may arise when there are applications or withdrawals which cause net cash flows into or out of the Trust. These are reflected in the Trust's unit price.

GMO Australia estimates that the total Transaction Costs for the Trust during the year ended 30 June 2024 were:

Transaction Costs:	0.17%
Buy/Sell Spread*:	0.00%
Net Transaction Costs %:	0.17%
(dollar value)^:	(\$850)

*Entry/Exit Transaction Cost Allowance

^Over a 1 year period assuming an average account balance of \$500,000. Note: Net Transaction Costs for future years may differ.

As net Transaction Costs are factored into the asset value of the Trust's assets and reflected in the unit price, they are an additional cost of investment to the investor when they have not already been recovered by the Buy/Sell Spread charged by GMO Australia. They are not a fee paid to GMO Australia or GMO.

Buy/Sell Spread

When calculating the issue price of units in the Trust, GMO Australia will make an estimate of the costs attributable to the purchase or acquisition of the Trust's assets. This estimate is referred to as the Buy Spread. Similarly, when calculating the redemption price of units in the Trust GMO Australia will make an estimate of the costs which would be incurred to sell the Trust's assets. This estimate is referred to as the Sell Spread. The Buy/Sell Spread ensures that these transaction costs are met by the unit holders transacting rather than the other unit holders in the Trust. The Buy/Sell Spread is an additional cost to the investor but is incorporated into the unit price and incurred when an investor invests in or withdraws from the Trust. The Buy/Sell Spread is paid into the Trust and is not paid to GMO Australia.

The current Buy/Sell Spreads for the Trust are:

Buy Spread^: 0.00%

Sell Spread^: 0.00%

^ The above Buy/Sell Spreads are expressed as a percentage of capital value of each unit.

GMO Australia may vary the allowance for the Buy/Sell Spread to reflect changes in the costs of investing new

funds and/ or generating funds to meet redemptions. Based on the current Buy/Sell Spread, the dollar value of these costs is nil for the Trust.

Differential fees

GMO Australia may in its discretion and in accordance with relevant ASIC policy and the Corporations Act negotiate a rebate or waiver of part of the management fees and costs with wholesale clients, as defined by the Corporations Act. Any fee rebate or waiver is subject to GMO Australia satisfying the requirements of ASIC policy and the Corporations Act. Any differential fee arrangement will not adversely affect the fees paid or to be paid by unit holders who are not entitled to the fee arrangements.

Fee changes

The constitution of the Trust sets the maximum fees payable.

The Trust's constitution allows for management fees and costs (inclusive of performance fees) of up to 20%, withdrawal fees of up to 2% and contribution fees of up to 2% of each investment.

The fees currently charged for the Trust are as set out in this Information Memorandum. GMO Australia will give unit holders at least 30 days notice of any increase in the fees associated with the Trust.

Example of annual fees and costs

The following tables give examples of how the fees and costs for this product can affect your investment over a 1 year period. You should use these tables to compare this product with other managed investment products. Unless otherwise stated, all fees quoted in this Information Memorandum are quoted on a GST inclusive basis and net of any applicable Input Tax Credits and/or Reduced Input Tax Credits.

EXAMPLE - GMO Systematic Global Macro Trust - Class B Units*		
BALANCE OF \$500 000 WITH TOTAL CONTRIBUTIONS OF \$5 000 DURING YEAR		
Contribution Fees	Nil	For every additional \$5,000 you put in you will be charged \$0.
PLUS Management Fees and Costs	1.012% p.a.	And for every \$500,000 you have in the Trust you will be charged or have deducted from your investment \$5,060.00 each year
PLUS Performance fees	0.077% p.a.	And you will be charged or have deducted from your investment \$385 in performance fees each year.
PLUS Transaction costs	0.17% p.a.	And , you will be charged or have deducted from your investment \$850 in transaction costs.
EQUALS Cost of fund	1.259% p.a.	If you had an investment of \$500,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees of: \$6,295.00* What it costs you will depend on the fees you negotiate

*An estimate based on performance for the 5 years to 30 June 2024. During that period, GMO Systematic Global Macro Trust outperformed the benchmark (plus base fee) by 0.38%, resulting in a performance fee equal to 0.077% p.a. This figure is for the purposes of illustration only and does not indicate future performance. The actual performance and performance fee will vary. If GMO Systematic Global Macro Trust outperforms the benchmark plus base fee by more than 0.38% the performance fee will be higher. If the Trust outperforms the benchmark plus base fee by 10%, the performance fee would be \$10,084.50. If the Trust does not outperform the benchmark plus base fee for a period, no performance fee is payable for that period. Please see the detailed description of how the performance fee is calculated in the "Performance fee" section. Additional fees may apply.

5. How the Trust works

The Trust is an Australian registered managed investment scheme. When you invest in the Trust your money is pooled together with other investors. GMO Australia uses this money to buy and sell assets on behalf of all investors in the Trust.

Investors will be issued with interests in the Trust called 'units'. Each unit in the Trust confers a proportional beneficial interest in the assets of the Trust as a whole. Investors do not have any entitlement to any particular part of the Trust or any particular assets of the Trust, and have no right to participate in the management or operation of the Trust (other than through unit holder meetings).

Unit prices

The number of units you can purchase will depend on the amount being invested and the investment unit price calculated for the day GMO Australia receives a valid application. The unit price will vary as the market value of the assets in the Trust rises or falls. For current unit prices please visit the GMO website (www.gmo.com).

GMO Australia will value the units of the Trust in accordance with the Trust's constitution. Unit prices are generally calculated on each New South Wales business day. Entry prices are generally higher than exit prices due to the costs of buying and selling the underlying assets of the Trust. The difference is called the 'buy-sell spread'.

The unit price will be rounded to the nearest two decimal places of a cent, or to greater accuracy as determined from time to time by GMO Australia.

GMO Australia has a Unit Pricing Discretions Policy which sets out how we will exercise discretions in the unit pricing of the Trust. You can obtain a copy of the policy free of charge by contacting GMO Australia.

Who May Invest

Units in the Trust are available only to investors who are wholesale clients within the meaning of section 761G of the Corporations Act, and who satisfy the other criteria set out in this document. Additions to investments must also satisfy the same requirements.

Applications and redemptions

The minimum initial investment in the Trust is \$500,000. The minimum applying to subsequent investments is \$250,000.

The minimum amount that may be redeemed is \$250,000 or the whole of the investment if the value of units held is less than \$500,000. GMO Australia may unilaterally redeem a unit holding that falls below \$500,000 and remit the proceeds to the account owner. GMO Australia may vary or waive these minimum investment and redemption amounts at any time.

Before lodging an application, you should advise GMO Australia that you intend to lodge an application and the date you propose to lodge your application. GMO Australia reserves the right to reject any application for units in the Trust.

To apply please complete an Application for New Investment Form and forward it to State Street Australia Limited ("SSAL"). Application monies may be paid by Electronic Funds Transfer¹ or via Exigo. In calculating the application price for units, GMO Australia may waive all or part of the Entry Transaction Cost Allowance. GMO Australia may, in its sole discretion, accept in-kind transfers of unencumbered assets as part or total payment of application monies.

To redeem please complete a Redemption Request Form and forward it to SSAL. In calculating the redemption price for units, GMO Australia may waive all or part of the Exit Transaction Cost Allowance. GMO Australia may, in its sole discretion, pay redemption proceeds to investors by way of an asset transfer rather than a cash payment.

GMO Australia generally pays redemption proceeds within 3 New South Wales business days, however the constitution for the Trust allows for up to 30 days to pay redemption proceeds. In addition, GMO Australia may choose to suspend redemptions in certain circumstances (for up to 28 days) under the constitution for the Trust. In some circumstances, such as where there is a freeze on redemptions or following a distribution made by the Trust, you may not be able to redeem your funds within the usual period upon a request. Unit holders will be notified of any material changes to their unit holder rights.

Please see section 9 - "Applying for or redeeming an investment" for further information on how to apply or redeem.

Processing

If the Trust's administrator receives an application or redemption request before 12:00 pm on a New South Wales business day and it has been completed accurately, the application or redemption price will usually be based on the unit price as at the close of business on that day. Application monies must also be received by the administrator in cleared funds by 12.00 pm. Applications or redemptions received after this cut-off or on a non-business day, will usually be processed using the unit price calculated as at the close of business on the next business day. Depending on the payment method, there may be some delay before monies are received in cleared funds by the administrator. GMO Australia will not be responsible for any such delays.

¹ The transferring party must be Real Time Gross Settlement (RTGS) compliant.

GMO Australia reserves the right, but is not obliged, to process an application prior to determining whether application monies have cleared in the Trust's application account. Should any loss arise as a result of application monies not clearing the investor will be liable for any related costs such as interest and/or market movements.

Identification and Verification Documentation

GMO Australia and State Street Australia Limited will need to collect information from you in order to verify your identity in accordance with Australian Anti-Money Laundering and Counter-Terrorism Financing laws. We will not be able to process your application or issue you with units in the Trust until you provide us with this information.

The type, and amount, of verification information required will vary depending on the nature of the investor. Further information about the identification process is set out in Section 9 – “Applying for or redeeming an investment”.

After your application has been processed we may also require further information from you from time to time. In order to comply with our obligations under the law we may need to delay, block, freeze or refuse transactions in relation to your account. This may impact your investment and its returns. GMO Australia may also be required to report information about you to relevant authorities, including the Australian Transaction Reports and Analysis Centre (AUSTRAC).

Distributions

The Trust intends to make distributions at least annually. Generally, distributions will comprise the taxable income of the Trust (as calculated using Australian tax principles), if any, net of accrued and actual Trust expenses and fees, including class-level performance fees (if applicable). The Trust may pay distributions periodically (e.g., in advance of large redemption requests). Taxable income will be distributed within a particular class of units. Unrealised capital gains and losses will be reflected in the price of units.

Each class of units in the Trust intends to qualify and be operated as an Attribution Managed Investment Trust (“AMIT”) for Australian income tax purposes (discussed in further detail in Section 6). The composition and timing of distributions could affect your tax position. GMO Australia strongly recommends that you seek professional taxation advice.

Unless GMO Australia is otherwise directed in writing by a unit holder not less than one month prior to a distribution date to pay the distribution in cash, amounts distributed by the Trust will be re-invested in units of the Trust.

6. How managed investment schemes are taxed in Australia

Investing in a registered managed investment scheme is likely to have tax consequences. The income taxation information below is of a general nature only and applies

to unit holders who hold their units in the Trust on capital account (rather than revenue account). You are strongly advised to seek professional tax advice, as tax and social security laws are complex and subject to change, and unit holders' individual circumstances vary.

The Trust is an Australian resident trust for Australian tax purposes and on the basis that the income of the Trust is distributed or attributed to unit holders on an annual basis, the Trust should be treated as a “flow through” entity for Australian tax purposes. Income distributed or attributed to unit holders should generally retain its character in the hands of the unit holder.

AMIT election

Each class of units in the Trust intends to qualify and be operated as an AMIT for Australian income tax purposes.

The responsible entity has also made an election to treat each class as a separate AMIT. Therefore, in respect of Australian tax matters particular to the Trust, references to the (or a) Trust may refer to the (or a) class of the Trust, as applicable. Qualification as an AMIT depends on a variety of factors and the Trust cannot guarantee it will qualify as such. If the Trust is unable to qualify as an AMIT, capital account elections may be unavailable to the Trust, and certain distributions to non-Australian unit holders could be subject to a higher rate of Australian withholding taxes. The tax treatment of distributions made and/or income that is attributed in the hands of unit holders may depend on the type of income recognised by the Trust and whether the unit holders are Australian residents from a tax perspective. The types of distributions that the Trust may make include investment income (such as interest and dividends), net capital gains, a capital gains tax concession component, tax deferred return of capital amounts, franking credits from certain dividends and foreign income tax offsets (in respect of certain foreign tax paid on foreign source income and/or capital gains).

The Trust intends to distribute and/or attribute all of its taxable income (as determined under the Trust Constitution) to its unit holders each year. Provided the activities of the Trust are limited to that of an “eligible investment business” (as defined for Australian tax purposes), the Trust should not be considered a “public trading trust”. Therefore, the Trust should not be subject to Australian income taxation but rather the unit holders are assessed for tax on any income and capital gains generated by the Trust provided they are distributed and/or attributed to unit holders.

Taxation of unit holders

Unit holders will be provided with an AMIT Member Annual Statement (“AMMA Statement”) setting out the taxable income arising from their investment in the Trust to assist in the preparation of their income tax return.

The Trust may make total distributions during a taxable year of an amount that exceeds the Trust's taxable income for that year, in which case the excess may be treated as a return of capital (which would reduce a unit holder's cost base in its units, with any amounts exceeding that base treated as a capital gain). A return of capital is generally not immediately assessable to unit holders, to the extent such amount does not exceed a unit holder's cost base. Such amounts reduce a unit holder's cost base in its units, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the unit holder of its units. In the case of amounts attributed by an AMIT, such amounts can reduce a unit holder's cost base in a similar way to other trusts. However, the AMIT regime also allows upward cost base adjustments to occur where the taxable income attributed exceeds the distribution made. The effect of an upward cost base adjustment would be to increase a unit holder's cost base in its units, thus reducing any gain or increasing any loss on a subsequent taxable disposition by the unit holder of its units. Details of certain cost base adjustments will be included in the AMMA Statement.

Losses

Where the Trust (or a class of units of the Trust) is in a tax loss position in a particular year, the loss is retained in the Trust (or a class, if applicable) and is not distributable to unit holders. The loss can be carried forward by the Trust (or a class, if applicable) and be used to offset assessable income in a future year (subject to satisfaction of certain loss integrity rules).

Disposals of units

If unit holders make withdrawals from the Trust or transfer any of their units to a third party, or any of their units are redeemed, these events may constitute a disposal for tax purposes. The tax consequences of a disposal depend on the particular circumstances of each unit holder. Certain unit holders who hold units of the Trust for more than 12 months may be entitled to a capital gains tax discount in relation to the disposal of their units in the Trust. Proceeds from withdrawals from an AMIT may also contain a component of taxable income.

Cost base adjustments to the unit holder's units may need to be taken into account in calculating the gain or loss from a disposal.

Tax File Number/Australian Business Number

Unit holders will be able to quote their tax file number ("TFN") or Australian Business Number ("ABN") (as appropriate) to the Trust in the application form. It is not compulsory for an Australian unit holder to quote their TFN or ABN. However, if a TFN or ABN is not quoted, or an appropriate exemption from quoting a TFN/ABN is not provided, tax will be deducted at the highest marginal tax rate from the amount distributed.

Non-resident unit holders

If you are determined to be a non-resident for Australian income tax purposes (based on the information included

within your Application for New Investment form), Australian withholding tax may be deducted from certain distributions made to you, including in respect of taxable income that is attributed to you. The rules regarding the application of treaty rates and your local tax implications are complex (in particular as some investment management functions have been delegated to GMO) and are country/unit holder-specific. You are strongly advised to seek professional tax advice regarding your treaty eligibility and the most appropriate manner by which to evidence your treaty eligibility, if applicable.

The Australian Taxation Office requires the Trust to file certain information regarding unit holder accounts and transactions. In certain cases, the Trust may be required to amend tax information reported to unit holders in respect of a particular year. In this event, unit holders may be required to file amended tax returns in respect of such information, pay additional taxes (potentially including interest and penalties), and incur other related costs.

GST

References to the term "GST" in this document refer to the term as defined and outlined in the *A New Tax System (Goods and Services Tax) Act 1999*. GST amounts are subject to change and are dependent upon several factors.

The acquisition or disposal of units by unit holders should not be subject to GST. In addition, there should be no GST payable on any fund distributions to unit holders. Separately, unit holders may incur GST on costs relating to their unit holding (e.g., financial advice sought in relation to the investment or subsequent divestment of units). Where unit holders are not registered for GST, there will be no entitlement to claim input tax credits for the GST incurred on these costs. Where unit holders are registered for GST, advice should be sought in relation to whether input tax credits and/or Reduced Input Tax Credits are available.

The above disclosures are based on current taxation law and market practice.

7. Other information

Trust Constitution

The Trust operates under a constitution. This Information Memorandum summarises some of the provisions of the constitution of the Trust but is qualified in its entirety by reference to the actual provisions of the constitution.

Copies of the constitution are available at no cost by contacting GMO Australia. Persons contemplating investing in the Trust will be taken to have read and understood the constitution prior to completing their Application Forms.

Compliance

The Trust has a compliance plan and is supervised by a compliance committee constituted with a majority of external members. This committee generally meets quarterly. Copies of the Trust's compliance plan are available from GMO Australia on request.

Related parties

GMO Australia and GMO are the investment managers of the Trust. GMO Australia has appointed GMO as an investment manager on commercial arm's length terms. GMO Australia is the responsible entity of the Trust and a subsidiary of GMO. This may give rise to conflicts of interest. Related party transactions also carry a risk they could be assessed and monitored less rigorously than transactions with unrelated third parties. GMO Australia has sought to mitigate these risks by putting in place a conflicts of interest and related party policy that governs the way GMO Australia deals with conflicts or related party transactions. GMO Australia has the policies and procedures in place to manage conflicts through controlling, avoiding or disclosing conflicts.

Custodian and Third Party Administrator

GMO Australia has appointed State Street Australia Limited ("SSAL") as custodian and third-party administrator to the Trust. SSAL provides safekeeping, settlement and administrative services for the Trust. All assets of the Trust will generally be either held in the name of the custodian, its sub-custodians or the responsible entity. The role of the custodian is limited to holding assets of the Trust and it has no supervisory role in relation to the operation of the Trust. The custodian does not make investment decisions in respect of the assets held or manage those assets. GMO Australia regularly monitors the performance of SSAL against the documented service level agreements.

Unit Registry

GMO Australia has appointed SSAL to perform the unit registry function for the Trust.

Transfer of Units

The constitution of the Trust permits the transfer of units only with the consent of GMO Australia. GMO Australia may refuse to register a transfer of units in its discretion.

Progress Reports and Accounts

To keep unit holders fully informed about their investments, GMO Australia will provide:

- monthly and a quarterly report reviewing the operations of the Trust; and
- a copy of the annual report for the Trust which includes the annual audited accounts and independent audit report of the Trust. The annual report will be sent to you

via email each year. If you would prefer to receive the annual report via mail please contact us.

Auditor

The auditor to the Trust is PricewaterhouseCoopers, chartered accountants, of One International Towers Sydney, Watermans Quay, Barangaroo, Sydney NSW 2000.

Individual Advice Recommended

It is impossible to take account of the particular investment guidelines, financial situation and/or needs of each individual investor in the Trust. Intending investors are advised to seek external advice, including tax advice, on the appropriateness of an investment in the Trust given their own particular circumstances. Each intending investor should evaluate the Trust in the light of their own circumstances.

Liability of Unit Holders

The constitution and the Corporations Act 2001 contain provisions designed to limit the liability of unit holders to the value of units held. While these provisions are generally regarded as effective, this remains ultimately a matter for the Courts to determine.

Complaints

Unit holders in the Trust and those accessing the Trust via a platform (such as an investor-directed portfolio service) may submit a complaint to GMO Australia. If you wish to make a complaint please contact GMO Australia:

Attention: GMO Australia Client Relations

Mail: P.O. Box R1817, Royal Exchange, NSW 1225

Email: sydcst@gmo.com

GMO Australia will:

- acknowledge any complaint in writing and inform the investor when they should expect to receive an answer or feedback; and
- endeavour to ensure that all complaints will be properly considered and dealt with in a timely manner, generally within 30 days. Some types of complaints such as more complex complaints may have a different response time-frame. We will let you know if a different time-frame will apply to your complaint.

GMO Australia is a member of the Australian Financial Complaints Authority. This is an independent body whose purpose is to address the complaints from investors where the investor is not satisfied with the outcome of GMO Australia's complaint resolution process. However, the service is generally only available to retail clients. The contact details for the Australian Financial Complaints Authority are set out below:

Telephone: 1800 931 678

Website: www.afca.org.au

Email: info@afca.org.au

Mail: GPO Box 3, Melbourne, Victoria, 3001

Updated Information Available

The information in this Information Memorandum may change over time. Where information changes that is not materially adverse to investors, we will update this information. Up to date information, including information on the Trust's performance, funds under management, and financial highlights is available on GMO's web site, www.gmo.com. Paper copies of this information are available from GMO Australia's office (contact details are on the front cover) during business hours at no cost.

Privacy

By investing in the Trust, you acknowledge and agree that your personal information may be handled by GMO Australia and its service providers in the manner set out below. GMO Australia collects your personal information to process and administer your investment in the Trust and to provide you with information about your investment in the Trust. Some of this information is required by anti-money laundering laws and may be required to be kept on a register in accordance with the Corporations Act 2001. GMO Australia may not be able to process your application to invest in the Trust if you do not provide all or part of the information to us.

GMO Australia may disclose your personal information for purposes related to your investment, to GMO Australia's affiliates, agents and service providers. In order to use and disclose your personal information for the purposes stated above, GMO Australia may be required to transfer your personal information to entities located outside Australia where it may not receive the level of protection afforded under Australian law. GMO Australia may disclose your personal information to the United States, United Kingdom, Singapore and other countries. By investing in the Trust, you consent to your personal information being transferred overseas for these purposes. GMO Australia would like to retain and use the personal information you provide to keep you informed about future investment opportunities. GMO's privacy policy contains further information about GMO Australia's privacy practices, including your rights to access and correct your personal information, and to make a complaint regarding our use, holding or disclosure of your personal information. You can obtain a copy of the policy free of charge by contacting GMO Australia. In addition to the information described therein, unit holders should refer to the FATCA and CRS disclosures described below.

FATCA

The Foreign Account Tax Compliance provisions of the U.S. Hiring Incentives to Restore Employment Act ("FATCA") generally impose a U.S. federal reporting and withholding tax regime with respect to certain U.S. source income earned

(including dividends and interest and certain payments with respect to derivative instruments that are determined to be "dividend equivalent" payments). As a general matter, these rules are designed to require certain U.S. persons' direct and indirect ownership of certain non-U.S. accounts and non-U.S. entities to be reported to the U.S. Internal Revenue Service ("IRS"). A 30% withholding tax may be applied if there is a failure to provide required information regarding U.S. ownership or otherwise comply with the requirements of FATCA. In the event of a delay or failure by the applicant to produce any information required for verification purposes, GMO Australia and/or SSAL may refuse to process subscription requests. If a unit holder does not provide the required forms, certifications, information or documentation requested, that unit holder may be subject to adverse U.S. federal and/or other tax consequences.

Under these reporting and withholding rules, "withholdable payments" made to the Trust generally will be subject to 30 per cent withholding tax unless the Trust: (i) enters into (or qualifies for an exemption from entering into) an agreement with the IRS pursuant to which the Trust agrees to report to the IRS information about its U.S. unit holders and certain U.S. persons that indirectly hold an interest through non-U.S. unit holders, and to comply with other reporting, withholding, verification, due diligence and other procedures established by the IRS, including a requirement to seek waivers of non-U.S. laws that would prevent the reporting of such information; or (ii) satisfies the requirements of (including any rules or regulations implemented pursuant to) an intergovernmental agreement (an "IGA"). In this respect, Australia and the United States entered into an IGA with respect to FATCA implementation (the "Australian IGA"). The Trust intends to comply with FATCA as modified by the terms of the Australian IGA and Australian tax guidance, which generally requires the Trust to obtain and provide to the Australian Taxation Office, certain information from unit holders, and to meet certain other requirements. If the Trust complies with its obligations under the Australian IGA and if Australia also complies with its obligations under the Australian IGA, the Trust will not be subject to U.S. withholding taxes under FATCA.

FATCA also provides that payments from the Trust to any unit holder that are attributable to withholdable payments and certain other payments that could be deemed to be "passthru payments" within the meaning of the U.S. Internal Revenue Code will generally be subject to a 30% withholding tax if there is a failure to provide information, representations, and waivers of non-U.S. law as may be required to comply with the provisions of the rules, including in certain cases, information regarding certain U.S. direct and indirect owners of such unit holders. The U.S. Treasury Department and the IRS continue to consider the feasibility of a system for implementing withholding on

passthru payments. The failure of a unit holder to provide such information also may result in other adverse consequences applying to a unit holder. The Trust may disclose any unit holder information, certifications or documentation to the Australian Taxation Office, the IRS and/or other parties as necessary or advisable to comply with FATCA or other requirements. If the Trust were to become a member of an “expanded affiliated group” or have a “Related Entity” within the meaning of an IGA, this status could adversely affect the FATCA status of the Trust and reduce the Trust’s investment returns. The requirements of and exceptions from FATCA are complex and remain potentially subject to material changes resulting from additional guidance from the IRS and the Australian Taxation Office. In addition, certain other countries have passed or may in the future pass legislation similar to FATCA, which may impact the Trust and the unit holders. Each prospective unit holder is urged to consult its tax adviser regarding the applicability of FATCA and any other reporting requirements with respect to the prospective unit holder’s own situation.

Common Reporting Standard

The Organisation for Economic Co-operation and Development (“OECD”) Common Reporting Standard (“**CRS**”) initiative requires the Trust to obtain and provide to the Australian Taxation Office, certain information of unit holders and their transactions with the Trust. Unit holders are requested to provide certain information and certifications to ensure compliance with the CRS. Such information may be provided to the unit holders’ local tax authority and other authorities. In addition, the Trust must meet certain other requirements and follow related CRS due diligence procedures in respect of unit holders and their indirect

investors, principals, partners, beneficial owners or controlling persons. In the event of a delay or failure by the applicant to produce any information required for verification purposes, GMO Australia and/or SSAL may refuse to process subscription requests. If a unit holder does not provide the required forms, certifications, information or documentation requested, such unit holder may be subject to adverse Australian and/or other tax consequences. Each prospective unit holder is urged to consult its tax adviser regarding the applicability of CRS and any other reporting requirements with respect to the prospective unit holder’s own situation.

Base Erosion Profit Shifting and Related Proposals

OECD proposals regarding the Base Erosion and Profit Shifting (“BEPS”) initiative were released during 2015. The OECD has also endorsed a global initiative focused on taxing profits in jurisdictions where they are earned and establishing a global minimum level tax to combat tax base erosion and profit shifting. The mechanics through which these measures will be implemented into law are complex, remain uncertain and will depend on the interaction of implementing legislation as adopted by various countries. Further to the Australian Government’s announcement regarding the implementation of the BEPS “Pillar Two” rules, the Australian Government released a legislative package with a commencement date of 01 January 2024. While a number of related initiatives may significantly alter unit holders’ after-tax returns, it is not currently expected that the “Pillar Two” rules will subject the Trust to Australian taxation.

8. Summary of Participants

Responsible Entity:	GMO Australia Limited ABN 30 071 502 639 Suite 43.02, Grosvenor Place 225 George Street Sydney NSW 2000 Telephone: +61 2 8274 9900 Facsimile: +61 2 8003 8800

9. Applying for or redeeming an investment

Wholesale Clients Only

Units in the Trust are available only to investors who are wholesale clients within the meaning of section 761G of the Corporations Act.

If you are an individual, or otherwise are not making an investment in connection with a business, and want to rely on the income and assets test to meet the wholesale client requirement you must attach to your application an accountant's certificate which is less than 2 years old indicating that you have either:

- net assets of at least \$2.5 million; or
- a gross income for each of the last 2 financial years of at least \$250,000 a year.

Units in the Trust are not available to US Persons (as defined in the Application Form).

See the Application for New Investment Form attached to this Information Memorandum for more information.

By signing the Application Form you are declaring that you meet all qualifications to invest in the Trust.

Making a New Investment

If you are making a new investment (that is, you have not already invested in the Trust), you may apply online (at <https://www.gmo.com/australia/how-to-invest-australia/>) or complete the 'Application for New Investment Form' attached to this Information Memorandum.

For assistance with completing the application form, see 'Completing your Application Form' below.

If applying using the paper form, your completed form and consideration should be sent to SSAL.

GMO Australia and State Street Australia Limited will need to collect information from you in order to verify your identity in accordance with Australian Anti-Money Laundering and Counter-Terrorism Financing laws. We will not be able to process your application or issue you with units in the Trust until you provide us with this information.

The type, and amount, of verification information required will vary depending on the nature of the investor. Please refer to the Application for New Investment Form for a summary of the verification information that is required. The online form will prompt you for the appropriate information.

After your application has been processed we may also require further identification and verification information from you from time to time. In order to comply with our obligations under the law we may need to delay, block, freeze or refuse transactions in relation to your account. This may impact your investment and its returns. GMO Australia may also be required to report information about you to relevant authorities, including the Australian Transaction Reports and Analysis Centre (AUSTRAC).

Adding to Your Investment

If you wish to make an additional investment to an existing holding, you should complete the 'Application for Additional Investment Form' available at <https://www.gmo.com/australia/how-to-invest-australia/>.

Your completed form and consideration should be sent to SSAL.

Redeeming Your Investment

If you wish to redeem units you hold in the Trust you must complete a 'Redemption Request Form' available at <https://www.gmo.com/australia/how-to-invest-australia/>.

For assistance with completing the redemption form, see 'Completing your Redemption Form' below.

Your completed form should be sent to SSAL.

PLEASE NOTE THAT GMO AUSTRALIA MAY REFUSE TO ACCEPT APPLICATIONS AND REDEMPTIONS IN ANY OTHER FORM.

Completing Your Application Form

To invest in the Trust you should complete and sign the correct application form. Please note:

- Name of Applicant – Name of beneficial owner.
- Name of Trustee of Applicant – Provide if applicable.
- ABN – Where no ABN is available please supply a TFN or details of any exemption.
- Contact Details – Please provide at least one contact so that GMO Australia and SSAL can meet reporting requirements. Please provide an email address. We will use this email address to provide you with information about your investment in the Trust, including copies of the annual reports for the Trust.
- Amount to be Credited – Initial applications must be at least \$500,000, unless waived by GMO Australia. Please indicate whether you want income distributions reinvested. Also please indicate when monies will be received by SSAL and where they are coming from.
- Distributions – The details of the account into which you would like distributions paid, to be completed only when the reinvest option is not selected. This must be an Australian dollar denominated bank, building society or credit union account.
- Redemption proceeds – The details of the account into which you would like any redemptions paid. This must be an Australian dollar denominated bank, building society or credit union account.
- Applicant Signature(s) – Attach company seal if applicable. Also attach a list of current authorised signatories together with specimen signatures and contact phone numbers.
- Lodging an Application Form – Please forward your completed form and monies to SSAL. Monies can

either be transferred via Electronic Funds Transfer² or via Exigo. Account details are shown on the Application form.

Completing Your Redemption Form

To redeem your investment in the Trust you should complete and sign a Redemption Request Form.

Please note:

- Payment Details – Please show where you would like funds remitted.
- Amount to be Debited – Show dollar amount(s) or number of units.

² The transferring party must be Real Time Gross Settlement (RTGS) compliant.

Application for New Investment

Exigo Code (If applicable):		

¹¹ Initial applications must be \$500,000 or greater (lower amounts may be accepted at the discretion of GMO Australia). Generally, only Australian dollar applications will be accepted. Non-AUD applications will only be accepted at GMO's discretion.

¹² Applicants may elect to have income distributions reinvested in additional units of the Trust or paid by direct credit (see section 4 if applicable). If no direction is given distributions will be reinvested.

Application for New Investment

5. Declaration

Trust Documents

I/We have read and agree to be bound by the attached Information Memorandum for the managed investment scheme I/We have selected in this form (the "Trust") and I/We agree to be bound by the provisions of the constitution, as it may be amended from time to time, for the Trust. I/We agree that GMO Australia shall be entitled to deduct from money payable to me/us on redemption of any or all of my/our units, all taxes or duties paid or payable by GMO Australia and/or the Trust in respect of the application money herewith or in consequences of such redemption.

Investor Qualifications

I/We certify that I am/we are "Wholesale Clients" in accordance with section 761G of the Corporations Act 2001 and that I am/We are not US citizens, that I am/We are not resident in the US, and that I/We do not have an obligation to pay tax to the US tax authorities on my/our worldwide income ("US Persons"). I/We will immediately notify GMO Australia if I/We cease to be a Wholesale Client or if I/We become a US Person.

Broker/Dealer Affiliation

I am/We confirm that I/we are not (a) a Broker/Dealer; (b) owned or controlled by a Broker/Dealer; or (c) the owner or controller of a Broker/Dealer (where, in each case, ownership/control means having a voting or ownership interest in excess of 75%). If this statement is not true, I/We will advise whether I am/We are a Broker/Dealer and/or the names of the entities that are Broker/Dealers with which I/We have the relevant ownership/control interest.

Foreign Account Tax Compliance Act ("FATCA") and Common Reporting Standard ("CRS")

The applicable FATCA form(s) (e.g., the appropriate Form W-8) and CRS self-certification form(s) have been completed and copies of such form(s) accompany this completed application. I/We represent and warrant that: (1) I/We remain in compliance with or exempt from FATCA; and (2) either (A) I/We am/are not a member of an "expanded affiliated group" under FATCA and do not have any "related" entity within the meaning of any applicable intergovernmental agreement, or otherwise (B) each member of my/our "expanded affiliated group" and each of my/our "related" entities is in compliance with, or exempt from FATCA. I/We further acknowledge that the Trust is considered a separate Foreign Financial Institution for purposes of compliance with FATCA and the applicable intergovernmental agreement. I/we agree to notify GMO Australia promptly if there has been a change in circumstances that causes any information to be incorrect, and/or if the accompanying form(s) otherwise become incorrect or outdated.

I/we further understand and agree that neither GMO Australia, nor the Trust is liable for any taxes, interest, penalties or other costs or expenses that may be assessed against the unit holder or the Trust related to any missing, incomplete, incorrect or outdated FATCA and CRS self-certification form(s) and/or related documentation. The terms of this paragraph shall survive the date of this application. Each prospective unit holder is urged to consult its tax adviser regarding these matters.

Anti-Money Laundering

I/We acknowledge and agree that any delay or failure to deliver identification documents specified by GMO Australia may result in a delay or refusal to process my/our application.

If this application is being submitted by a Custodian or Service Operator I/We warrant that I/we have adopted an Anti-Money Laundering and Counter-Terrorism Financing Program in compliance with Australian requirements and have performed appropriate identification, verification and ongoing customer due diligence procedures in relation to the customers of the Service or Custodian as appropriate.

Companies applying as a Custodian represent that:

- The company is providing a custodial or depository service as described in the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 ("AML/CTF Act"); and
- The company holds either an AFSL allowing it to provide custodial or depository services or is exempt from holding such an AFSL.

Privacy

I/We consent to the collection, use, holding and disclosure of personal information in accordance with the privacy provisions set out in the Information Memorandum for the Trust. I/We warrant that I/we: (i) have obtained, or will at the relevant time have obtained, the consent of my/our directors, officers, employees and agents (as applicable) to the collection, use, holding and disclosure of their personal information in accordance with the privacy provisions set out in the Information Memorandum; and (ii) have provided them with the information set out in such privacy provisions.

Application for New Investment

6. Applicant Signature(s)

First Authorised Signature:				
	Signature	Name – Please print or type	Date	Ph no. ¹³
Second Authorised Signature: ¹⁴				
	Signature	Name – Please print or type	Date	Ph no.
Company Seal (if applicable):				

Who should sign the form

Investor Type	Who Should Sign
Individual	Where the investment is in one name, the investor must sign.
Joint Investors	Where the investment is in more than one name, all investors must sign.
Company	Two directors or a director and company secretary must sign, unless you are a sole director and sole company secretary.
Trust	Each trustee must sign or, if a corporate trustee, then as for a company.
Partnership	Each partner.
Association or registered co-operative	Each office bearer.
Government body	Relevant principal officer/authorised signatory.
Power of Attorney	Relevant authorised signatory(ies).

7. Investor Identification and Supporting Documents

Investor Type	Required Document
All investors	<p><u>FATCA Forms</u></p> <p>Please complete, sign and submit the appropriate document(s) with the Application For New Investment. Please consult your tax adviser to determine the appropriate form(s) to use.</p> <p>US Residents: Internal Revenue Service (“IRS”) Form W-9: https://www.irs.gov/pub/irs-pdf/fw9.pdf</p> <p>Non-US Residents: IRS Form W-8 https://www.irs.gov/pub/irs-pdf/fw8ben.pdf</p>

¹³ If those executing this form are also authorized to transact on this account, please provide a contact phone number. State Street Australia may need to call you back to confirm the authenticity of some types of transactions.

¹⁴ Provide second signature only if required.

9. Explanatory Notes

Description of Investor Types

The table below describes the investor types listed in Section 1 of this Application Form.

Investor Type	Description
Individual and Joint investors	A natural person or persons.
Sole trader	A natural person operating a business under their own name with a registered business name.
Company	A company registered as an Australian public company, an Australian proprietary company, or a foreign company.
Trust	Types of trusts include self-managed superannuation funds, registered managed investment schemes, unregistered wholesale managed investment schemes, government superannuation funds or other trusts (such as family trusts and charitable trusts).
Custodian	A company providing a custodial or depositary service on behalf of a managed investment scheme, superannuation fund, investor-directed portfolio service (IDPS), IDPS-like scheme or managed discretionary account service.
Partnership	A partnership created under a partnership agreement.
Association	Incorporated associations are associations registered under State or Territory based incorporated association statutes. Unincorporated associations are those of persons who are not registered under an incorporated associations statute and thus do not have the legal capacity to enter into agreements. The member(s) of the association seeking to open the account will be deemed to be the legal owner of the account.
Registered co-operative	An autonomous association of persons united voluntarily to meet common economic, social and cultural needs and aspirations through a jointly-owned and democratically-controlled enterprise registered under a registry system maintained by a State or Territory. This investor type can include agricultural businesses such as a dairy co-operative.
Government body	The government of a country, an agency or authority of the government of a country, the government of part of a country or an agency or authority of the government of part of a country.

US Person

- (i) Any natural person resident in the United States;
- (ii) Any partnership or corporation organized or incorporated under the laws of the United States;
- (iii) Any estate of which any executor or administrator is a U.S. person;
- (iv) Any trust of which any trustee is a U.S. person;
- (v) Any agency or branch of a foreign entity located in the United States;
- (vi) Any non-discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a U.S. person;
- (vii) Any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organized, incorporated, or (if an individual) resident in the United States; and
- (viii) Any partnership or corporation if:
 - (A) Organized or incorporated under the laws of any foreign jurisdiction; and
 - (B) Formed by a U.S. person principally for the purpose of investing in securities not registered under the Act, unless it is organized or incorporated, and owned, by accredited investors (as defined in § 230.501(a)) who are not natural persons, estates or trusts.

Application for New Investment

Investor Qualification – Wholesale Client

GMO Australia only accepts investments from “Wholesale Clients” within the meaning of section 761G of the Corporations Act 2001 (Cth). Generally, GMO Australia will only accept applications:

- a) Where the initial application amount is \$500,000 or greater;
- b) From investors who meet the “assets and income test” outlined in section 761G(7)(c); or

The “assets and income test” is established where the investor can provide a certificate issued by a qualified accountant within the last 6 months which certifies that the investor has:

- a gross income of \$250,000 or more per annum in each of the previous two years; or
- net assets of at least \$2.5 million.

- c) From “professional investors” (as defined in section 9 of the Corporations Act), including financial services licensees.

Retail investors may invest in the Trust via a Service Operator. “Service Operators” are generally considered to be Wholesale Clients and include operators of investor-directed portfolio services (“IDPSs”), managed discretionary accounts (“MDAs”) and similar service.
