## U.S. Small Cap Value Strategy

### Performance returns (USD)

ANNUALIZED RETURNS (QUARTER-END)	Quarter-End	YTD	1-Year	3-Year	5-Year	10-Year	Since Inception
U.S. Small Cap Value Strategy (net)	-7.47	-7.47	-2.22	4.80	19.48	-	8.75
U.S. Small Cap Value Strategy (gross)	-7.37	-7.37	-1.77	5.28	20.03	-	9.25
S&P 600 Value +	-9.92	-9.92	-3.24	0.22	16.25	-	7.05
Value Add	+2.44	+2.44	+1.02	+4.57	+3.22	-	+1.70

### MAJOR PERFORMANCE DRIVERS

Global markets diverged again in the first quarter of 2025, with the U.S. underperforming the rest of the world, a reversal of the pattern seen in the fourth quarter of 2024. The environment was characterized by continued trade policy uncertainties and shifting investor sentiment. Within the U.S. the smallest and largest cap names underperformed the broader market, including a faltering Magnificent Seven.

Within small caps the S&P Small Cap 600 Value index underperformed the S&P Small Cap 600 index modestly in the first quarter. While cheap stocks struggled, the portfolio added value by choosing undervalued names that also had good momentum and few alerts, red flags used to identify potential value traps.

Stock selection drove the outperformance in the first quarter. Strong stock selection was broad-based, with value added in 9 of 11 sectors and notable contributions from Consumer Discretionary and Financials.

Sector allocation detracted modestly at the portfolio level. The largest detractors were overweight positioning toward Consumer Discretionary and underweight positioning toward Utilities.

### RISKS

Risks associated with investing in the Strategy may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Smaller Company Risk: smaller companies may have limited product lines, markets, or financial resources, lack the competitive strength of larger companies, have less experienced managers or depend on a few key employees. The securities of companies with smaller market capitalizations often are less widely held and trade less frequently and in lesser quantities, and their market prices often fluctuate more, than the securities of companies with larger market capitalizations. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Composite Inception Date: 31-Jul-19

**Performance Returns:** Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit [www.gmo.com](http://www.gmo.com). **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. Gross returns are presented gross of management fees and any incentive fees if applicable. These returns include transaction costs, commissions, withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. If management and incentive fees were deducted performance would be lower. For example, if, before fees, the strategy were to achieve a 10% annual rate of return above its hurdle rate each year for ten years, and an annual advisory fee of 1% and incentive fee of 20% of net returns above the hurdle rate were charged during that period, the resulting average annual net return (after the deduction of management and incentive fees) would be approximately 7.20%. **GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®).** A Global Investment Performance Standards (GIPS®) Composite Report is available at [www.gmo.com](http://www.gmo.com) by clicking the GIPS® Composite Report link in the documents section of the strategy page. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.

# QUARTERLY INVESTMENT REVIEW

## PRODUCT OVERVIEW

The GMO U.S. Small Cap Value Strategy seeks to generate total return in excess of its benchmark, the S&P Small Cap 600 Value Index, by investing primarily in equities of U.S. companies that are included in the S&P 600 Index or whose market capitalization at the time of investment is less than that of companies in the bottom decile of market capitalization of the MSCI U.S. IMI Index.

The Strategy's investment approach is grounded in the Systematic Equity team's belief that, in the short term, equity markets exhibit exploitable inefficiencies as a result of irrational investor actions, the imperfect flow of information, and the participation of non-economic actors, while in the long-term returns are ultimately driven by economic reality. The Strategy aims to take advantage of these inefficiencies by utilizing a multi-factor valuation model in conjunction with other methods, such as momentum and corporate alerts, to identify undervalued equity securities.

## IMPORTANT INFORMATION

**Benchmark(s):** The S&P 600 Value+ Index is an internally maintained benchmark computed by GMO, comprised of (i) Russell 2000 Value through 3/31/2020, and (ii) S&P SmallCap 600 Value thereafter. The index is internally blended by GMO. S&P does not guarantee the accuracy, adequacy, completeness or availability of any data or information and is not responsible for any errors or omissions from the use of such data or information. Reproduction of the data or information in any form is prohibited except with the prior written permission of S&P or its third party licensors. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.
