Value Add vs. MSCI USA (Gross)	-2.39	-5.13	-10.50	-	-	-	-9.31

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Gross of fees, expenses and transaction costs, if any. If these fees, expenses and costs were included, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee. The Index used for performance reporting purposes changed from S&P Composite 1500 to MSCI U.S.A. Value effective June 30th, 2024.

MAJOR PERFORMANCE DRIVERS

Global equity markets performed well again in the third quarter, despite the fluid global tariff environment and geopolitical uncertainties. The U.S. posted positive returns amid continued optimism around AI and expectations that companies will be able to navigate the real-world impact of trade tensions.

While the MSCI USA Value Index underperformed the MSCI USA Growth Index again in the third quarter, within value, the deep value cohort we aim to capture outperformed across all three of our underlying value models. The Price to Fair Value model, which incorporates both a company's quality and growth prospects in its valuation estimate, was the strongest performer.

Value added in the quarter came from a mix of sector allocation and stock selection decisions. Areas of notable positive stock selection included the Communication Services and Consumer Discretionary sectors, the latter also added value from an overweight sector allocation. Top contributors included a mix of deep value names held and more expensive names not held, including underweight positions in Salesforce (Information Technology) and Philip Morris (Consumer Staples).

Areas where our deep value stock selection struggled included Health Care and Information Technology, where not holding names such as Oracle (Information Technology) and AbbVie (Health Care) hurt performance relative to the broader MSCI USA Value Index.

Portfolio weights, as a percent of equity, for the positions mentioned were: Salesforce (0.0%), Philip Morris (0.0%), Oracle (0.0%), and AbbVie (0.0%).

Inception Date: 13-Dec-22

Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis.

Risks: Risks associated with investing in the Fund may include: (1) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers; (2) Commodities Risk: commodity prices can be extremely volatile, and exposure to commodities can cause the value of the Fund's shares to decline or fluctuate more than if the Fund had a broader range of investments; and (3) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

Net Expense Ratio: 0.39%; Gross Expense Ratio: 0.43% Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2026. Elimination of this reimbursement will result in higher fees and lower performance. Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2025.

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO U.S. Opportunistic Value Fund (the “Fund”) seeks to generate total return by investing primarily in U.S. equities. The Fund measures its performance against the MSCI U.S. Value Index.

GMO’s U.S. Opportunistic Value Fund seeks to profit from our Asset Allocation Team’s top-down insights as to the most attractively valued segment of the U.S. market. Currently, the team finds “deep value” (cheapest 20%) stocks to be truly dislocated in the U.S. This actively managed Fund avoids the “shallow value” stocks, which are expensive relative to their own history, and focuses solely on the deep value names. With this Fund we focus on the U.S. stocks that GMO’s Systematic Equity team identifies as the most undervalued, recognizing that relying on reported financials and index definitions of value can lead investors to misjudge the opportunity.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Comparator Index(es): The MSCI USA Value (Gross) Index is an independently maintained and widely published index comprised of large and mid cap US securities exhibiting overall value style characteristics.
