Major Performance Drivers

- Top-down asset allocation was positive, driven largely by allocating to equities in a rebounding market.
- Security selection was flat, although very strong performance in emerging equities was a highlight.

Long-only equities represented 54.2% of the portfolio on average through the quarter, with 8.2% in Emerging Markets and 7.2% in Emerging Markets ex-China, both with a distinct Value bias, 6.2% in Japan Value, 5.1% in developed ex-U.S. Small Value, 5.2% in Developed ex-U.S., 4.1% in Resource Equity, 4.0% in Quality Cyclical, 5.1% in U.S. Opportunistic Value, and 9.2% in International Opportunistic Value.

The equity portfolio returned 9.6% for the quarter, behind the MSCI ACWI return of 11.0%. Top-down regional exposures had a detrimental impact for the quarter as the U.S. beat Developed ex-U.S., while Emerging Markets lagged Developed Markets. Security selection was flat for the quarter as Value lagged Growth in developed markets but outperformed in emerging markets. Our Emerging Markets portfolio returned 10.9%, again well ahead of the MSCI Emerging Market index return of 7.9%, while the Emerging Markets ex-China portfolio posted 17.6%, also well ahead of the MSCI Emerging ex-China benchmark's 13.0% return. The Japan portfolio posted 7.0%, trailing the TOPIX return of 8.0%, and the Developed ex-U.S. small cap portfolio delivered a 10.7% return, 140 bps ahead of its benchmark. The developed ex-U.S. exposure posted 8.2%, which lagged the MSCI World ex-U.S. index by 230 bps and the MSCI World ex-U.S. Value index by a smaller 40 bps. Quality Cyclical returned 10.9%, 10 bps behind its benchmark, while Resources returned -0.9%, modestly lagging its benchmark in what was a difficult quarter for commodity producers. The U.S. Opportunistic Value exposure returned 10.9%, trailing the S&P Composite 1500 index by 90 bps, and International Opportunistic Value posted 7.6%, behind the MSCI World ex-USA return of 10.6%.

Alternative strategies averaged 33.9% through the quarter, including 7.2% in Systematic Global Macro, 4.2% in Event-Driven, 2.2% in Fixed Income Absolute Return, and 20.3% in Equity Dislocation. Alternative Strategies returned 1.1% for the quarter. Equity Dislocation was down -0.3%, which was a solid result as MSCI ACWI Value lagged MSCI ACWI Growth by 3.5%. Event-Driven was up 4.0%, with the main driver being Broadcom's closure of the VMware acquisition. Fixed Income Absolute Return returned -2.0%, while Systematic Global Macro was down -0.7%, and the collateral gave a nice boost with a 3.3% return for the quarter.

Fixed income represented 11.9% of the portfolio on average through the quarter, including 4.3% in asset-backed securities, 1.3% in high-yield, 3.2% in Emerging Country Debt, and 3.0% in U.S. nominal treasuries. Our fixed income strategies returned 5.1% for the quarter, a little behind the Bloomberg U.S. Aggregate return of 6.8%. Emerging Country Debt, as measured by the J.P. Morgan EMBIG-D index, had an impressive 9.2% return, but our portfolio beat that nicely with a 10.4% return. The High Yield position returned 3.5%, behind the BofA Merrill Lynch U.S. High Yield index return of 7.1%, and asset-backed securities posted 2.9%, trailing the Bloomberg U.S. Securitized index return of 7.3%. It was also a strong quarter for traditional duration and the nominal U.S. treasuries rose 3.6%.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower.

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The Fund seeks to achieve a return in excess of that of its benchmark, the OECD G7 Consumer Price Index, by allocating dynamically across asset classes, free from the constraints of traditional benchmarks. The Fund seeks annualized excess returns of 5% (net of fees) above the OECD G7 Consumer Price Index, over a complete market cycle.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over the long term. GMO's proprietary 7-Year Asset Class Forecasts form the foundation of our investment process, providing a framework to assess the return opportunity embedded in different asset classes. We use that approach to allocate to what we believe are the most attractively priced asset classes.

IMPORTANT INFORMATION

Benchmark(s): The OECD (Organization for Economic Cooperation and Development) CPI (Consumer Price Index) G7 is published monthly by the OECD for the G7 countries of Canada, France, Germany, Italy, Japan, the U.K. and the U.S. The index is compiled by aggregating the national consumer price indices in each period, using estimates of household private final consumption expenditure ("HFCE") as weights. The HFCE for each country is converted into a common currency (U.S. Dollars) using purchasing power parities ("PPPs") which are rates of currency conversion that eliminate the differences in price levels between countries. The PPP used in the zone estimates relate specifically to HFCE and are not the same as the PPP for gross domestic product, which are more commonly available. The benchmark return is published on a one month lag. Until this data is available all benchmark return calculations assume a 0% estimate for the missing month.

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

GMO UK Limited Authorised and Regulated by the Financial Conduct Authority Registered no 4658801 England. GMO Netherlands is registered with the AFM.

The above Fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the U.S. Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly, in the U.S. or to any U.S. Person, unless the securities are registered under the Act or an exemption from the registration requirements of the Act is available. A U.S. Person is defined as (a) any individual who is a citizen or resident of the U.S. for federal income tax purposes; (b) a corporation, partnership, or other entity created or organized under the laws of or existing in the U.S.; (c) an estate or trust the income of which is subject to U.S. federal income tax regardless of whether such income is effectively connected with a U.S. trade or business.
