Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Gross of fees, expenses and transaction costs, if any. If these fees, expenses and costs were included, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** The portfolio is actively-managed, is not managed relative to a benchmark and uses the Index for performance comparison purposes only and, where applicable, to compute a performance fee.

MAJOR PERFORMANCE DRIVERS

Securitized Product total returns were broadly positive during Q1 of 2025. Agency mortgages delivered positive total and excess returns over the quarter as did securitized credit sectors such as Commercial Mortgage-Backed Securities (CMBS), Collateralized Loan Obligations (CLO), and Student Loans. Shorter duration Asset-Backed Securities (ABS) also had positive total returns, but excess returns were mixed. Base rate Treasury yields fell over the quarter as risk-off sentiment increased demand for Treasuries. Local widening across securitized credit sectors led to some underperformance relative to agency mortgage products during Q1. Lower coupon MBS modestly outperformed higher coupon products across tenors. Within securitized credit, down the stack profiles continued to outperform senior peers within respective sectors. BBB rated CMBS and BBB and BB rated CLO were notable outperformers. In corporate credit markets, High Yield (HY) underperformed Investment Grade (IG) this quarter on both total and excess basis – both sectors posted modest positive total returns while suffering from negative excess returns during the period. High Yield spreads widened while longer duration IG held in relatively better.

Excess returns (vs. swaps) in structured products were mostly negative in the first quarter of 2025. Credit Risk Transfer (CRT) deals on residential mortgages reported negative returns, ranging from -1.0% to -0.3% on various tranches. In the residential space, Non-Agency Residential Mortgage-Backed Securities (RMBS) had positive total and excess performance across profiles. Single Family Rental (SFR), a somewhat hybrid member of the RMBS cohort, underperformed this quarter across credit tranches on an excess basis while posting a positive total return. In CMBS, a longer duration asset, overall performance was up +0.3% in excess on the quarter, lower rated BBB posting +1.4% in excess returns, outpacing Last Cash Flow (LCF) AAA profiles, which posted +0.1%. Shorter duration fixed rate Auto and Card registered flat to slightly negative excess returns on the quarter. Floating rate ABS excess performance from Student Loans was positive at +0.4%. Overall performance in the CLO market was up +0.5% in excess during the quarter; excess returns in the lower part of the capital structure were higher, with BBB posting +0.6%.

Inception Date: 3-Oct-11

Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis.

Risks: Risks associated with investing in the Fund may include: (1) Credit Risk: the risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner; (2) Market Risk-Asset-Backed Securities Risk: the market price of asset-backed securities, like that of other fixed income investments with complex structures, can decline for a variety of reasons, including investor uncertainty about their credit quality and the reliability of their payment streams. Payment streams associated with asset-backed securities held by the Fund depend on many factors (e.g., the cash flow generated by the assets backing the securities, deal structure, and creditworthiness of any credit-support provider), and a problem in any of these factors can lead to a reduction in the payment stream GMO expected the Fund to receive when the Fund purchased the asset-backed security; and (3) Illiquidity Risk: low trading volume, lack of a market maker, large position size, or legal restrictions may limit or prevent the Fund from selling particular securities or closing derivative positions at desirable prices. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

Net Expense Ratio: 0.48%; Gross Expense Ratio: 0.51% Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025. Elimination of this reimbursement will result in higher fees and lower performance. Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2024.

QUARTERLY INVESTMENT REVIEW

MAJOR PERFORMANCE DRIVERS CONT.

Absolute performance in GMO Opportunistic Income portfolio was positive, driven by gains in the Duration Management positions as well as RMBS, Student Loan, and CMBS securitized sectors.

Approximately 68% of the portfolio was rated AAA with 77% rated single A or higher. 22% of the portfolio was invested in CMBS, with 16.5% in RMBS, 16% in Student Loans, 7% in CLO securities, 5% in Small Balance Commercial, 3.5% in Autos, and 6% in other ABS.

(Ratings are lowest of Moody's, Standard & Poor's, Fitch, DBRS, and Kroll. No rating is used if none of the five listed provides a rating.)

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO Opportunistic Income Fund seeks capital appreciation and current income by investing in what we believe are the most attractively priced sectors and securities in the structured finance marketplace. The Structured Products team utilizes both top-down and bottom-up security selection methods to identify what we believe are the best opportunities from a pure risk/return perspective.

The structured finance asset class offers a range of opportunities due to both its inherently fragmented nature and the inefficiencies caused by market segmentation and structural anomalies. We believe that the marketplace's complexity, volatile historical performance, and very high number of discrete investment opportunities create considerable potential for alpha generation. Our relatively unconstrained approach to risk diversification, sub-sector allocation and security selection is designed to identify and benefit from those opportunities.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Comparator Index(es): The Bloomberg U.S. Securitized + Index is an internally maintained benchmark computed by GMO, comprised of (i) the J.P. Morgan U.S. 3 Month Cash through 12/30/2016 and (ii) the Bloomberg U.S. Securitized thereafter.

The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.
