High Yield Strategy (gross)	4.07	5.50	11.12	10.95	7.09	-	6.07
Markit iBoxx USD Liquid High Yield	3.68	4.87	10.68	9.80	5.64	-	4.79
Value Add	+0.27	+0.37	-0.11	+0.63	+0.95	-	+0.77

### MAJOR PERFORMANCE DRIVERS

The Markit iBoxx USD Liquid High Yield Index returned 3.7% in Q2, supported by declining interest rates across the curve and tightening credit spreads, which led to positive excess returns over government bonds.

The High Yield portfolio outperformed the benchmark during the period, driven primarily by allocations to Carry (via long positions in CDX HY) and Quality (via BB bonds). Additionally, the allocation to Total Return Swaps, referencing the benchmark index, also contributed positively, as the discount to the NAV improved (decreased) relative to the start of the period. However, the intermittent position in the Short Volatility sleeve underperformed relative to other factor exposures.

During the quarter, the portfolio reduced its exposure to Quality and opportunistically shifted allocations to Carry.

At quarter end, the portfolio was invested in liquid portfolio products and high yield bonds.

### RISKS

Risks associated with investing in the Strategy may include: (1) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; (2) Market Risk - Fixed Income Investments: the market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market's uncertainty about the value of a fixed income investment (or class of fixed income investments); and (3) Credit Risk: the risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Composite Inception Date: 31-Jan-17

**Performance Returns:** Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit [www.gmo.com](http://www.gmo.com). **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. Gross returns are presented gross of management fees and any incentive fees if applicable. These returns include transaction costs, commissions, withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. If management and incentive fees were deducted performance would be lower. For example, if, before fees, the strategy were to achieve a 10% annual rate of return above its hurdle rate each year for ten years, and an annual advisory fee of 1% and incentive fee of 20% of net returns above the hurdle rate were charged during that period, the resulting average annual net return (after the deduction of management and incentive fees) would be approximately 7.20%. **GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®).** A Global Investment Performance Standards (GIPS®) Composite Report is available at [www.gmo.com](http://www.gmo.com) by clicking the GIPS® Composite Report link in the documents section of the strategy page. GIPS® is a registered trademark owned by CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.

# QUARTERLY INVESTMENT REVIEW

## PRODUCT OVERVIEW

The GMO High Yield Strategy seeks to generate total return in excess of that of its benchmark, the Markit iBoxx USD Liquid High Yield Index, by applying a systematic, factor-based approach to portfolio construction. It is designed to capture alpha from top-down sources of risk premia, taking advantage of structural market inefficiencies, while maintaining a liquid portfolio. Our top-down, data-driven approach (in what is still largely a fundamentally managed asset class) brings a unique perspective that allows us to allocate capital across a range of high yield instruments in an effort to achieve optimal risk-adjusted returns in excess of the Strategy's benchmark.

## IMPORTANT INFORMATION

**Benchmark(s):** The Markit iBoxx USD Liquid High Yield Index is an independently maintained index consisting of liquid USD high yield bonds, selected to provide a balanced representation of the broad USD high yield corporate bond universe.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

For investors in Asia-Pac and Australia, these materials are intended for Institutional and Wholesale Investor Use Only.

## ABOUT GMO
