Performance returns (USD)

ANNUALIZED RETURNS (QUARTER-END)	Quarter-End	YTD	1-Year	3-Year	5-Year	10-Year	Since Inception
International Developed Equity Allocation Fund (net)	6.92	31.68	26.05	27.60	14.56	9.27	5.76
International Developed Equity Allocation Fund (gross)	7.09	32.29	26.83	28.39	15.27	9.94	6.41
MSCI EAFE	4.77	25.14	14.99	21.70	11.16	8.17	4.93
Value Add	+2.16	+6.54	+11.06	+5.90	+3.41	+1.10	+0.83

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Gross of fees, expenses and transaction costs, if any. If these fees, expenses and costs were included, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 3.75% to 2024 annual performance. Performance for other periods, including this date, was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Additional information is available upon request.

MAJOR PERFORMANCE DRIVERS

- The portfolio is aligned with the benchmark from a top-down regional perspective, investing solely in developed ex-U.S. equities. The portfolio does, however, have an overweight of almost 7% to Japan, and this had a positive impact for the quarter as MSCI Japan outperformed MSCI EAFE. The portion of the portfolio with an emphasis on deep value also had a positive impact, as value strongly outperformed.
 - Security selection was positive as broad developed ex-U.S. comfortably beat the benchmark.
- Developed ex-U.S. equities accounted for all the equity exposure of the portfolio for the quarter, and regional allocations had no impact on relative performance versus the MSCI EAFE benchmark. The dedicated Japan Value position and emphasis on value were both helpful. Security selection was helpful for the quarter, and the portfolio had a strong positive return, outperforming the MSCI EAFE Index return of 4.8%. Underweight positions in Novo Nordisk (Denmark Health Care) and SAP (Germany Information Technology), along with overweight positions in Banco Bilbao (Spain Financials), Prosus (Netherlands Consumer Discretionary), and Deutsche Bank (German Financials) made up the top five biggest individual contributors at the total portfolio level. On the flipside, overweight positions in Saint-Gobain (France Industrials) and Sanofi (France Health Care), along with underweight positions in ASML (Netherlands Information Technology), Softbank (Japan Communication Services), and Sony (Japan Consumer Discretionary) made up the top five biggest detractors.

Portfolio weights, as a percent of equity, for the positions mentioned were: Novo Nordisk (0.0%), SAP (0.0%), Banco Bilbao (2.6%), Prosus (2.1%), Deutsche Bank (2.2%), Saint-Gobain (1.8%), Sanofi (2.1%), ASML (0.0%), Softbank (0.0%), and Sony (0.1%).

Inception Date: 5-Jun-06

Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis.

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets; and (3) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

Net Expense Ratio: 0.64%; Gross Expense Ratio: 0.69% Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2026. Elimination of this reimbursement will result in higher fees and lower performance. Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2025.

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO International Developed Equity Allocation Fund seeks to generate total return greater than that of the MSCI EAFE Index.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value but mean reverts to appropriate valuation levels over a complete market cycle. Using GMO's 7-Year Asset Class Forecasts, the Fund seeks to allocate to areas of the global equity markets we believe are most attractively valued. Our approach combines the best of GMO's top-down Asset Allocation views and bottom-up equity research to identify mispricings at both the asset class and individual security levels. The Fund allocates to equity strategies that are actively managed by other GMO investment teams with expertise and experience in security selection within their respective markets. The Fund is allowed to invest up to 10% (at time of purchase) in emerging market equities.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Benchmark(s): The MSCI EAFE (Europe, Australasia, and Far East) Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of international large and mid capitalization stocks. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.
