What is this product?

Type GMO Investments ICAV (the "ICAV") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

The investment objective of GMO Equity Dislocation Investment Fund (the "Fund") is to seek high total return. The Fund pursues its investment objective primarily by taking long and short positions in equity securities in markets throughout the world that the Investment Adviser believes exhibit substantial deviations from their fair value. In doing so, the Fund seeks to be near neutral in respect of its exposure to global equity markets. A long position will increase in value if the price of the underlying asset goes up; a short position will increase in value if the price of the underlying asset goes down; and vice versa. The Fund may invest in equities (shares) and related securities, money market instruments, currencies and derivatives. The Fund may also invest in other investment funds to pursue the investment objective of this Fund. The investment adviser selects the securities the Fund buys or sells based on its evaluation of issuers' published financial information and corporate behaviour (such as profit warnings, share issuance or repurchase, and director dealings in company stock), sustainability and other ESG (environmental, social and governance) criteria, securities' prices, commodities' prices, equity and bond markets, the overall global economy, and governmental policies. In selecting long and short positions for the Fund, the investment adviser uses a combination of investment methods to identify securities the Investment Adviser believes have greater or lesser return potential, respectively, relative to other securities. The Investment Adviser seeks to add value by looking beyond traditional value metrics to understand a security's intrinsic value, taking into consideration an issuer's quality and growth prospects, and using additional indicators of mispricing to gain a differentiated view into issuer fundamentals. The factors considered and models used by the investment adviser may change over time. The Fund is actively managed. The Fund uses the FTSE 3-Month Treasury Bill Index, NASDAQ and a composite of the Long MSCI ACWI Value Index and Short MSCI ACWI Growth Index for performance comparison purposes only (the "Comparator Indices"). Although the Fund's securities may be components of the Comparator Indices, the Fund's investment manager may or may not invest in securities not included in the Comparator Indices. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used for investment purposes and for the reduction of risk and cost and the generation of additional capital or income. You may sell your shares usually on each business day (generally, a day on which banks in Dublin and London and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. The Fund is a sub-fund of the ICAV. The prospectus and periodic reports are prepared in respect of the ICAV. The assets and liabilities of each sub-fund of the ICAV are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Fund may apply to exchange shares in the Fund for shares in another sub-fund of the ICAV as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a medium to long-term period with a moderate level of volatility.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

Performance Scenarios

The figures shown include all the costs of the fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 5 years			
Example Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

Favourable	What you might get back after costs	GBP 12,370	GBP 14,280
	Average return each year	23.74%	7.38%

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of fund over the last 10 years. The fund performance includes performance of Class A USD which is used as a proxy where historical performance of Class L GBP is not available, and prior to that a composite of the Long MSCI All Country World Index ("ACWI") Value Index (USD) and Short MSCI ACWI Growth Index (USD), over the last 10 years. Markets could develop very differently in the future and the future performance of the fund may be materially different from that of the Long MSCI ACWI Value Index (USD) and Short MSCI ACWI Growth Index (USD).

- Unfavourable scenario

This type of scenario occurred for an investment between November 2016 and November 2021
- Moderate scenario

This type of scenario occurred for an investment between February 2019 and February 2024
- Favourable scenario

This type of scenario occurred for an investment between January 2021 and January 2026

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

You will not face financial loss should Waystone Management Company (IE) Limited default on its obligation. In the event of insolvency of the depositary, State Street Custodial Services (Ireland) Limited, Dublin 2, the Fund's assets are protected and are not subject to a claim by the depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, any such loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	GBP 244	GBP 1,105
Annual cost impact (*)	2.4%	2.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be -0.91% before costs and -3.29% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Entry Charge: 0%	GBP 0
Exit costs	Exit Charge: 0%	GBP 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.42% of the value of your investment per year. This is an estimate based on actual costs over the last year.	GBP 43
Transaction costs	0.89% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	GBP 91
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	The performance fee for this class is 20% of the amount by which the net asset value per share before the deduction of the performance fee exceeds the hurdle, Barclays GBP Overnight Index, at the end of a performance fee period.	GBP 110

This illustrates costs in relation to the notional value of the PRIIP.
