What is this product?

Type GMO Funds plc (the "Company") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

GMO Global Real Return (UCITS) Fund (the "Fund") aims to achieve a return in excess of its benchmark, the OECD G7 Consumer Price Index. The Fund may invest in a wide range of assets, including long and short positions in shares and related securities, debt securities, money market instruments, currencies, instruments relating to commodities indices, real estate investment trusts and related derivatives. A long position will increase in value if the price of the underlying asset goes up; a short position will increase in value if the price of the underlying asset goes down; and vice versa. Such assets may be located, listed or traded anywhere in the world, may have any market capitalisation and may belong to any industry sector. At any given time, the Fund may be invested in some or all of these asset classes and may take long or short positions in these asset classes. The investment manager uses asset class forecast models to determine the allocation among asset classes and will re-allocate among asset classes on an opportunistic basis. The investment manager relies on a combination of models to evaluate and select individual assets, countries and currencies. The investment manager may also employ fundamental investment techniques in allocating among asset classes and in selecting assets, countries and currencies for the portfolio. The factors considered and models used by the investment manager may change over time. The Fund may invest in debt securities, which shall include investment grade, non-investment grade and unrated debt securities of any credit quality. Such debt securities may be supranational, government or corporate securities and may be fixed or floating rate securities. The Fund may also invest in other investment funds to pursue the investment objective of this Fund. The Fund is actively managed. The Fund does not seek to track its benchmark and so has discretion as to the investments it may make. The Fund uses the MSCI ACWI Index for performance comparison purposes only (the "Comparator Index"). Although the Fund's securities may be components of the Comparator Index, the Fund's investment manager may or may not invest in securities not included in the Comparator Index. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used extensively for investment purposes and for the reduction of risk and cost and the generation of additional capital or income. You may sell your shares usually on each business day (generally a day on which banks in Dublin and London and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. This document describes a sub-fund of the Company. The prospectus and periodic reports are prepared in respect of the entire Company. The assets and liabilities of each sub-fund of the Company are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Company may apply to exchange shares in the Company for shares in another sub-fund of the Company as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a 5 to 10 year period with a moderate level of volatility.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

Performance Scenarios

The figures shown include all the costs of the fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 is invested

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | GBP 160 | GBP 847 |
| Annual cost impact (*) | 1.6% | 1.6% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 3.65% before costs and 2.08% after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|---|--------------------------|
| Entry costs | Entry Charge: 0% | GBP 0 |
| Exit costs | Exit Charge: 0% | GBP 0 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 0.91% of the value of your investment per year. This is an estimate based on actual costs over the last year. | GBP 92 |
| Transaction costs | 0.66% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | GBP 67 |
| Incidental costs taken under specific conditions | | |
