EMERGING COUNTRY DEBT

OVERVIEW

The GMO Emerging Country Debt Fund's objective is total return in excess of the J.P. Morgan Emerging Markets Bond Index Global Diversified (EMBIG-D). Since its inception in 1994, the Fund has employed a broad opportunity set, investing across all forms of emerging market debt, including securities, derivatives, and private instruments, in both hard and local currencies. The investable universe covers a wide range of issuer types (sovereigns, corporates, project finance) and credit qualities defined by credit rating agencies, ranging from high credit quality (e.g., AA) to default (e.g., D), though the portfolio's overall duration, currency, country, and credit quality exposures are managed mindful of the EMBIG-D.

RISK PROFILE (5-YEAR TRAILING)

Alpha (Jensen's)	5.62
Beta	1.09
R Squared	0.93
Sharpe Ratio	0.34
Standard Deviation	10.35

ANNUAL EXPENSES (%)

Net Expense Ratio	0.62
Gross Expense Ratio	0.62
Adjusted Expense Ratio	0.55

Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least 30 June 2027. Elimination of this reimbursement will result in higher fees and lower performance.
Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated 30 June 2026.
Adjusted expense ratio excludes certain direct and indirect investment related costs, such as dividend and interest expense on short sales and interest expense incurred through entering into reverse repurchase agreements. The total of these costs, where applicable, can be found in the most recent prospectus.

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.**

Risks: Risks associated with investing in the Fund may include: (1) Credit Risk: the risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner; (2) Market Risk - Fixed Income Investments: the market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market's uncertainty about the value of a fixed income investment (or class of fixed income investments); and (3) Illiquidity Risk: Low trading volume, lack of a market maker, large position size, or legal restrictions may limit or prevent the Fund from selling particular securities or closing derivative positions at desirable prices. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Benchmark(s): The J.P. Morgan EMBI (Emerging Markets Bond) Index Global Diversified + is an internally maintained benchmark computed by GMO, comprised of (i) the J.P. Morgan EMBI+ Index through 12/31/1999, (ii) the J.P. Morgan EMBI Index Global through 2/28/2020, and the J.P. Morgan EMBI Index Global Diversified (iii) thereafter.

The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

GLOSSARY

Characteristics: Turnover is as of the most recent quarter-end.This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide. **Credit Ratings:** The credit ratings above may encompass emerging debt, developed rates, and asset-backed exposures. Ratings for the developed rates exposures are derived by taking the lowest issue level rating between Standard and Poor's & Moody's scores and rolling these up into the portfolio's overall quality brackets. Ratings for emerging debt are determined using the middle of the Moody's, S&P, and Fitch ratings when all three are available, the lower of the two ratings when two ratings are available, and the sole rating when only one rating is available. Ratings for the asset-backed exposures are derived by using the lowest rating among rating agencies at the issue level. Final credit ratings are expressed based upon Standard and Poor's ratings scale. Standard & Poor's rates securities from AAA (highest quality) to C (lowest quality), and D to indicate securities in default; some securities are not rated and are included in the NR category. BB and below are considered below investment grade securities. Please refer to our website for additional information: https://www.gmo.com/americas/benchmark-disclaimers/
Risk Statistics: Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.
Please refer to https://www.gmo.com/americas/glossary-of-terms/ for additional portfolio characteristic definitions.

ABOUT GMO

ADDITIONAL GLOSSARY OF TERMS

Coupon
The annual income received from a fixed-income security, expressed as a percentage of the par value of the security and par weighted on portfolio level.

Credit (%)
The proportion of a mutual fund's total net assets that is invested in credit instruments—such as corporate bonds, securitized debt, or other credit-related securities—expressed as a percentage. This metric indicates the fund's exposure to credit markets and associated credit risk.

Effective Duration
A measure of a portfolio's price sensitivity to interest rate changes, including expected changes in cash flows caused by embedded options. The higher the effective duration, the higher the sensitivity to interest rate changes.

Maturity
A weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

Modified Duration
A measure of a portfolio's price sensitivity to changes in interest rates. It estimates the percentage change in price for a 1% (100 basis point) change in yield, assuming all other factors remain constant.

Option-Adjusted Spread
Option-adjusted spread (OAS) is the spread over a benchmark yield curve that remains after accounting for the value of embedded options.

Spread
The difference between the yield on a bond or credit instrument and the yield on a benchmark security of similar maturity, typically a government bond. It reflects the additional compensation investors receive for taking on credit risk and is usually expressed in basis points.

Spread Duration
A measure of the portfolio's sensitivity to changes in credit spreads.

Weighted Average Life
A measure of average number of years until the principal of the securities is expected to be fully repaid.

Yield to Maturity
Represents the weighted average annualized return an investor would earn if the ETF's underlying bonds were held to maturity, assuming all interest payments are made as scheduled, bonds are held to maturity, coupons are reinvested at the same rate.

Yield to Worst
The lowest potential yield an investor can earn on a bond without the issuer defaulting, taking into account any call, put, or other early redemption features.
