## OVERVIEW

The GMO Alternative Allocation Fund seeks to generate annualized returns above the FTSE 3-Month Treasury Bill Index over a complete market cycle by investing in a diversified portfolio of underlying alternative strategies, all run by GMO teams.

Underlying strategies are expected to include but are not limited to: merger arbitrage/event-driven, global macro, fixed income absolute return, asset allocation long/short, market neutral equities, high yield, and systematic put writing strategies. The Fund's success will be linked to the following differentiated features.

## CUMULATIVE TOTAL RETURNS (USD, NET OF FEES, %)

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit [www.gmo.com](http://www.gmo.com).** The portfolio is actively-managed, is not managed relative to a benchmark and uses the Index for performance comparison purposes only and, where applicable, to compute a performance fee. The performance information for all periods prior to January 31, 2025, was achieved prior to the change in the Fund's investment objective and principal investment strategies.

**Risks:** Risks associated with investing in the Fund may include: (1) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; (2) Derivatives and Short Sales Risk: the use of derivatives involves the risk that their value may not change as expected relative to changes in the value of the underlying assets, pools of assets, rates, currencies or indices. Derivatives also present other risks, including market risk, illiquidity risk, currency risk, credit risk, and counterparty risk; and (3) Leveraging Risk: the use derivatives and securities lending creates leverage. Leverage increases the Funds losses when the value of its investments (including derivatives) declines. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

## ANNUAL EXPENSES (%)

Net Expense Ratio	1.69
Gross Expense Ratio	2.03
Adjusted Expense Ratio	0.84

Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025. Elimination of this reimbursement will result in higher fees and lower performance.

Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2024.

Adjusted expense ratio excludes certain investment related costs, such as dividend and interest expense on short sales and interest expense incurred through entering into reverse repurchase agreements. The total of these costs, where applicable, can be found in the most recent prospectus.
