

ALTERNATIVE ALLOCATION CLASS R6

OVERVIEW

The GMO Alternative Allocation Fund aims to generate positive total return while enhancing portfolio diversification through low correlation to traditional risk assets. The Fund offers broad exposure across multiple asset classes liquid alternative categories, including merger arbitrage/event-driven, equity market neutral, global macro, relative value quality, and volatility. We believe the Fund's success is driven by the following key features:

The GMO Asset Allocation team allocates capital based on risk and opportunity at the portfolio level. This is especially true at valuation extremes, when investors need risk management the most. The underlying investment strategies dynamically alter exposures and risk levels in an alpha-proportional manner.

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com. The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee. The performance information for all periods prior to January 31, 2025, was achieved prior to the change in the Fund's investment objective and principal investment strategies. Performance is shown for both the applicable share class and the representative share class in the Fund.

Risks: Risks associated with investing in the Fund may include: (1) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; (2) Derivatives and Short Sales Risk: the use of derivatives involves the risk that their value may not change as expected relative to changes in the value of the underlying assets, pools of assets, rates, currencies or indices. Derivatives also present other risks, including market risk, illiquidity risk, currency risk, credit risk, and counterparty risk; and (3) Leveraging Risk: the use derivatives and securities lending creates leverage. Leverage increases the Funds losses when the value of its investments (including derivatives) declines. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC.
