

RESOURCES CLASS I PROFILE

INVESTMENT OPPORTUNITY

- Long-term supply and demand dynamics in natural resource markets favor upward price trends – demand growth is being driven by population growth and the development of emerging markets, while supplies of cheap, easy to access natural resources are declining.
- Resource equities have a long-term record of strong performance and have historically traded at a discount to broader global equities.
- Resource equities have performed well historically during inflationary periods.
- Diversification is among the most compelling arguments for investing in resource equities due to their low-to-negative correlations with the broad equity market over the medium and long term.
- Resource equities are particularly inefficient and provide investors with significant alpha opportunities.

GMO APPROACH

Targeted Universe Definition:	We identify businesses that will benefit from a broad rise in resource prices (e.g., refiners, paper companies, etc.).
Resource Diversification:	We diversify across resource segments and take a holistic view of the opportunity set, including the opportunity in clean energy.
Value Focus:	Our proprietary valuation model has been effective in the resources sector. The success of our strategy does not depend on forecasting commodity prices.
Global Scope & Lack of Sizing Bias:	We will invest across the capitalization spectrum and in opportunities from around the globe.
Investing with Conviction:	GMO's firmwide philosophy of investing with conviction over the long-term is consistent with success in the resources sector.
ESG:	Environmental, Social, and Governance (ESG) factors are integrated holistically into our investment process.

STRATEGIC ALLOCATION TARGETS

Actual allocation targets set at a more granular level.

ENERGY/METALS COMPANIES TRADE AT A DISCOUNT

Source: S&P, MSCI, Moody's, GMO

Valuation metric is a combination of P/E (Normalized Historical Earnings), Price to Book Value, and Dividend Yield. The Fund considers the "natural resources sector" to include companies that own, produce, refine, process, transport, and market natural resources and companies that provide related equipment, infrastructure, and services.

INVESTING IN COMPANIES EARNS AN EQUITY RISK PREMIUM

RESOURCES CLASS I

OVERVIEW

The GMO Resources Fund seeks to deliver total return by investing in the equities of companies in the natural resources sector. Long-term supply and demand dynamics in natural resource markets favor upward price trends – demand growth is being driven by population growth and the development of emerging markets, while supplies of cheap, easy to access natural resources are declining. To harness this trend, we focus on identifying companies in public equity markets that we believe will benefit from a broad rise in resource prices, across a diversified portfolio of energy, metals, agriculture, and water.

We can invest globally across the capitalization spectrum, including emerging markets, which allows us to identify attractive investment opportunities wherever they may be.

ANNUAL EXPENSES (%)

Net Expense Ratio	0.82
Gross Expense Ratio	0.82

Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least 30 June 2027. Elimination of this reimbursement will result in higher fees and lower performance.

Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated 30 June 2026.

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee. Performance is shown for both the applicable share class and the representative share class in the Fund.

Risks: Risks associated with investing in the Fund may include: (1) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers; (2) Commodities Risk: commodity prices can be extremely volatile, and exposure to commodities can cause the value of the Fund's shares to decline or fluctuate more than if the Fund had a broader range of investments; and (3) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Index(es): The MSCI ACWI (All Country World) Commodity Producers Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of listed large and mid capitalization commodity producers within the global developed and emerging markets. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

GLOSSARY

This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide. **Region Exposures:** Based on equity holdings.

Risk Statistics: Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.

Please refer to <https://www.gmo.com/americas/glossary-of-terms/> for additional portfolio characteristic definitions.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
