

ETF ADVANTAGES

An actively managed, concentrated ETF investing in what the team believes to be high-quality companies beyond the U.S., targeting long-term growth and lower volatility.

Daily holdings transparency

Potential tax efficiency

Intraday liquidity

No minimum investment

WHY GMO INTERNATIONAL QUALITY

- Focus on profitability, stability, and financial strength
- Integrated systematic screening plus fundamental analysis
- Valuation discipline avoids overvalued stocks
- More balanced sector exposure vs. the U.S. market

PORTFOLIO ROLE & FIT

- Non-U.S. equity allocation with a quality tilt
- Diversifies away from a concentrated U.S. market
- Complements U.S. quality holdings with global diversification
- Built for long-term investors comfortable with short-term volatility

WHY INVEST NOW

- Diversify away from an increasingly concentrated U.S. market
- International quality companies have historically delivered strong returns with lower risk
- Valuation focus can enhance downside protection and return potential
- Invest across a broad range of businesses the team believes to be of high quality

HIGH-QUALITY WINS OVER TIME, WITH LOWER RISK

April 1928–December 2025 | Source: GMO

Bear market is the drop in prices of at least 20% from any peak over a period of at least 3 months. GMO Quality is the highest quality 1/3 of the U.S. market. Value within Quality is the low valuation half of that, relative to the broader U.S. market.

KEY DIFFERENTIATORS

BUILT ON STRENGTH

Focus on profitability, stability, and financial strength

INTEGRATED PROCESS

Combines systematic screening with forward-looking fundamental analysis

VALUATION DISCIPLINE

Seeks to avoid overvalued stocks and invests in companies with favorable risk/reward potential

BALANCED EXPOSURE

More balanced sector exposure vs. the U.S. market

HIGH-CONVICTION PORTFOLIO

Concentrated portfolio of ~34 holdings vs. ~752 in the MSCI World ex USA Index

GMO INTERNATIONAL QUALITY

OVERVIEW

The GMO International Quality ETF seeks to generate total return by investing primarily in non-U.S. equities the Focused Equity team believes to be of high quality.

The team believes that companies with established track records of historical profitability and strong fundamentals – high quality companies – are able to outgrow the average company over time and are therefore worth a premium price. The GMO International Quality ETF's disciplined approach uses both quantitative and fundamental techniques to assess the relative quality and valuation of non-U.S. companies and aims to exploit a long-term investment horizon while withstanding short-term volatility in an actively managed ETF format.

CUMULATIVE TOTAL RETURNS (USD, NET OF FEES, %)

	MTD	QTD	YTD	2025	2024
NAV	2.03	8.82	1.71	16.90	-8.42

Market Price Inception Date: 28-Oct-24

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com. Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee.

ANNUAL EXPENSES (%)

Expense Ratio	0.60
---------------	------

Expense Ratio is equal to the Fund's Total Annual Operating Expenses set forth in the Fund's most recent prospectus dated 30 June 2026.

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Non-U.S. Investment Risk: the market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.

IMPORTANT INFORMATION

An investor should consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the funds prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Index(es): The MSCI World ex-USA Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of global developed markets, excluding the United States. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The GMO ETFs are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.

GLOSSARY

Based on equity holdings. **Region Exposures:** Based on equity holdings.

Risk Statistics: Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.

Please refer to <https://www.gmo.com/americas/glossary-of-terms/> for additional portfolio characteristic definitions.

GMO | PARTNERS IN INVESTING

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes.
