

EMERGING COUNTRY DEBT UCITS EUR CLASS H

OVERVIEW

The GMO Emerging Country Debt UCITS Fund’s objective is total return in excess of the J.P. Morgan Emerging Markets Bond Index Global Diversified (EMBIG-D). Since its inception, the Fund has employed a broad opportunity set, investing across all forms of emerging market debt, including securities, derivatives, and private instruments, in both hard and local currencies. The investable universe covers a wide range of issuer types (sovereigns, corporates, project finance) and credit qualities defined by credit rating agencies, ranging from high credit quality (e.g., AA) to default (e.g., D), though the portfolio’s overall duration, currency, country, and credit quality exposures are managed mindful of the EMBIG-D.

This is a marketing communication and a financial promotion. Past performance does not predict future returns.

RISKS

Risks associated with investing in the Fund may include: (1) Credit Risk: the risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner; (2) Market Risk - Fixed Income Investments: the market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market’s uncertainty about the value of a fixed income investment (or class of fixed income investments); and (3) Illiquidity Risk: Low trading volume, lack of a market maker, large position size, or legal restrictions may limit or prevent the Fund from selling particular securities or closing derivative positions at desirable prices. For a more complete discussion of these and other risks, please consult the Fund's Prospectus.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. A dilution adjustment may be applied on a subscription or redemption of shares to reflect the costs of dealing in the Fund’s assets. The return on investment in the Fund may increase or decrease as a result of currency fluctuations if an investor’s investment is made in a currency other than that used in the past performance calculation. If the Fund holds assets in currencies other than the base currency of the Fund and/or you invest in a share class that is denominated in a different currency than the base currency of the Fund, subject to any hedging at share class or Fund level, the value of your investment may be impacted by changes in the relative prices of the relevant currencies. The use of financial derivative instruments by the Fund may result in increased gains or losses within the Fund.

IMPORTANT INFORMATION

This is a marketing communication and a financial promotion. This is not a contractually binding document. An investor should consider all of the Fund's characteristics including the investment objectives, risks, charges and expenses before investing. This and other important information can be found in the Fund's prospectus and the KIID/PRIIPs KID. To obtain a prospectus and the KIID/PRIIPs KID please visit www.gmo.com. Read the prospectus and the KIID/PRIIPs KID carefully before investing and do not base any final investment decision on this communication alone.

Benchmark(s):

The Fund is a sub-fund of GMO Investments ICAV, an umbrella fund with segregated liability between sub-funds, which is authorised by the Central Bank of Ireland (the "Central Bank") as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended. The authorisation of the ICAV is not an endorsement or guarantee of the ICAV by the Central Bank. Neither the Central Bank nor the UK's Financial Conduct Authority has approved and or takes responsibility for the contents of this document or for the financial soundness of the Fund or for the ICAV. THE ICAV is an EEA UCITS scheme which is recognised under Part 6 of The Collective Investment Schemes (Amendment etc.) (EU Exit) Regulations 2019, as amended.

GMO UK Limited Authorised and Regulated by the Financial Conduct Authority Registered no 4658801 England. GMO Netherlands is registered with the AFM.

The Fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the U.S. Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly, in the U.S. or to any U.S. Person, unless the securities are registered under the Act or an exemption from the registration requirements of the Act is available. A U.S. Person is defined as (a) any individual who is a citizen or resident of the U.S. for federal income tax purposes; (b) a corporation, partnership, or other entity created or organized under the laws of or existing in the U.S.; (c) an estate or trust the income of which is subject to U.S. federal income tax regardless of whether such income is effectively connected with a U.S. trade or business.

Investors and potential investors can also obtain the prospectus and key investor information, and a summary of investor rights and information on access to collective redress mechanisms, in English and local languages where the Fund is registered, under the Literature section at the following website:

<https://www.gmo.com/europe/product-index-page/fixed-income/emerging-country-debt-strategy/emerging-country-debt-ucits-fund/>

Please note that the management company of the Fund may decide to terminate the arrangements made for the marketing of the Fund in one or more EU member states pursuant to the UCITS marketing passport in accordance with the procedure provided for under the applicable laws that implement Article 93a of Directive 2009/65/EC (the UCITS Directive).

A full list of fees and charges applied to investment can be found in the prospectus and in the KIID/PRIIPs KID, available at: <https://www.gmo.com/europe/product-index-page/fixed-income/emerging-country-debt-strategy/emerging-country-debt-ucits-fund/>

GLOSSARY

Characteristics: Turnover is as of the most recent quarter-end. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide. **Credit Ratings:** The credit ratings above may encompass emerging debt, developed rates, and asset-backed exposure. Ratings for core portfolio holdings are derived by using the middle rating from Standard & Poor's, Moody's, and Fitch. Ratings for core holdings were adjusted during the January 2021 reporting period to conform with index provider methodology. Ratings for the emerging debt portion of the portfolio are derived by applying the Standard and Poor's or Moody's issue-level ratings (sequentially), and the S&P LT Foreign currency (FC) country issuer rating for the FC debt securities and/or S&P LT Local currency (LC) country issuer rating for LC securities where a security is not rated by either of the abovementioned credit rating agencies. Final credit ratings are expressed based upon Standard and Poor's ratings scale. Standard & Poor's rates securities from AAA (highest quality) to C (lowest quality), and D to indicate securities in default; some securities are not rated (NR). BB and below are considered below investment grade securities. Please refer to our website for additional information: <https://www.gmo.com/americas/benchmark-disclaimers/> **Risk Statistics:** Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio. Please refer to <https://www.gmo.com/americas/glossary-of-terms/> for additional portfolio characteristic definitions.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. ADDITIONAL GLOSSARY OF TERMS

Coupon

The annual income received from a fixed-income security, expressed as a percentage of the par value of the security and par weighted on portfolio level.

Credit (%)

The proportion of a mutual fund's total net assets that is invested in credit instruments—such as corporate bonds, securitized debt, or other credit-related securities—expressed as a percentage. This metric indicates the fund's exposure to credit markets and associated credit risk.

Effective Duration

A measure of a portfolio's price sensitivity to interest rate changes, including expected changes in cash flows caused by embedded options. The higher the effective duration, the higher the sensitivity to interest rate changes.

Maturity

A weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

Modified Duration

A measure of a portfolio's price sensitivity to changes in interest rates. It estimates the percentage change in price for a 1% (100 basis point) change in yield, assuming all other factors remain constant.

Spread

The difference between the yield on a bond or credit instrument and the yield on a benchmark security of similar maturity, typically a government bond. It reflects the additional compensation investors receive for taking on credit risk and is usually expressed in basis points.

Spread Duration

A measure of the portfolio's sensitivity to changes in credit spreads.

Weighted Average Life

A measure of average number of years until the principal of the securities is expected to be fully repaid.

Yield to Maturity

Represents the weighted average annualized return an investor would earn if the ETF's underlying bonds were held to maturity, assuming all interest payments are made as scheduled, bonds are held to maturity, coupons are reinvested at the same rate.
