## Horizons Strategy

### Performance returns (USD)

| ANNUALIZED RETURNS (QUARTER-END) | Quarter-End | YTD   | 1-Year | 3-Year | 5-Year | 10-Year | Since Inception |
|----------------------------------|-------------|-------|--------|--------|--------|---------|-----------------|
| Horizons Strategy (net)          | 12.64       | 9.36  | -      | -      | -      | -       | 7.03            |
| Horizons Strategy (gross)        | 12.68       | 9.44  | -      | -      | -      | -       | 7.15            |
| MSCI ACWI ex Fossil Fuels        | 12.34       | 10.18 | -      | -      | -      | -       | 9.46            |
| Value Add                        | +0.30       | -0.82 | -      | -      | -      | -       | -2.43           |

### MAJOR PERFORMANCE DRIVERS

Stocks rallied in the second quarter, despite continued geopolitical and tariff uncertainty. In this environment the portfolio modestly outperformed the MSCI ACWI ex Fossil Fuels Index. Excluding fossil fuels benefited both the portfolio and the index as oil prices fell in the second quarter and the Energy sector underperformed the broader MSCI ACWI Index.

In the quarter, companies with higher green revenues and lower total emissions outperformed. These tailwinds were reflected in positive contributions from stock selection. Cameco (Canada Energy) was the top contributor, as one of the world's largest uranium producers the stock has benefitted from an upsurge in interest in nuclear power. Semiconductors & Semiconductor Equipment were also top contributors from a mix of overweight allocation and stock selection, with NVIDIA (U.S. Information Technology) also contributing to the portfolio's lower total emissions profile.

### RISKS

Risks associated with investing in the Strategy may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Non-U.S. Investment Risk: the market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Composite Inception Date: 30-Sep-24

**Performance Returns:** Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit [www.gmo.com](http://www.gmo.com). **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. Gross returns are presented gross of management fees and any incentive fees if applicable. These returns include transaction costs, commissions, withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. If management and incentive fees were deducted performance would be lower. For example, if, before fees, the strategy were to achieve a 10% annual rate of return above its hurdle rate each year for ten years, and an annual advisory fee of 1% and incentive fee of 20% of net returns above the hurdle rate were charged during that period, the resulting average annual net return (after the deduction of management and incentive fees) would be approximately 7.20%. **GMO does not yet have a GIPS-compliant report for this composite since it has not managed accounts in this strategy for a full year.**

# QUARTERLY INVESTMENT REVIEW

## PRODUCT OVERVIEW

The GMO Horizons Strategy is a global strategy reflecting the view that the world economy is transitioning to a lower carbon future, and that this process will create opportunities for investors to generate excess returns. The Strategy seeks to capture these opportunities and mitigate related risks through significant exposure to impactful climate solutions and reduced total carbon footprint (direct and indirect), while controlling for exposure to Environmental, Social, and Governance (ESG) risks.

The GMO Horizons Strategy is a fully systematic and diversified solution that provides:

- Materially lower total emissions than the benchmark as measured using scope 1 emissions and GMO's proprietary Indirect Emissions model, which estimates the indirect emissions embodied in end-to-end company value chains
- High levels of exposure to companies where revenue is derived from selling green products and services
- ESG risk mitigation via better ESG characteristics than the benchmark

## IMPORTANT INFORMATION

**Benchmark(s):** The MSCI ACWI ex Fossil Fuels Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index based on the MSCI ACWI Index, its parent index, and includes large and mid-cap stocks across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index represents the performance of the broad market while excluding companies that own oil, gas and coal reserves. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

For investors in Asia-Pac and Australia, these materials are intended for Institutional and Wholesale Investor Use Only.

## ABOUT GMO
