

HORIZONS INVESTMENT FUND

OVERVIEW

The GMO Horizons Investment Fund is a global portfolio reflecting the view that the world economy is transitioning to a lower carbon future, and that this process will create opportunities for investors to seek excess returns. The Fund seeks to capture these opportunities and mitigate related risks through reduced total carbon footprint (direct and indirect) and significant exposure to impactful climate solutions, while controlling for exposure to Environmental, Social, and Governance (ESG) risks.

The Fund promotes environmental characteristics by: i) favouring companies that generate “green revenue” within the meaning of the proprietary definition set out in the prospectus; ii) maintaining its total (scope 1 + indirect emissions) carbon footprint at or below 50% of the carbon footprint of the MSCI ACWI ex Fossil Fuels Index; and iii) excluding from its investment universe: 1) companies that the Investment Adviser determines to be associated with one or more major environmental controversies, a list of which is maintained at <https://www.gmo.com/horizons-environmental-controversies> 2) companies included on certain third-party exclusion lists which may change from time to time; and 3) sectors of the economy that the Investment Adviser determines are environmentally or socially detrimental, such as thermal coal, tar sands, tobacco, and controversial munitions.

The sustainability indicators that are used to measure the attainment of the environmental or social characteristics promoted by the Fund are disclosed in the prospectus and reported against annually within the annual report of GMO Investments ICAV. Except where otherwise disclosed in the Prospectus, the Fund is not managed to achieve any targets with respect to the ESG Outcomes, Climate-Focused Outcomes and Stewardship Activity set out within this ESG report. Accordingly, the data herein is for information only. This is a marketing communication and a financial promotion. Past performance does not predict future performance.

Due to a difference in data sources used for this report, the reported numbers may differ slightly from data used for portfolio management and other Horizons marketing materials.

ESG OUTCOMES

COMMENTARY

GMO has developed a proprietary ESG score by integrating inputs from two distinct ESG data sources. The process begins with the IFRS SASB Materiality Map, which identifies crucial environmental and social factors. The GMO investment team’s insights further refine these factors. Within that framework, MSCI data evaluates company exposures and their management of ESG topics, while LSEG Data & Analytics supplies raw data on company performance in these areas. A blend of statistical and fundamental analysis weights these ESG topics, linking them to the Quality factor. We believe this approach yields a score that offers a more accurate reflection of ESG risks at both the company and portfolio levels.

The MSCI ESG score of 6.7 was better than the benchmark score of 6.6.
The GMO ESG score of 6.9 was better than the benchmark score of 6.8.

As of 30 September 2025

MSCI ESG ratings are according to MSCI ESG Research data and ratings. The portfolio has 99% coverage as of September 2025. The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy. GMO ESG Scores are based on a proprietary weighting model based on the IFRS SASB Materiality Map, fundamental and statistical analysis. Data inputs are derived from MSCI ESG Research and LSEG Data & Analytics (formerly Refinitiv). MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. Please visit <https://www.gmo.com/americas/benchmark-disclaimers/> to review the complete benchmark disclaimer notice.

GMO ENGAGEMENT CASE STUDY

Company	Industrials company
Dates	23 June 2025 - 7 July 2025
Objective	Provide updates on sale of subsidiary, risk oversight and safety testing.
Actions	The company kept 25% of the subsidiary that was held responsible for a fire at a large residential building. The subsidiary's failure has been attributed to a poor safety culture. The company introduced a product compliance team that includes two members of management, and rolls up to the board's Audit and Risk committee. The company has been encouraging a strong culture of compliance and obligation, being actioned through unannounced compliance audits.
Outcomes	Board is more attuned to issues of culture in the strategic component of acquisition. No ongoing concern related to the fire as it appears the company has addressed the root causes.

HORIZONS INVESTMENT FUND

GLOSSARY OF TERMS

MSCI Pillar Scores: Show ESG pillar and aggregate scores for the current quarter end. Environmental, Social and Governance pillar scores are the weighted average of all key issues that fall under each pillar. The Unadjusted Score shows the contribution of each pillar to the aggregate unadjusted ESG score. The letter grade corresponds to the industry-adjusted aggregate which ranges from AAA (>8.571) to CCC (<1.429). The industry-adjusted aggregate normalizes the weighted average key issue score relative to peers.

MSCI ESG Score Trend: Tracks the industry-adjusted MSCI ESG Score for the strategy or fund and its Index for the most recent and two preceding years.

GMO ESG Score: Shows the contribution of each ESG pillar to the unadjusted ESG score using GMO's proprietary ESG model.

GMO updated the GMO ESG score from v2.1 to v3.0 in March 2024. Prior to the change, the score incorporated information from three distinct data sources. In March 2024, we removed one of the data sources as it was not providing strong and accurate ESG signals. As a result of this update, the ESG report uses GMO ESG Score v2.1 until the end of 2023 and GMO ESG Score v3.0 for 2024 and on.

GMO ESG Score Trend: Tracks the industry-adjusted GMO ESG Score for the strategy or fund and its Index for the most recent and two preceding years.

Weighted Average Carbon Intensity (WACI): Shows the portfolio weighted average of the greenhouse gas emission intensity of portfolio companies. Scope 1 and scope 2 emissions data is sourced from S&P Trucost. Data gaps are filled with MSCI data for total coverage of 99% as of 30 September 2025. Indirect Emissions are sourced from GMO Indirect Emissions Model calculations, which uses data from S&P Trucost, the Organization for Economic Co-operation and Development (OECD), and Factset.

WACI is calculated as follows:

$$WACI = \sum \frac{GMO\ investment_i}{covered\ AUM} * \frac{Scope\ 1_i + Scope\ 2_i}{Revenues_i}$$

and

$$WACI = \sum \frac{GMO\ investment_i}{covered\ AUM} * \frac{Scope\ 1_i + GMO\ Indirect\ Emissions_i}{Revenues_i}$$

Weighted Average Green Revenue (WAGR): Shows the portfolio weighted average of the proportion of portfolio company revenues that are considered green as defined by the FTSE Green Revenue Taxonomy. Coverage was 99% as of 30 September 2025. WAGR is calculated as follows:

$$WAGR = \sum \frac{GMO\ investment_i}{covered\ AUM} * Green\ Revenue\ \%_i$$

SFDR: the EU Sustainable Finance Disclosures Regulation (2019/2088), Finance Disclosures as amended, on sustainability-related disclosures in the financial services sector, as such may be amended, supplemented or replaced from time to time.

Science-based Targets: Represent greenhouse gas emission reduction targets that are in line with what the latest climate science deems necessary to limit global warming to 1.5C above pre-industrial levels. The Science-based targets initiative was founded by CDP, the United Nations Global Compact and others to provide target validation services. Data sourced from the Science-based Targets initiative via MSCI. Science-based Targets are calculated as follows:

$$SBTi\ as\ \% \ of\ emissions = \sum \frac{GMO\ investment_i}{covered\ EVIC_i} * Emissions$$

TPI Management Score: Represents an assessment of a company's governance of greenhouse gas emissions and the risks and opportunities arising from the low-carbon transition. TPI only provides assessments for high-emitting industries. We had portfolio coverage of 46% as of 30 September 2025. The assessment is conducted by the LSE Transition Pathway Initiative Centre established at the Grantham Research Institute on Climate Change and the Environment. Data is sourced from the TPI website. The TPI Management Score is calculated as follows:

$$Market\ value\ wtd\ avg\ TPI\ Score = \sum \frac{GMO\ investment_i}{covered\ AUM} * TPI\ Score_i$$

$$Emissions\ wtd\ avg\ TPI\ Score = \sum \frac{GMO\ investment_i * emissions_i}{covered\ EVIC_i} * TPI\ Score_i$$

Portfolio Carbon Footprint (PCF): Shows the portfolio weighted average of the greenhouse gas emissions intensity per million dollars of enterprise value including cash (MCAP) of companies in the portfolio. Scope 1 and 2 emissions data are sourced from S&P Trucost. Data gaps are filled with MSCI data for total coverage of 99% as of 30 September 2025. Indirect Emissions sourced from GMO Indirect Emissions Model calculations, which uses data from S&P Trucost, the Organization for Economic Co-operation and Development (OECD) and Factset. PCF is calculated as follows:

$$PCF = \sum_i^n \frac{GMO\ investment_i}{covered\ AUM} * \frac{Scope\ 1_i + Scope\ 2_i}{MCAP_i}$$

and

$$PCF = \sum_i^n \frac{GMO\ investment_i}{covered\ AUM} * \frac{Scope\ 1_i + GMO\ Indirect\ Emissions_i}{MCAP_i}$$

HORIZONS INVESTMENT FUND

IMPORTANT INFORMATION

This is a marketing communication and a financial promotion. This is not a contractually binding document. An investor should consider all of the Fund's characteristics including the investment objectives, risks, charges and expenses before investing. This and other important information can be found in the Fund's prospectus and the KIID/PRIIPs KID. To obtain a prospectus and the KIID/PRIIPs KID please visit www.gmo.com. Read the prospectus and the KIID/PRIIPs KID carefully before investing and do not base any final investment decision on this communication alone.

Benchmark(s): The MSCI ACWI ex Fossil Fuels Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index based on the MSCI ACWI Index, its parent index, and includes large and mid-cap stocks across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index represents the performance of the broad market while excluding companies that own oil, gas and coal reserves. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

The Fund is a sub-fund of GMO Funds plc, an umbrella fund with segregated liability between sub-funds, which is authorised by the Central Bank of Ireland (the "Central Bank") as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended. The authorisation of GMO Funds plc is not an endorsement or guarantee of GMO Funds plc by the Central Bank. Neither the Central Bank nor the UK's Financial Conduct Authority has approved and or takes responsibility for the contents of this document or for the financial soundness of the Fund or for GMO Funds plc. GMO Funds plc is an EEA UCITS scheme which is recognised under Part 6 of The Collective Investment Schemes (Amendment etc.) (EU Exit) Regulations 2019, as amended.

GMO UK Limited Authorised and Regulated by the Financial Conduct Authority Registered no 4658801 England. GMO Netherlands is registered with the AFM.

The Fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the U.S. Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly, in the U.S. or to any U.S. Person, unless the securities are registered under the Act or an exemption from the registration requirements of the Act is available. A U.S. Person is defined as (a) any individual who is a citizen or resident of the U.S. for federal income tax purposes; (b) a corporation, partnership, or other entity created or organized under the laws of or existing in the U.S.; (c) an estate or trust the income of which is subject to U.S. federal income tax regardless of whether such income is effectively connected with a U.S. trade or business.

Investors and potential investors can also obtain the prospectus and key investor information, and a summary of investor rights and information on access to collective redress mechanisms, in English and local languages where the Fund is registered, at the following website:

<https://www.gmo.com/europe/product-index-page/equities/horizons-strategy/gmo-horizons-investment-fund/>

Please note that the management company of the Fund may decide to terminate the arrangements made for the marketing of the Fund in one or more EU member states pursuant to the UCITS marketing passport in accordance with the procedure provided for under the applicable laws that implement Article 93a of Directive 2009/65/EC (the UCITS Directive).

A full list of fees and charges applied to investment can be found in the prospectus and in the KIID/PRIIPs KID, available at:

<https://www.gmo.com/europe/product-index-page/equities/horizons-strategy/gmo-horizons-investment-fund/>

GMO has adopted a framework in relation to SFDR which gives further information on the Fund's SFDR classification and the integration of sustainability risk in GMO's investment decision making processes. A copy of the framework can be found at ([sustainable-finance-disclosure-regulation-framework_gmo-funds-plc.pdf](#)).
