

DOMESTIC RESILIENCE ETF

OVERVIEW

The GMO Domestic Resilience ETF seeks total return by investing in equities the Focused Equity team believes are poised to benefit as companies bring industrial production back onshore and the United States aims to strengthen its position in a changing world.

The team believes that companies in key sectors, including Manufacturing & Automation, Transportation & Logistics, Energy & Materials, and Defense, are well-positioned to benefit from American reindustrialization.

The GMO Domestic Resilience ETF’s disciplined approach to security selection utilizes time-tested GMO principles emphasizing company quality and valuation to select securities with superior risk-adjusted return characteristics and aims to benefit from a long-term investment horizon in an actively managed ETF format.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com. Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee.

Expense Ratio is equal to the Fund’s Total Annual Operating Expenses set forth in the Fund’s most recent prospectus dated October 28, 2025.	

Risks: Risks associated with investing in the Fund may include: (1) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund’s performance more than if the Fund invested in the securities of a larger number of issuers; (2) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund’s shares; and (3) Management and Operational Risk: the risk that GMO’s investment techniques will fail to produce desired results, including annualized returns and annualized volatility. For a more complete discussion of these and other risks, please consult the Fund’s Prospectus.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.

GLOSSARY

Country Exposures: Based on equity holdings. **Region Exposures:** Based on equity holdings.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.
