An investor should consider the fund's investment objectives, risks, charges, and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus, please visit www.gmo.com. Read the prospectus carefully before investing. An investment in the fund involves risk, including possible loss of principal. The GMO ETFs are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.

INVESTMENT OBJECTIVE

- To generate positive total return, while typically maintaining an exposure to equity assets of between 40% and 80%.

WHY GMO DYNAMIC ALLOCATION

- In the short term, markets are inefficient and driven by fear, greed, or simply herding. This provides opportunities to dynamically shift portfolio allocations to avoid capital-destroying bubbles and take advantage of attractively priced bargains.
- Investors are typically not dynamic enough in changing portfolio allocations, whether through a lack of confidence or expertise, or simply paralyzed by tax-inefficient vehicles. The GMO Dynamic Allocation ETF provides a straightforward solution to help overcome these obstacles.
- Today, valuation dislocations have created two particularly compelling opportunities:
 - Emphasize non-U.S. equities over U.S. equities
 - Emphasize value equities over growth equities

NON-U.S. EQUITY VALUATIONS ARE MORE ATTRACTIVE

An investor should carefully consider the fund's investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund's prospectus. To obtain a prospectus please visit www.gmo.com. Read the prospectus carefully before investing.

Risks associated with investing in the Strategy may include: (1) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. (2) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (3) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

The GMO ETFs are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.

GMO DYNAMIC ALLOCATION

OVERVIEW

The GMO Dynamic Allocation ETF seeks positive total return. GMO intends to allocate dynamically across asset classes and strategies, while typically maintaining an exposure to equity assets of between 40% and 80%.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over a complete market cycle.

GMO's proprietary 7-Year Asset Class Forecasts form the foundation of our investment process, providing a framework to assess the return opportunity embedded in different asset classes. We use that insight to allocate to what we believe are the most attractively priced asset classes. We also seek to add value through security selection within both traditional and alternative asset classes.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com. Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.

ANNUAL EXPENSES (%)

Net Expense Ratio	0.50
Gross Expense Ratio	0.73

Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least 28 October 2026. Elimination of this reimbursement will result in higher fees and lower performance.

GLOSSARY

Based on equity holdings. **Region Exposures:** Based on equity holdings.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.

Please refer to <https://www.gmo.com/americas/glossary-of-terms/> for additional portfolio characteristic definitions.
