

## INVESTMENT OBJECTIVE

- Aims to generate consistent income and preserve capital through active management
- Invests in high-quality, short Collateralized Loan Obligations (“CLOs”) paired with short-duration U.S. Treasuries
- Targets effective duration of less than one year to maintain liquidity and minimize risk

## WHY GMO ULTRA-SHORT INCOME

- Leverages GMO’s valuation-driven fixed income expertise for security selection
- Offers flexible liquidity management – free from redemption gates, constraints, and liquidity fees
- Allocates capital to the most liquid, high-quality assets to pursue enhanced returns with low volatility

## INVESTORS CAN ENHANCE CASH EFFICIENCY BY LADDERING SHORT-DURATION ASSETS

GMO Ultra Short Income

**An investor should carefully consider the fund’s investment objectives, risks, charges and expenses before investing. This and other important information can be found in the fund’s prospectus. To obtain a prospectus please visit [www.gmo.com](http://www.gmo.com). Read the prospectus carefully before investing.**

Risks associated with investing in the Strategy may include: (1) Market Risk - Fixed Income Investments: The market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market’s uncertainty about the value of a fixed income investment (or class of fixed income investments). (2) Market Risk-Asset-Backed Securities Risk: The market price of asset-backed securities, like that of other fixed income investments with complex structures, can decline for a variety of reasons, including investor uncertainty about their credit quality and the reliability of their payment streams. Payment streams associated with asset-backed securities held by the Fund depend on many factors (e.g., the cash flow generated by the assets backing the securities, deal structure, and creditworthiness of any credit-support provider), and a problem in any of these factors can lead to a reduction in the payment stream GMO expected the Fund to receive when the Fund purchased the asset-backed security. (3) Credit Risk: The risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

The GMO ETFs are distributed in the United States by Foreside Fund Services LLC. GMO and Foreside Fund Services LLC are not affiliated.

## FACTS

**Ticker** ..... GMOC
