What is this product?

Type GMO Investments ICAV (the "ICAV") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

GMO Quality Select Investment Fund (the "Fund") seeks total return by investing in equities and equity-related securities of companies the Investment Adviser believes to be of high quality. A high quality company is generally one that the Investment Adviser believes has an established business that will deliver a high level of return on past investments and that will utilise cash flows in the future by making investments with potential for high levels of return on capital or by returning cash to shareholders through dividends, share buybacks, or other mechanisms. The Fund will be managed to maintain a portfolio-level carbon footprint that is below the level of that of the MSCI World Index. The Fund may make security investments in companies the stocks of which are listed or traded on Regulated Markets anywhere in the world. The Investment Adviser excludes from the investment universe of the Fund: (i) companies that appear on Norges Bank's exclusion list; and (ii) companies determined by the Investment Adviser to be in the following industries: fossil fuels, tobacco, alcohol, gambling, adult entertainment, and controversial munitions. The Fund reserves the right to make tactical allocations of up to 20 per cent. of its Net Asset Value to investments in cash and debt securities. The Fund uses the MSCI World Index and the S&P 500 Index for performance comparison purposes only (together, the "Comparator Indices"). Although the Fund's securities may be components of the Comparator Indices, the Fund's investment manager may or may not invest in securities not included in the Comparator Indices. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used for the reduction of risk and cost and the generation of additional capital or income. You may sell your shares usually on each business day (generally a day on which banks in Dublin and London and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. The Fund is a sub-fund of the ICAV. The prospectus and periodic reports are prepared in respect of the ICAV. The assets and liabilities of each sub-fund of the ICAV are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Fund may apply to exchange shares in the Fund for shares in another sub-fund of the ICAV as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a medium to long-term period with a moderate level of volatility.

What are the risks and what could I get in return?

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency to the base currency of the fund, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

| Recommended holding period: 5 years | | | |

This type of scenario occurred for an investment between March 2020 and March 2025

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

You will not face financial loss should Waystone Management Company (IE) Limited default on its obligation. In the event of insolvency of the depositary, State Street Custodial Services (Ireland) Limited, Dublin 2, the Fund's assets are protected and are not subject to a claim by the depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, any such loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | EUR 72 | EUR 517 |
| Annual cost impact (*) | 0.7% | 0.7% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 13.38% before costs and 12.65% after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
