

ULTRA-SHORT INCOME

OVERVIEW

The GMO Ultra-Short Income Strategy aims to generate current income while preserving capital. The Strategy invests in a diversified portfolio of low-duration, high-quality fixed income securities, including U.S. Treasuries, collateralized loan obligations ("CLOs"), repurchase agreements, and other investment-grade assets. Managed by GMO's Short Duration Strategies team, the Strategy aims to offer flexible and efficient cash management by strategically deploying capital to the most liquid, high-quality opportunities to seek to enhance returns with low volatility.

Risks: Risks associated with investing in the Strategy may include: (1) Market Risk - Fixed Income Investments: The market price of a fixed income investment can decline due to a number of market-related factors, including rising interest rates and widening credit spreads or decreased liquidity stemming from the market's uncertainty about the value of a fixed income investment (or class of fixed income investments); (2) Market Risk-Asset-Backed Securities Risk: The market price of asset-backed securities, like that of other fixed income investments with complex structures, can decline for a variety of reasons, including investor uncertainty about their credit quality and the reliability of their payment streams. Payment streams associated with asset-backed securities held by the Fund depend on many factors (e.g., the cash flow generated by the assets backing the securities, deal structure, and creditworthiness of any credit-support provider), and a problem in any of these factors can lead to a reduction in the payment stream GMO expected the Fund to receive when the Fund purchased the asset-backed security; and (3) Credit Risk: The risk that the issuer or guarantor of a fixed income investment or the obligor of an obligation underlying an asset-backed security will be unable or unwilling to satisfy its obligation to pay principal and interest or otherwise to honor its obligations in a timely manner. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. **GMO does not yet have a GIPS-compliant report for this composite since it has not managed accounts in this strategy for a full year.**

ULTRA-SHORT INCOME

IMPORTANT INFORMATION

Benchmark(s): The FTSE 3-Month Treasury Bill Index is an independently maintained and widely published index comprised of short-term U.S. Treasury bills.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

For private bank intermediaries in Singapore and Hong Kong, these materials are intended for institutional and Accredited/Professional Investors Use Only.

GLOSSARY

Fixed Income Characteristics: Yield (i.e., Yield-to-Worst) is internally calculated as the weighted average yield on the cash bonds over the total market value of the portfolio. Average Credit Rating is a market value weighted measure of bond holdings. **Credit Ratings:** The credit ratings above may encompass emerging debt, developed rates, and asset-backed exposure. Ratings for core portfolio holdings are derived by using the middle rating from Standard & Poor's, Moody's, and Fitch. Ratings for core holdings were adjusted during the January 2021 reporting period to conform with index provider methodology. Ratings for the emerging debt portion of the portfolio are derived by applying the Standard and Poor's or Moody's issue-level ratings (sequentially), and the S&P LT Foreign currency (FC) country issuer rating for the FC debt securities and/or S&P LT Local currency (LC) country issuer rating for LC securities where a security is not rated by either of the abovementioned credit rating agencies. Final credit ratings are expressed based upon Standard and Poor's ratings scale. Standard & Poor's rates securities from AAA (highest quality) to C (lowest quality), and D to indicate securities in default; some securities are not rated (NR). BB and below are considered below investment grade securities. Please refer to our website for additional information: <https://www.gmo.com/americas/benchmark-disclaimers/>

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
