MAJOR PERFORMANCE DRIVERS

Global equity markets started the year with positive absolute returns across regions, then fell after the U.S. and Israel decided to attack Iran, ending the quarter with all regions posting negative returns. In January and February, emerging markets and developed markets outside the U.S. were the strongest performers. However, those markets were most directly exposed to disruptions in the trade of energy, commodities, and other critical products from the Middle East and were the worst performers in March.

Amid the market volatility, the portfolio underperformed the MSCI ACWI ex Fossil Fuels Index. The biggest headwind in the quarter was the strong performance of companies with high levels of emissions, which the portfolio avoids. While stocks with the highest levels of green revenue outperformed the market, those with moderately high green revenues underperformed, and the aggregate green revenue exposure was not enough to offset the avoidance of high emissions.

Stock selection in the U.S. was the biggest headwind, including selection in Information Technology, Energy, Materials, and Industrials. Information Technology was also a challenge more broadly, including underweight positions in top detractors, Samsung Electronics (Korea) and ASML Holding (Netherlands).

China and U.S. Health Care were areas of positive stock selection. Top contributors also included overweight positions in Lynas Rare Earths Limited (Materials), Equinix (Real Estate), and Cameco (Energy).

RISKS

Risks associated with investing in the Fund may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Market Disruption and Geopolitical Risk: geopolitical and other events (e.g., wars, pandemics, sanctions, terrorism) often disrupt securities markets and adversely affect the general economy or particular economies and markets. Those events, as well as other changes in non-U.S. and U.S. economic and political conditions, could exacerbate other risks or otherwise reduce the value of the Fund's investments. For a more complete discussion of these and other risks, please consult the Fund's Prospectus.

Performance Returns: Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Gross of fees, expenses and transaction costs, if any. If these fees, expenses and costs were included, performance would be lower. A dilution adjustment may be applied on a subscription or redemption of shares to reflect the costs of dealing in the Fund's assets. The return on investment in the Fund may increase or decrease as a result of currency fluctuations if an investor's investment is made in a currency other than that used in the past performance calculation. If the Fund holds assets in currencies other than the base currency of the Fund and/or you invest in a share class that is denominated in a different currency than the base currency of the Fund, subject to any hedging at share class or Fund level, the value of your investment may be impacted by changes in the relative prices of the relevant currencies. The use of financial derivative instruments by the Fund may result in increased gains or losses within the Fund.

PRODUCT OVERVIEW

The GMO Horizons Investment Fund is a global portfolio reflecting the view that the world economy is transitioning to a lower carbon future, and that this process will create opportunities for investors to seek excess returns. The Fund seeks to capture these opportunities and mitigate related risks through reduced total carbon footprint (direct and indirect) and significant exposure to impactful climate solutions, while controlling for exposure to Environmental, Social, and Governance (ESG) risks.

The GMO Horizons Investment Fund is a fully systematic and diversified solution that provides:

- Materially lower total emissions than the MSCI ACWI ex-Fossil Fuels Index as measured using scope 1 emissions and GMO's proprietary Indirect Emissions model, which estimates the indirect emissions embodied in end-to-end company value chains
- High levels of exposure to companies where revenue is derived from selling green products and services
- ESG risk mitigation via better ESG characteristics than the benchmark
