BENCHMARK-FREE ALLOCATION PROFILE

INVESTMENT OPPORTUNITY

Over long cycles, static balanced portfolios tend to provide attractive returns relative to risks. Markets, however, are inefficient, and asset prices often become disconnected from their long-term fair values leaving static portfolios susceptible to expensive assets and weak returns for extended periods. A valuation-sensitive, dynamic approach can improve long-term risk adjusted return and mitigate drawdowns.

GMO APPROACH

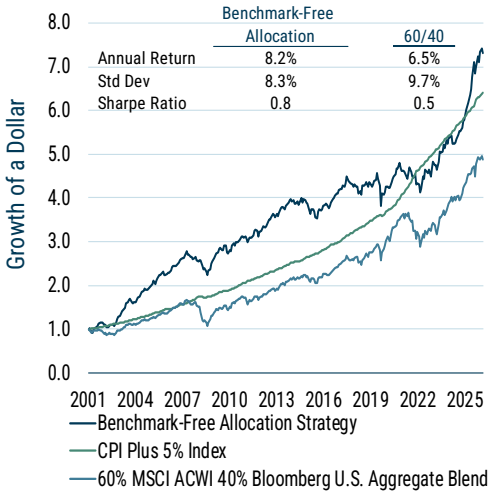

Valuation Discipline We believe that the price paid for an asset is a critical driver of investment outcomes, making objective and disciplined valuation assessment essential

Dynamic Allocation We actively adjust exposures across and within asset classes based on valuation signals; therefore, the portfolio continually adapts to market conditions.

Exploit Dislocations: We take full advantage of market dislocations, including designing new strategies to capitalize on them as needed.

Broad Toolkit: We allocate across a spectrum of strategies spanning equities, rates, credit, and diverse alternative strategies. We are able to target specific regions, countries, styles, cohorts, and asset types to meet objectives and represent the best opportunities available in a particular environment.

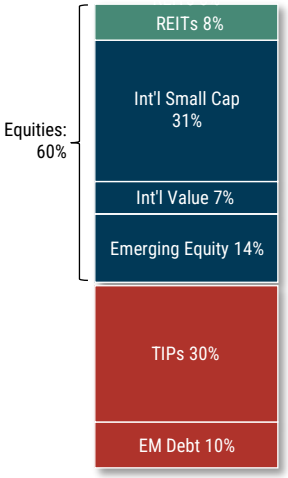

BENCHMARK-FREE ALLOCATION STRATEGY HAS DELIVERED SOLID RISK-ADJUSTED RETURNS

As of 9/30/26 | Source: GMO
Inception date: 7/31/01
The chart above shows the past performance of the Benchmark-Free Allocation Composite (the "Composite"). Prior to January 1, 2012, the accounts in the Composite served as the principal component of a broader real return strategy. Beginning January 1, 2012, accounts in the composite have been managed as a standalone investment.

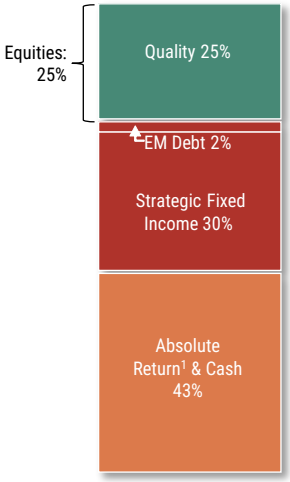

WILLING TO BE DYNAMIC AND UNCONVENTIONAL

JULY 2003: UNCONVENTIONAL

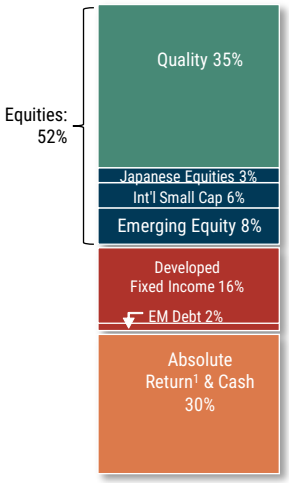

- Naked U.S. large cap
- Naked corporate and nominal Treasuries

AUGUST 2008: DEFENSIVE

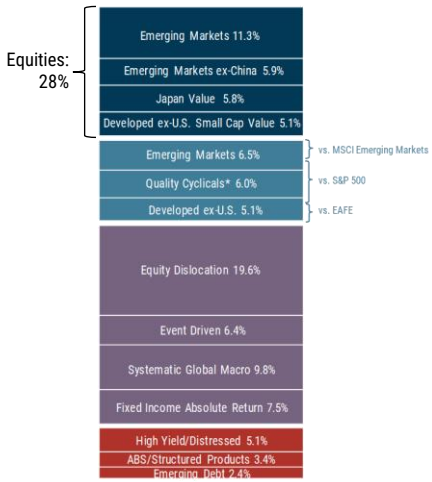

- Pure Quality play in equity
- 75% in absolute return and bonds

APRIL 2009: RE-INVESTING WHEN TERRIFIED

- Increased equity weight
- Dedicated Japan equity exposure

DECEMBER 2021: FACING A GLOBAL GROWTH BUBBLE

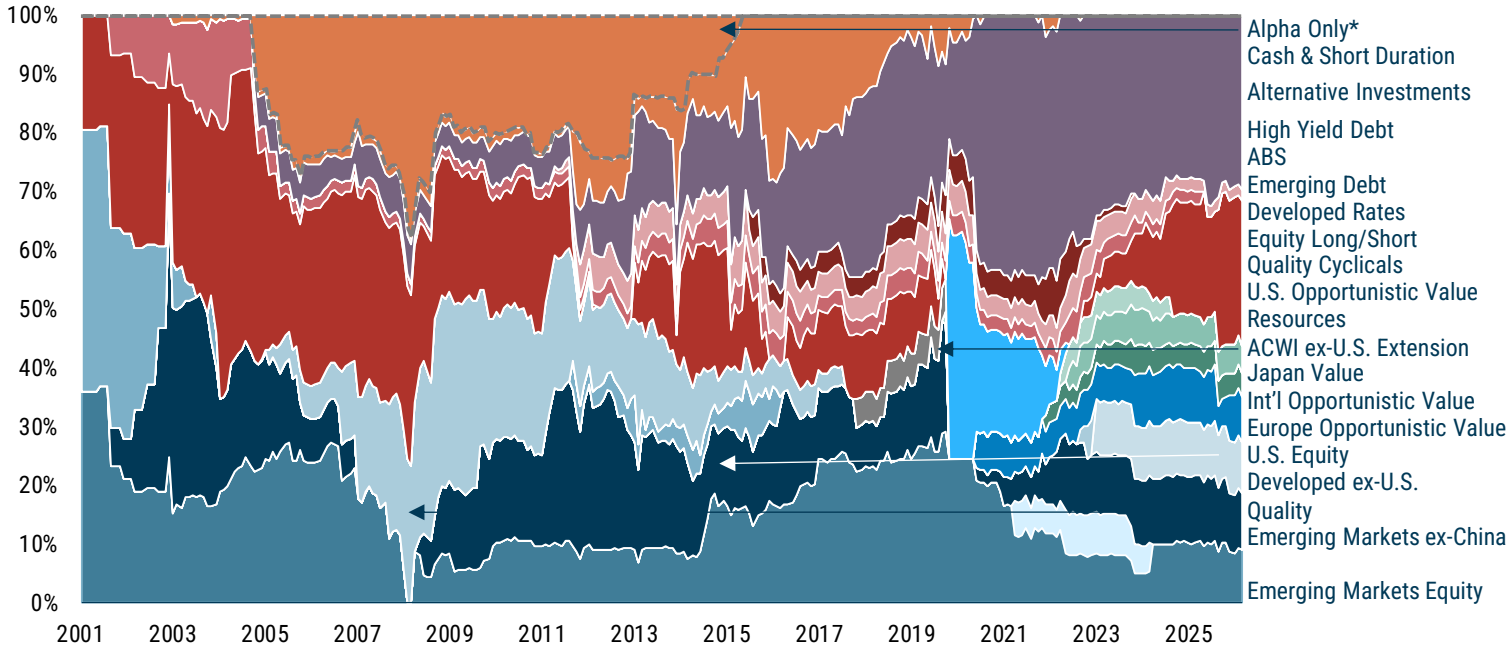

- Exploited the Value/Growth Valuation gap with Equity Dislocation
- Avoided equity beta and duration through liquid alts
- Concentrated in Emerging Value and Japan Small Value

*Formerly Cyclical Focus Strategy
1Combination of Alpha Only Fund and other private vehicles.

BENCHMARK-FREE ALLOCATION PROFILE

July 2001— September 2026 | Source: GMO *Alpha Only is a market neutral portable alpha strategy. Cyclical Focus entered the portfolio in April 2020 as a long position and was reclassified as Equity Long/Short in May 2020. The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy. The groups indicated above represent exposures determined pursuant to proprietary methodologies and are subject to change over

BENCHMARK-FREE ALLOCATION

OVERVIEW

The GMO Benchmark-Free Allocation Strategy seeks to generate positive total return by allocating dynamically across asset classes, free from the constraints of traditional benchmarks.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over a complete market cycle. GMO's proprietary 7-Year Asset Class Forecasts form the foundation of our investment process, providing a framework to assess the return opportunity embedded in different asset classes. We use that insight to allocate to what we believe are the most attractively priced asset classes. GMO's Asset Allocation approach is flexible, not pre-determined by static allocations or benchmark-related ranges, constrained only by our unwillingness to overpay for an asset. We also seek to add value through security selection within both traditional and alternative asset classes.

Risks: Risks associated with investing in the Strategy may include: (1) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; (2) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; and (3) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. **GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®). A Global Investment Performance Standards (GIPS®) Composite Report is available at www.gmo.com by clicking the GIPS® Composite Report link in the documents section of the strategy page. GIPS® is a registered trademark owned by CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.** Prior to January 1, 2012, the accounts in the Composite served as the principal component of a broader real return strategy. Beginning January 1, 2012, accounts in the composite have been managed as a standalone investment. Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 2.45% to 2024 annual performance, based on a representative account. Performance for other periods, including this date, was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Returns include a substantial, one-time proceed from the sale of certain Russian securities. The one-time sale of these securities contributed 0.93% (1-day performance impact), based on a representative account. Performance for other time periods was also positively impacted. Without these proceeds, performance would have been lower. Additional information is available upon request. The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee.

IMPORTANT INFORMATION

Index(es): The CPI (Consumer Price Index) for All Urban Consumers US All Items is published monthly by the U.S. government as an indicator of changes in price levels (or inflation) paid by urban consumers for a representative basket of goods and services. CPI Index returns are typically reported on the 15th of the month. The CPI data reported may not include the most recent month-end which could impact the data that GMO has provided.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

For private bank intermediaries in Singapore and Hong Kong, these materials are intended for institutional and Accredited/Professional Investors Use Only.

GLOSSARY

Characteristics: Based on equity holdings.Based on equity holdings. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide. **Credit Ratings:** The credit ratings above may encompass emerging debt, developed rates, and asset-backed exposures. Ratings for the developed rates exposures are derived by taking the lowest issue level rating between Standard and Poor's & Moody's scores and rolling these up into the portfolio's overall quality brackets. Ratings for emerging debt are determined using the middle of the Moody's, S&P, and Fitch ratings when all three are available, the lower of the two ratings when two ratings are available, and the sole rating when only one rating is available. Ratings for the asset-backed exposures are derived by using the lowest rating among rating agencies at the issue level. Final credit ratings are expressed based upon Standard and Poor's ratings scale. Standard & Poor's rates securities from AAA (highest quality) to C (lowest quality), and D to indicate securities in default; some securities are not rated and are included in the NR category. BB and below are considered below investment grade securities. Please refer to our website for additional information: https://www.gmo.com/americas/benchmark-disclaimers/ **Portfolio Allocations:** Weightings are as of the date indicated and are subject to change. The groups indicated above represent exposures determined pursuant to proprietary methodologies and are subject to change over time. Totals may vary due to rounding. **Region Exposures:** Based on equity holdings.
Risk Statistics: Risk profile data is net of fees. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio. Drawdown is based on the portfolio's worst performance over the period based on monthly observations.
Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS.Based on equity holdings. **Top Holdings:** Based on equity holdings. Holdings are subject to change and should not be considered a recommendation to buy individual securities. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide.
Please refer to https://www.gmo.com/americas/glossary-of-terms/ for additional portfolio characteristic definitions.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
