RETURN ANALYSIS BASED ON MOVING PERIODS* (*annualized returns above one year)

DISCLOSURES

The firm is defined as Grantham, Mayo, Van Otterloo & Co. LLC ("GMO"), an independent investment adviser registered under the Investment Advisers Act of 1940. Beginning January 1, 2012, the firm was expanded to include GMO UK Limited and GMO Australia Limited. Prior to January 1, 2012, GMO UK Limited and GMO Australia Limited were separate firms for GIPS compliance purposes.

Grantham, Mayo, Van Otterloo & Co. LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Grantham, Mayo, Van Otterloo & Co. LLC has been independently verified for the periods 31/12/1992 - 31/12/2024. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

GMO's policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. A complete list of composite and limited distribution pooled fund descriptions and list of broad distribution pooled funds is also available upon request.

DISCLOSURES

As of 6/30/25, the standard fee schedule for the representative Qualified Investment Fund in the composite is 100bps advisory fee on the first \$100mm, 60bps on the next \$100 mm, 50bps on the next \$300mm, 40bps on next \$500mm, and 30bps thereafter and a 20% incentive fee over the hurdle rate. The annual expense ratio in 2023 for the standard share class of the QIF is 100bps and includes performance fees. The standard fee schedule for the private fund in the composite is 100bps advisory fee on the first \$100M USD, 60bps on the next \$100M USD, 50bps on the next \$300M USD, 40bps on the next \$500M USD, and 30bps thereafter and a 20% incentive fee over the hurdle rate. There is also a reduced advisory fee option (62.5bps on the first \$100M, 22.5bps on the next \$100M, 12.5bps on the next \$300M, and 2.5bps thereafter) with a 25% performance fee. The total expense ratio in 2024 for the private fund is 101bps and includes performance fees. Some accounts in the composite may have fees that differ from the standard fee schedule and may or may not have performance fees. Please refer to fund documents for additional information.

The Systematic Global Macro Composite includes portfolios seeking to achieve long-term total return by taking both long and short positions in a range of global equity, bond, currency, and commodity markets using exchange-traded and over the counter (OTC) futures contracts, forward contracts and swaps on commodity indices, equity indices and equities, and index options and other investments. A quantitative investment process is used that combines value and sentiment-based strategies while controlling for risk. The strategy seeks annualized returns of 10% (gross of fees) above the FTSE 3-Month Treasury Bill Index with annualized volatility (standard deviation) of approximately 10-15%, each over a complete market cycle. The strategy will take risks commensurate with those allowed by its typical implementation vehicle, a hedge fund managed in U.S. dollars. The composite was created in March 2002.

The strategy is not limited in its use of derivatives and typically the impact is material. Both the use of derivatives and borrowing may cause a portfolio's gross investment exposure to be in excess of its net assets (i.e., leverage), which may subject a portfolio to a heightened risk of loss. During the period presented the strategy typically used currency forwards, futures, and swaps.

The internal dispersion of annual gross returns is measured by the equal-weighted standard deviation of account gross returns represented within the composite for the full year. For periods with five or fewer accounts included in the composite for the entire year, 'N/A' is noted as the dispersion is not considered meaningful. The three-year annualized standard deviation measures the variability of the gross composite and benchmark returns over the preceding 36-month period. For periods without 36 months of composite performance history, 'N/A' is provided for both the composite and its benchmark.

Performance results are presented both gross and net of investment advisory fees. The composite results are time-weighted rates of return net of commissions, transaction costs and withholding taxes on foreign income and capital gains. All composite returns reflect the reinvestment of dividends and other earnings. Returns for private funds included within the composite, if any, are net of any private fund operating expenses. Valuations and returns are calculated and expressed in U.S. dollars. Net composite returns are calculated by applying a model advisory fee, currently a 1.00% base fee and 20% performance fee, to the composite's gross-of-fee returns on a monthly basis. Actual fees paid by any individual investor may be higher or lower than model advisory fees.

Past performance is not an indicator of future results.

The FTSE 3-Mo. TBill Index is an independently published and maintained index. This unmanaged index is provided to represent the investment environment existing during the time periods shown. The index does not reflect the deduction of advisory fees. It is not possible to invest directly in the index. The FTSE 3-Mo. TBill Index is an average of the last three 3-Month Treasury-Bill issues. It reflects the monthly return equivalent of yield averages, which are not marked to market. It is calculated by FTSE, and is not actively managed.
