

QUALITY CLASS I PROFILE

INVESTMENT OPPORTUNITY

- Quality stocks have provided superior risk-adjusted returns. Quality companies have durable, resilient business models and high returns on capital.
- These companies typically trade at premium multiples, and in our view they usually deserve to. The persistence of Quality characteristics provides a strong foundation for a discounted cash flow valuation approach that incorporates the ability of a company to grow and compound at a high return.
- We believe building that valuation analysis into an investment process can both enhance portfolio return and reduce risk.
- Quality's persistence also means that systematic screening on Quality characteristics (e.g., profitability) is a productive step in identifying these opportunities.

GMO APPROACH

True High Quality with a Long-Term Focus:

We believe companies with sustainable competitive advantages that enable high, stable profits in the future win over time, with lower risk. GMO's Focused Equity team seeks to outperform broad markets with lower absolute risk by owning these high-quality businesses, holding them for the long term, and respecting valuation.

A Powerful Blend:

Our blended approach combines the discipline and consistency of GMO's quantitative framework with a forward-looking, fundamental vetting process that assesses the long-term relevance of each company's business model.

Respect Valuation:

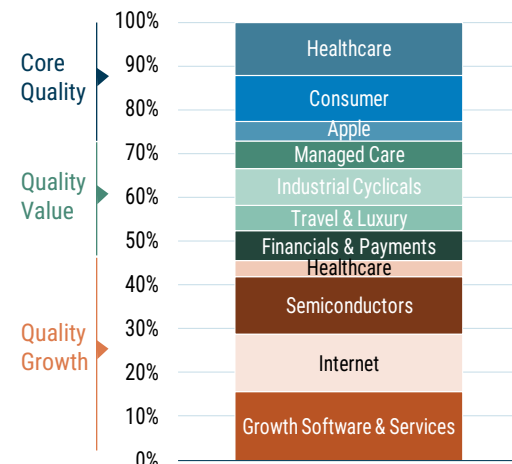

By avoiding over-hyped stocks and investing under temporary clouds, valuation enhances return and risk mitigation, offering lower-risk equity returns when you need it.

Risk Control:

Fundamental risk is the threat of long-term impairment to a business' profitability. These can derive from competitive dynamics and company specific financial and management considerations as well as external pressures from macro events or stakeholder reactions to negative externalities.

Quality is in Our DNA: GMO is a pioneer in quality investing with 40+ years of experience.

A BOTTOM-UP, DIVERSIFIED APPROACH

The sectors are GMO groupings and not the S&P's GICS sector classifications

WHAT IS A QUALITY BUSINESS?

GENERATES HIGH AND SUSTAINABLE RETURN ON CAPITAL

Identifiable High Returning Assets

Return on capital

Capital Discipline

Management invests prudently and with a long horizon

Relevance

Long-term durability of business model

HIGH-QUALITY WINS OVER TIME WITH LOWER RISK

April 1928 – December 2024 | Source: GMO

Bear market is the drop in prices of at least 20% from any peak over a period of at least 3 months. GMO Quality is the highest quality 1/3 of the U.S. market. Value within Quality is the low valuation half of that, relative to the broader U.S. market.

DOWN VS. UP MONTHS

Inception date: 2/6/04 (Share Class III)

Down Market: Average return for all down months.

Up Market: Average return for all up months.

QUALITY CLASS I

OVERVIEW

The GMO Quality Fund seeks to generate total return by investing primarily in equities the Focused Equity team believes to be of high quality.

The team believes that companies with established track records of historical profitability and strong fundamentals – high quality companies – are able to outgrow the average company over time and are therefore worth a premium price. The Fund's disciplined approach uses both quantitative and fundamental techniques to assess the relative quality and valuation of global companies and aims to exploit a long-term investment horizon while withstanding short-term volatility.

CUMULATIVE TOTAL RETURNS (USD, NET OF FEES, %)

	MTD	QTD	YTD	2024	2023	2022	2021	2020

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee. Performance is shown for both the applicable share class and the representative share class in the Fund.

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

GLOSSARY

Country Exposures: Based on equity holdings. **Region Exposures:** Based on equity holdings.

Risk Statistics: Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS. **Top Holdings:** Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying funds in which the asset allocation funds invest and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
