

ALTERNATIVE ALLOCATION

OVERVIEW

The GMO Alternative Allocation Strategy aims to generate positive total return while enhancing portfolio diversification through low correlation to traditional risk assets. The Strategy offers broad exposure across multiple asset classes and liquid alternative categories, including merger arbitrage/event-driven, equity market neutral, global macro, relative value quality, and volatility. We believe the Strategy's success will be driven by the following key features:

The GMO Asset Allocation team allocates capital based on risk and opportunity at the portfolio level. This is especially true at valuation extremes, when investors need risk management the most. The underlying investment strategies dynamically alter exposures and risk levels in an alpha-proportional manner.

FACTS

Strategy Inception	31-Jan-25
Composite Inception	31-Jan-25

Risks: Risks associated with investing in the Strategy may include: (1) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; (2) Leveraging Risk: the use derivatives and securities lending creates leverage. Leverage increases the Funds losses when the value of its investments (including derivatives) declines; and (3) Derivatives and Short Sales Risk: the use of derivatives involves the risk that their value may not change as expected relative to changes in the value of the underlying assets, pools of assets, rates, currencies or indices. Derivatives also present other risks, including market risk, illiquidity risk, currency risk, credit risk, and counterparty risk. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. **GMO does not yet have a GIPS-compliant report for this composite since it has not managed accounts in this strategy for a full year.** The portfolio is actively-managed, is not managed relative to a benchmark and uses an index for performance comparison purposes only and, where applicable, to compute a performance fee.

IMPORTANT INFORMATION

Index(es): The FTSE 3-Month Treasury Bill Index is an independently maintained and widely published index comprised of short-term U.S. Treasury bills.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

For private bank intermediaries in Singapore and Hong Kong, these materials are intended for institutional and Accredited/Professional Investors Use Only.

GLOSSARY

Portfolio Allocations: Weightings are as of the date indicated and are subject to change. The groups indicated above represent exposures determined pursuant to proprietary methodologies and are subject to change over time. Totals may vary due to rounding.

Risk Statistics: Risk profile data is net of fees. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio. Drawdown is based on the portfolio's worst performance over the period based on monthly observations.

Please refer to <https://www.gmo.com/americas/glossary-of-terms/> for additional portfolio characteristic definitions.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
